

Mock 'Raid' Sends Millions to Shelter; Some Ignore Alert

(Story also on page 1.)
Enemy bombers— theoretically—struck from the north today to unleash an imaginary torrent of nuclear death and destruction on more than 100 American cities. It was only a test to determine how well Civil Defense and government agencies could cope with the real thing.

The "surprise attack" was mapped to pose the greatest problems of any exercise yet for all branches of the Civil Defense organization and federal agencies having essential wartime functions. President Eisenhower "fled" by helicopter to a secret headquarters.

Before he left Washington, the president had in theory set up a state of national emergency, alerted military and Civil Defense units, and created a war agency to supervise price, wage, rationing and manpower controls.

Yesterday's first phase of the test was to check Civil Defense on the local level and to remind civilians of the need to take cover. This exercise will last three days, although public participation was limited to only 15 minutes.

Next week, more than 5,000 government officials and key subordinates will practice at the re-establishment of normal government operations in half a dozen states.

The operation was begun on paper a month ago.
President Eisenhower, halting in a brown suit, walked slowly to his blue and white helicopter after it landed about 150 feet from his office. He stopped long enough to pose for photographers before it took off from the south grounds of the White House at 2:09 p.m.

In his first use of the helicopter, the President was flown to a secret relocation center in a mountainous area within 200 miles of Washington.

As the chief executive fled, he bore with him the knowledge that in theory much of his national readiness had been ravaged by nuclear bombs.

In New York City, sirens began warbling the alert at 1:43 p.m. The Rockefeller Center and Times Square areas were almost instantly transformed. Pedestrians scurried to shelters. Buses, cabs and cars pulled to the curb. Within moments, streets were deserted and helmeted Civil Defense wardens.

In criminal courtrooms in downtown Manhattan herded judges made their way to shelters while the defendants had been trying to lock up areas. More than 1,100 prisoners in the city prison remained in their cells, which were unlocked during the alert.

Mayor Robert F. Wagner and the city's civil defense director, Robert E. Condon, viewed the exercise from the Times Square area. Said the mayor afterward: "It was very good cooperation. I have high praise for civil defense, the police and the public."

Condon declared: "I was very delighted with the public cooperation."
However, all didn't go smoothly. In the heart of busy Harlem, the sirens failed even to slow traffic until police and civil defense workers took an active hand. Pedestrians refused to take cover as instructed. Business in the area went on as usual.

Police had to threaten arrests to get cooperation in the Grand Central area of Manhattan. Even then, some pedestrians merely stood on doorways and refused to move.

Fifth Avenue strollers took their time seeking cover.
In stores, offices, hotel lobbies, subways, all went on as usual, with little or no heed paid to the exercise.

At La Guardia field the all-clear sounded before all the stragglers had taken cover. It took eight minutes to clear Idlewild Airport of 13,000 persons.

Albany misinterpreted the first warning as being instructions to take cover—state civil defense headquarters reported.
The same thing happened at Elmira, N. Y.
The first make-believe target to feel the terrifying strength of nuclear destruction was Des Moines.

They'll Do It Every Time

Rocket Burst Signals Start Of National Scout Jamboree

By RICHARD GRAVES
PHILADELPHIA, July 12 (AP)—The white glare of a rocket burst high in the sky over this national shrine today signaled the opening of the fourth national Boy Scout Jamboree.

More than 33,000 youngsters and their adult leaders snapped attention at the signal for the solemn moment when American flags were hoisted officially for the first time at the encampment.

Vice President Richard M. Nixon was invited from Washington to address later ceremonies.
The official opening brought a momentary halt to the fast pace of activities at the huge park. But the suspension of youthful energy lasted only so long as the notes of the national anthem echoed across the rolling hills and fields of Valley Forge.

Immediately, the smoke from camp fires climbed over the tree-lined valleys as the scouts turned to their first daily activity—eating. A short time later the tramp of thousands of feet sounded on the roadways as the youngsters moved out to a host of amusement activities.

