

Now! Easier,
surer protection
for your most intimate
marriage problems

Tested by doctors... trusted by women

1. Germicidal Protection!

Norforms are safer and surer than ever! A highly perfected new formula releases antiseptic and germicidal ingredients right in the vaginal tract. The exclusive new base melts at body temperature, forming a powerful protective film that permits long-lasting action. Will not harm delicate tissues.

2. Deodorant Protection!

Norforms were tested in a hospital clinic and found to be more effective

than anything it had ever used. Norforms are deodorant—they eliminate (rather than cover up) embarrassing odors, yet have no "medicine" or "disinfectant" odor themselves.

3. Convenience!

These small vaginal suppositories are so easy and convenient. Just insert—no apparatus, mixing or measuring. They're greaseless and keep in any climate. Your druggist has them in boxes of 12 and 24. Also available in Canada.

Group of volunteer prisoners line up for cancer inoculations at Ohio State Penitentiary.

Convicts Help Fight CANCER

HUNDREDS of prison inmates are volunteering their efforts—and in some cases, even their lives—in the war against cancer, the nation's No. 2 disease killer. In answer to an editorial in the Ohio State Penitentiary newspaper, for example, 100 inmates volunteered to be injected with human cancer cells. This test, conducted by the Sloan-Kettering Institute, seeks to determine what defenses normal persons have against implanted growths and how these defenses may be strengthened. It may take years before the results are known. And at the New Mexico Penitentiary in Santa Fe, convicts assemble educational kits which the American Cancer Society distributes throughout the state. A women's corps in an adjoining prison compound makes dressings and bandages for cancer patients. As one prisoner explained: "In life, you're always doing something either for or against society. There's not much more I can do against it. So why not give the other way a try?"

Trusty helps bring cancer educational material into prison for mailing throughout New Mexico.

You can not brush bad breath away!

Almost everyone uses tooth paste... yet almost everyone has had breath occasionally. Germs in the mouth cause most bad breath. No tooth paste kills germs the way Listerine Antiseptic does—on contact, by millions. Listerine stops bad breath four times better than tooth paste. Rinse with Listerine every time you brush your teeth.
