## Babson Reports:

# Citrus Industry Booms Without Price Props

By ROGER W. BABSON  
 BABSON PARK, Mass., April 11—When a very small boy, I remember my father driving his horse and buggy to Salem, 15 miles away, to get an orange for his very sick aunt. Those were the days when no Christmas was complete unless we found an orange in the toe of the stocking which we hung by the fire side before going to bed on Christmas Eve. I remember later one orange was given by the public school principal as a reward for having perfect attendance for the entire school year.

HOW THE ORANGE INDUSTRY HAS GROWN  
 In 1900 the entire State of Florida produced only 1,000,000 boxes of oranges. In 1923, when I first came to Florida, production was only 10,000,000 boxes. This year it will be 65,000,000 or 100,000,000 boxes. With babies continuing to be given orange juice as their first food and with continued heavy advertising, nothing can stop the demand for orange juice. Furthermore, there have been great improvements and developments in the industry.

When I first came to Florida waters only "whole fruit" was shipped out of the state and sold. Then, about 25 years ago, the co-operatives were developed and some orange juice was then canned. This, however, always had a little bitter taste. Some 10 years ago the "frozen concentrate" was invented. This gives exactly the same taste as the fresh juice and has greatly increased the consumption of orange juice as well as the health of the entire nation.

THE AMERICAN HABIT  
 Most orange juice is drunk just before breakfast. This means that the frozen concentrate must be mixed with water and thoroughly melted some ten minutes before serving. This has caused a growing demand for a new product known as "chilled" orange juice. As soon as this juice is squeezed from the orange it is stored and transported to the large cities of the North in refrigerated trucks at about 40 degrees temperature, so that the juice holds its perfect flavor. It is then put in paper cartons and delivered by the dairy companies along with the morning milk.

As a result, the housewife can lie in bed ten minutes longer! This is taking like wild fire.

Although citrus fruits can be safely raised in only a small part of Florida and the United States, yet there is competition between Florida, Texas, Arizona, and especially California. The last state, however, is growing so fast that orange groves are becoming more valuable as home sites and citrus production is decreasing.

KEEPING UP TO DATE  
 All of this competition results in constantly improved quality and in keeping the price within the reach of all families. Hence, with the constant growth in population, demand will continue to increase. But North America is not the only market for citrus juices. Foreign governments are also recognizing their great health value.

The English government is buying the juice in a super-concentrated non-refrigerated form, like molasses, and distributing it to its babies to supplement a small supply received from Spain, Italy, and other Mediterranean sources. To get good products, however, these countries must import phosphate and other fertilizer chemicals, most of which come from Florida close by the center of the Florida citrus industry. This gives Florida an advantage over all the world.

GREAT OPPORTUNITIES ARE ELSEWHERE  
 I, however, am not telling this story about the citrus industry just to boom Florida. I am telling it to show what a group of farmers can do by uniting in co-operatives and getting the help of research and advertising. The citrus industry has never had subsidies or price guarantees. It has fought its own battles without any limiting of acreage or government loans on surplus crops.

Why cannot the farmers of our Central West and South do the same thing with their surplus corn, wheat, cotton, and other products? Henry Ford once said to me: "When the farmers wake up and quit crying on Uncle Sam's shoulders they can find a great Agriculture needs a great leader like Henry Ford and the national use and market for their products as raw materials in industry."

Taggesell Firm Announces New Jeep Dealership  
 Taggesell-Pontiac Co., 600 N. Liberty St., Salem, announced Thursday it had signed a Willys Sales Corporation franchise to handle the company's line of "Jeeps" and other 4-wheel drive "Jeep" commercial vehicles, in addition to Pontiacs.

Dick Taggesell said the dealership would offer complete parts and service facilities for the "go-anywhere" vehicles, as well as maintaining the full line of "Jeep" models in the local area.

The "Jeep" is powered by the four-cylinder F-head "Hurricane" engine. Other vehicles in the line, including the 1-ton truck and "Jeep" Utility Wagon, are offered with the six-cylinder L-head "Super-Hurricane" engine.