Not the least of these were rifle practice, archery, fishing demonstrations and trap shooting. Hundreds of teen-agers braved a hot sun to roll logs, cut timber with cross-cut saws and chopped wood—all for fun.

But the evening's entertainment topped the day's program for the scouts.
More than 3,000 of them volunteered to represent George Washington's Colonial army in a pageant entitled "The Story of Valley Forge." The youngsters depicted Washington's retreat from the Battle of Brandywine to Valley Forge, the grim winter of 1777, and the celebration of the troops when the alliance with France was announced.

Arthur A. Schuck, chief scout executive, told the youngsters gathered for the pageant, "You are citizens now."
"This is our lot as scouts, explorers and scouters—in this we dare not fail." Schuck declared in remarks prepared for delivery at the pageant.

In a roll of regions, representatives of every one of the national districts—some 1,200 youngsters—paraded across the stage of the huge Valley Forge Arena dressed in the costumes native to their areas and carried state flags.

Earlier today, scouts took cover in their tents as part of a nationwide Civil Defense alert.

In 1935, when he was 24, Aly was named correspondent in a divorce suit by Thomas Loel E. B. Guinness, heir to the Irish brewing fortune Mrs. Guinness was the first daughter of Joan Barbara Yard-Buller, ex-wife of a British brewer.

The uncontested divorce was granted early in May 1936 and seven days later, on May 18, 1936, Aly and Mrs. Guinness were married in Paris.

Karim was born the following year. He has a younger brother, Aymon Mohammed.
Aly Khan was out of the headlines for years. Then in 1948 he began being seen around Europe with Rita Hayworth.

After a divorce from Joan, he married Rita in Cannes, France, May 27, 1949, with Moslem marriage rites following two days later at Cannes. Rita got a Nevada divorce from him in 1953 and a second divorce in Switzerland in 1956.

Another man had bought osten, and wanted to try them out. Another man, the evangelist said, was too occupied with the things of this world to worry about his soul.
A third said "I have married a wife, and therefore I cannot come."
"I think this man is the only one who really had an excuse," said Graham as his audience roared.
But he added that even that is not sufficient excuse for avoiding God.
A total of 865 persons came forward at the end of the sermon at Graham's call for decisions for Christ. It was one of the largest responses since the New York crusade started May 15.

A-Weapon Handbook Revised

By ELTON C. FAY
WASHINGTON, July 12 (AP)—The government modernized its 7-year-old handbook on nuclear weapons today, telling of the vast devastation that could be wreaked by newer, bigger explosives.

The volume, "The Effects of Nuclear Weapons," was issued by the Defense Department and Atomic Energy Commission.
It presents the new look in terms of H-bombs of 20 million tons of energy because "it is no longer possible to describe effects in terms of a single nominal bomb" of only 30,000 tons force.

The latter was the force of the atom bombs dropped on Japan in 1945.
"No Danger"
The guidebook reiterates the government's insistence that there is no danger of worldwide contamination from the poisonous by-products of nuclear bombs if testing continues at the present rate.

And it raises the question of whether even nuclear warfare would boost the quantity of the cancer-causing strontium 90 to a dangerous level.
However, the book, written several months ago, contains no direct reference to the question of "clean" nuclear bombs. President Eisenhower has said that the big bombs now are about 96 per cent cleaner than the first "dirty" bombs and that nuclear physicists expect to make them entirely clean within the next few years if tests can be continued.

The 1967 guidebook sets forth scaled-up measurements of the vast impact in blast, heat, instantaneous radiation and lingering fallout of the new thermonuclear weapons. It presents formulas for figuring the results of truly giant, but apparently still unproduced, weapons.

Secretary of Defense Charles E. Wilson and AEC Chairman Lewis A. Strauss wrote a foreword.
"The effects information contained herein is calculated for yields up to 10 megatons (10 million tons) and the scaling laws for hypothetically extending the calculations beyond this limit are, however, not to be taken as an indication of capabilities or developments," they said.

