It really hurts—the high cost of things you have to buy.

That goes for a steel company, too. The steel people are in exactly the same kind of squeeze everybody else is—and on a bigger scale because they have to buy so much.

Even little things. Take the cost of the thousands of brooms that the steel companies buy in a year to keep their plants clean. Ten years ago a good industrial broom could be bought for \$1.27. That broom today costs \$1.95.

Or look at the tires for steel company trucks. A 10-ply tire was \$66.50 ten years ago. Same tire today, \$122.30. Other costs are 'way up, too, like raw materials and all the other things steel companies buy to the tune of several billions of dollars a year. No wonder it costs more to make steel these days.

Everybody feels it when costs are high—industries as well as people.
