#### Feet First

By NATHAN of JOHNSON'S

Did you know? ... It takes a lot of training and experience on the fitting stool to produce a genuinely skilled shoe fitter. As in anything worthwhile, there is no shortcut to becoming expert at it. There just is too much to be learned for anyone to master it in 10 easy lessons.

For instance, the well-trained shoeman can tell a great deal about what not to try on your feet by examining the shoe you are wearing. Naturally, there's no substitute for measuring your feet carefully. But looking at your old shoe is a helpful guide to your shoe fitter. It's always wise for that reason to wear your best-fitting shoes when you come in for a new pair.

What are some of the things your shoes tell the expert? If the sole is worn at the toes, it's a sign that either you scrape your toes when you walk or that the shoe was fitted too short, forcing your toes against the forward edge of the shoes. If the vamp bulges over the sole, your foot needs more "spreading" room—a shoe that is wider or longer, or both.

If the shoe bulges at the instep and quarters, you may require a shoe of greater height. You may require shoes with adjustability features—laces, straps, gores.

If the inside edge of the heel is worn, you may have a weak foot. You need shoes that will help your feet carry you on the normal weight-bearing arches, shoes with strong arches and shanks.

Often, when the shoe shows signs of being short yet careful checking indicates it is the right length, the answer may be in too-short stockings. If isn't understood generally, but improper fitted stockings can do as much harm as improperly fitted shoes. Be sure your stockings, like your shoes, permit your feet to lie flat with enough freedom for toe movement, without being over-tight.

WATCH EACH SUNDAY FOR A DISTINCTIVE

Good taste and simplicity go hand in hand. To this we might add good sense, for it is indeed good sense to insist on simplicity of line and design when you select your "basic" pieces like sofas and lounge chairs. To be a piece represent a major portion of the expense of your living room furnishings. In all probability you'll live with them for a long time.

If they are basically simple—of timeless design—and well constructed, they will be at home in any style room today, and will also fit well with the fresh decoration schemes of future rooms.

Neutral colors, like the grey and beige tones, give greater leeway for changing room colors. They take kindly to brilliant

color accents—pillows, pictures and accessories. A monochromatic (one-color) scheme of sandstone beige makes an inviting contemporary room appear larger than it really is. Two lounge chairs and a square mahogany lamp table can form an important corner group, and act as a balance offset for a large sofa and oval coffee table.

This is truly a room of today furnished with basically simple pieces that will be equally at ease in a room of tomorrow.

Pieces that are to be grouped together should bear a relationship to each other. They should be of comparable size, weight and, if possible, style. Companion your lounge chairs with lamp tables that are worthy of them.