The County Court reserves the right to require any or all bidders to furnish a certified check or bond in the amount of 10 per cent of the contract amount.
Dated at Dallas, Oregon, this 11th day of July, 1957.

STATE OF OREGON, by and through its State Highway Commission, composed of Charles H. Reynolds, M. K. McIver and Robert B. Chessman, Plaintiffs.
ORLA THOMPSON and JOHN DORVILLE, husband and wife, Defendants.
VERNON THOMPSON; and K. D. ROEBUCK, Defendants.

ROEBURG, July 12 (AP)—Judge Charles Woolrich today took over advice until July 22 whether to declare Mr. and Mrs. Howard Ott unfit to keep three adopted children.
Robert G. Davis, attorney for the Otts, contended in his final arguments today that Dis. Atty. Avery Thompson had proven "nothing except that the Otts had taken good care of the children."

Earlier, Thompson pictured Mrs. Ott as having shown a "pattern of mistreatment."
In his closing argument, the district attorney contended that the abuses were directed at the children in the Ott home who were slow to learn or were sickly. Other, he said, were mistreated because Mrs. Ott, who has cared for 14 adopted and foster children in the past seven years couldn't "handle" them in church in fancy clothes.

The Otts were accused of mistreating the children. The hearing lasted four days.

WASHINGTON, July 12 (AP)—A Navy official today said that any move to transfer the Navy's retraining command from San Diego, Calif., won't come about for at least two years.

The announcement would appear to blunt hopes of West Coast communities which the Navy earlier had said were selected by a study group as possible new sites for the facility. They are Eureka, Wash., Barstow, Calif., and Bakersfield, Calif.

Rep. Holmes (R.-Wash.) said he had been advised by W. B. Franke, Navy undersecretary, that no firm decision has been made to relocate the San Diego program if such a decision is reached, he said, it would not be until the year beginning July 1, 1958 that any money could be obtained to carry out the move.

Earlier the Navy had advised Holmes that the study team had narrowed to three the possible new locations for the retraining program. It said it expected a final selection some time this month.

Sealed bids will be received by the County Clerk at the Post County Court House in Dallas, Oregon, up to 11:00 a.m. July 23, 1957, for improvement of street as follows:
Grading, surfacing and paving of 102 feet of 8-foot curb and gutter, approximately three (3) miles North of Salem Bridge off the Wallace Road. Completion date to be October 1, 1957.

Plans and specifications can be obtained from the County Engineer or from the County Auditor's office. All bids will be opened by the County Court at 10:00 a.m. on July 23, 1957, at their regular session.
Each bid must be accompanied by certified check or bond in the amount of 10 per cent of the contract amount.
The successful bidder will be required to furnish a certified check or bond in the amount of 10 per cent of the contract amount.
Dated at Dallas, Oregon, this 11th day of July, 1957.

NOTICE OF FINAL ACCOUNT

WENDELL E. HEATH and DELIGHT G. FRYE, executor and executrix respectively, of the estate of MAE M. HEATH, Deceased, have filed their first and final account of the administration of said estate, and that Monday, the 19th day of July, 1957, at 9 o'clock A.M. of said day, in the court room of Honorable Val D. Sloper, Circuit Judge, in the court house at Salem, Oregon, has been appointed by said court as the time and place for the hearing of all objections to said final account, and the settlement thereof. Circuit Court No. 16857, Marion County, Oregon. Dated and first published June 19th, 1957.

WENDELL E. HEATH, Executor and Executrix of the Estate of Mae M. Heath, Deceased.
DELIGHT G. FRYE, Attorney for Estate, 330 Court House, Salem, Oregon.

HATTIE J. BRATTON, Attorney for Estate, 330 Court House, Salem, Oregon. June 13, 1957, July 6, 1957.

