rebel-held Moslem quarters in the center of the capital. Fighting was not as intense as in Saturday's day-long battle in which more than 50 persons were killed.

Large Number Killed

Heavy shooting subsided shortly after noon. From then until dark descended on the city there was only sporadic firing and bombing. More people were killed and wounded in Sunday's flare-up. Mother Says Son Stole Poorboxes Past 13 Years

NEW YORK (AP)—A young man was sent to Bellevue Hospital Sunday for mental observation after his mother said he had been stealing from church poorboxes since he was 7.

Felony Court Magistrate Manuel Gomez called John Knudsen of Brooklyn "the meanest thief in town." Knudsen was arrested Saturday in Holy Cross church on a charge of possession of burglar's tools.

Police said Knudsen, a shipping clerk who will be 21 next month, possessed a list of churches rated as to whether collections were "good, bad or indifferent."

His mother, Mrs. Mary Knudsen, wept as she told the court of her son's past.

the insurgents pinned down inside their strongholds. Security forces directed light artillery and mortar fire at the roof and top-floor apartments of Salam's three-story home, Salam told newsmen the top floor was a ruin.

Insurgents late Saturday night attacked the home of Prime Minister Samir Solh, also located in Basta, half a mile away. They sacked his house and set it afire, causing severe damage. The Prime Minister was not in the house at the time.

Seeking Overthrow

Insurgents also sacked the home of Naim Moghaghagh, another strong supporter of President Camille Chamoun, whom the rebels are trying to overthrow.

Salam had been using the top floor of his home as headquarters for the rebellion. One of his lieutenants, Adnan Nahas, was killed in the shelling.

Polish Atomic Reactor Starts

WARSAW, Poland (AP)—Poland stepped into the atomic age Sunday. Its first reactor — named Eve — started work at Swierk, a village on the Vistula River 30 miles above Warsaw.

Eve is basically a research reactor, but according to the designers it will eventually cover the country's needs in radioactive isotopes for industry and medicine.

Polish scientists built it with materials bought from Russia. Now it produces two kilowatts power. Within two years its capacity will increase to two megawatts.