NOTICE OF HEARING OF FINAL ACCOUNT

Notice is hereby given that the Final Account of Louise N. McGilvra as Executrix of the Estate of Jennie M. McGilvra, Deceased, has been filed in the Circuit Court of Marion County, Oregon, and that Monday, the 3rd day of August, 1957, at 9:15 a.m. in the courtroom of said court in the county courthouse at Salem, Oregon, will be the time for the hearing of all objections, if any, to such Final Account.

LOUISE N. MCGILVRA, Executrix of the Estate of Jennie M. McGilvra, Deceased.
STEVE ANDERSON, Attorney for Estate, 541 Court Street, Salem, Oregon. July 11, 1957.

Old Frigate Sought

RENTAL. Norway July 12 (AP)—Four frogmen are trying to find the old Norwegian frigate Najaden off the south coast in a project financed by an anonymous shipowner for the Norwegian Shipping Museum. Najaden sank in July 1812 with 102 men aboard.

Adm. Sherman Has 'Slight Heart Attack'

SAN DIEGO, Calif. July 12 (AP)—Retired Navy Adm. Frederick C. Sherman 69, World War II task force commander in the Pacific, was taken to Naval Hospital today with what his wife described as a "slight illness—little heart attack."
The hospital said his condition was satisfactory but that his case was listed as serious.

Camron Doctor to Use Clinic Donations to Aid Gale Victims

LAKE CHARLES, La., July 12 (AP)—Dr. Cecil Clark said today he has received donations to rebuild his clinic in Cameron but will use the money to help other hurricane victims instead.
"The money is needed more for medical supplies than a building now," said Dr. Clark, who lost three children when Hurricane Audrey struck Cameron June 27. The hurricane killed more than 500 persons and left thousands homeless.
The doctor indicated he would accept money to rebuild his clinic in the future if the need for medical supplies to victims grew less than the original cost of the equipment and supplies was between \$60,000 and \$75,000.
Dr. Clark said a small amount of insurance covered the building, the only clinic in Cameron.
At peak operation before the hurricane, the clinic staffed by Dr. Clark and four nurses, cared for 12 hospitalized patients and about 50 out-patients.

State Mineral Production Up

PORTLAND, July 12 (AP)—The State Department of Geology and the federal Bureau of Mines reported today the value of Oregon's mineral production last year was \$4 million dollars.
That is a seven per cent increase over the previous year, the agencies said.
Major gains were in nickel, chromite and mercury. A decrease in sand, gravel and stone production was offset by greater production of cement.

\$5 Million Suit Started By Sackett

NORFOLK, Va., July 12 (AP)—Sheldon F. Sackett, publisher of the Coos Bay Ore. Times, is attempting to sue the Merchants and Farmers Bank of Portsmouth for \$5,010,000.
He filed a citizen's complaint stating that the bank injured his standing in the local and national community by returning a \$50,000 check he had tendered as part payment for the purchase of equipment of the defunct Portsmouth Times.
Federal District Judge Walter S. Hoffman ruled that Sackett's suit was not worded properly and gave Sackett 30 days to file an amended complaint.

State Mineral Production Up

PORTLAND, July 12 (AP)—The State Department of Geology and the federal Bureau of Mines reported today the value of Oregon's mineral production last year was \$4 million dollars.
That is a seven per cent increase over the previous year, the agencies said.
Major gains were in nickel, chromite and mercury. A decrease in sand, gravel and stone production was offset by greater production of cement.

Slash Fires Near Roseburg Quelled

ROSEBURG, July 12 (AP)—Two fires in logging slash started by machinery have been brought under control east of here.
A six-acre fire was started by a tractor on private land 35 miles from here. The second, caused by a power saw backfire, covered two acres on the Umpqua National Forest.

Graham Cites Excuses for Avoiding God

NEW YORK, July 12 (AP)—Billy Graham talked about excuses tonight to the 100,000 people who gathered when they want to avoid thinking about God.
He took his text from the story in Luke 14:24-24 of the man who prepared a great feast and invited a number of people to it, only to find that each man had an excuse for not accepting.
One man in the Bible story said he had bought land and must go and look it over. Graham told a Madison Square Garden audience of 18,000 that the modern parallel is people who "have time to read, to watch television, but they are too busy for God."
Another man had bought oxen, and wanted to try them out. Another man, the evangelist said, was too occupied with the things of this world to worry about his soul.
A third said "I have married a wife, and therefore I cannot come."
"I think this man is the only one who really had an excuse," said Graham as his audience roared.
But he added that even that is not sufficient excuse for avoiding God.
A total of 865 persons came forward at the end of the sermon at Graham's call for decisions for Christ. It was one of the largest responses since the New York crusade started May 15.

Delay Seen In Transfer Of Navy Base

WASHINGTON, July 12 (AP)—A Washington congressman quoted a Navy official today as saying that any move to transfer the Navy's retraining command from San Diego, Calif., won't come about for at least two years.

Judge Delays Decision on Waif Cruelty

ROSEBURG, July 12 (AP)—Judge Charles Woolrich today took over advice until July 22 whether to declare Mr. and Mrs. Howard Ott unfit to keep three adopted children.
Robert G. Davis, attorney for the Otts, contended in his final arguments today that Dis. Atty. Avery Thompson had proven "nothing except that the Otts had taken good care of the children."
Earlier, Thompson pictured Mrs. Ott as having shown a "pattern of mistreatment."
In his closing argument, the district attorney contended that the abuses were directed at the children in the Ott home who were slow to learn or were sickly. Other, he said, were mistreated because Mrs. Ott, who has cared for 14 adopted and foster children in the past seven years couldn't "handle" them in church in fancy clothes.

Notion of 'A-Weapon' Handbook Revised

WASHINGTON, July 12 (AP)—The government modernized its 7-year-old handbook on nuclear weapons today, telling of the vast devastation that could be wreaked by newer, bigger explosives.
The volume, "The Effects of Nuclear Weapons," was issued by the Defense Department and Atomic Energy Commission.
It presents the new look in terms of H-bombs of 20 million tons of energy because "it is no longer possible to describe effects in terms of a single nominal bomb" of only 30,000 tons force.
The latter was the force of the atom bombs dropped on Japan in 1945.
"No Danger"
The guidebook reiterates the government's insistence that there is no danger of worldwide contamination from the poisonous by-products of nuclear bombs if testing continues at the present rate.
And it raises the question of whether even nuclear warfare would boost the quantity of the cancer-causing strontium 90 to a dangerous level.
However, the book, written several months ago, contains no direct reference to the question of "clean" nuclear bombs. President Eisenhower has said that the big bombs now are about 96 per cent cleaner than the first "dirty" bombs and that nuclear physicists expect to make them entirely clean within the next few years if tests can be continued.

And it raises the question of whether even nuclear warfare would boost the quantity of the cancer-causing strontium 90 to a dangerous level.
However, the book, written several months ago, contains no direct reference to the question of "clean" nuclear bombs. President Eisenhower has said that the big bombs now are about 96 per cent cleaner than the first "dirty" bombs and that nuclear physicists expect to make them entirely clean within the next few years if tests can be continued.

Notion of 'A-Weapon' Handbook Revised

WASHINGTON, July 12 (AP)—The government modernized its 7-year-old handbook on nuclear weapons today, telling of the vast devastation that could be wreaked by newer, bigger explosives.
The volume, "The Effects of Nuclear Weapons," was issued by the Defense Department and Atomic Energy Commission.
It presents the new look in terms of H-bombs of 20 million tons of energy because "it is no longer possible to describe effects in terms of a single nominal bomb" of only 30,000 tons force.
The latter was the force of the atom bombs dropped on Japan in 1945.
"No Danger"
The guidebook reiterates the government's insistence that there is no danger of worldwide contamination from the poisonous by-products of nuclear bombs if testing continues at the present rate.