Final Huddle Due Today on Eden's Health  
 BOSTON, April 11 (U.S.A.)—A final consultation is being arranged for tomorrow in the case of Sir Anthony Eden who has undergone four days of tests and examinations to determine the cause of frequent attacks of fever.

Dr. Richard B. Cattell, who operated on the former British Prime Minister four years ago for a gall bladder ailment, has been directing the examinations, and Dr. Sara M. Jordan of the Lahey Clinic's department of gastroenterology, has been studying the patient's condition. Her studies also will be completed tomorrow.

In the one-day bulletin this morning, Dr. Cattell said there is no present evidence of inflammation of the colon nor any evidence of any source of fever other than from the bile duct.

He added that a decision as to the advisability of an operation will be reached shortly.

The 50-year-old statesman arrived here Sunday after a long flight from New Zealand. The fever attacks caused him to cut short a vacation. He is a patient in the New England Baptist Hospital.

Daughter of Actor Dies  
 LOS ANGELES, April 11 (U.S.A.)—Loren Lynn (Sande) Crabbe, 20-year-old daughter of actor-swimmer Buster Crabbe, died in her sleep yesterday. The coroner's office said today an autopsy failed to disclose the cause of her death.

Miss Crabbe, a student at the University of Southern California, died at the home of her grandparents, Mr. and Mrs. Tom Held, in West Los Angeles.

Mrs. Held said her granddaughter had lost considerable weight and had suffered from an attack of virus flu about a month ago.

The coroner's office said microscopic examinations will be conducted in a further attempt to determine the cause of death. The coroner said Miss Crabbe weighed only 80 pounds.

Albany to Ask \$233,000 for Air Strip Property  
 ALBANY, Ore., April 11 (U.S.A.)—Albany intends to ask the state Highway Commission for \$233,000 in payment for a mile-long strip of the Albany airport. The state has offered \$100,000.

The City Council set the \$233,000 figure last night after City Manager William Bolman estimated it would cost the city that much to build two new runways and make other changes. He said it probably would be necessary to build a new hangar also.

The state wants the 250-foot wide strip for the new freeway between Portland and Eugene. The airport is located just west of the Albany city limits.

Junior Livestock Show Planned at San Francisco  
 SAN FRANCISCO, April 11 (U.S.A.)—Youngsters from California, Oregon and Hawaii will exhibit more than 3,000 horses, pigs, sheep and cattle in competition for \$24,000 in prizes at the Grand National Junior Livestock Exposition, opening Saturday.

In addition to these 1,185 youngsters, 214 boys and girls will have 276 horses in competition in the horse show.

Exhibited livestock will be auctioned next Wednesday.

STOPIST OF ANNUAL STATEMENT  
 For the year ended December 31, 1956, the SUB-CENTURY TRUST COMPANY of Los Angeles, Cal., has filed with the State of Oregon, pursuant to law, the following statement:

ADMITTED ASSETS  
 Bonds \$2,362,479.30  
 Cash and cash equivalents 143,357.05  
 Real estate 274,114.00  
 Cash and cash equivalents 143,357.05

Fire Deaths Trial Under Jury Study  
 MOSCOW, Idaho April 11 (U.S.A.)—The jury which is deliberating the first degree murder case against Paul D. Matovich came back into the courtroom late today to hear testimony read and refresh his instructions under the judge.

The jury was asked to hear the testimony of Lataha County Sheriff J. E. Jordan. Judge Hugh A. Baker ordered the court reporter to read the requested testimony.

The jury then asked Judge Baker why Sheriff Jordan had placed Matovich in solitary confinement after his arrest.

The judge studied the case record and replied:  
 "The evidence does not answer that question. That is a question that cannot now be gone into."

The jury asked for more information on how to judge the credibility and integrity of a witness. Judge Baker referred the jurors back to his original instructions, which said in effect that the question of credibility or integrity of a witness on any given question was something for the jury to decide.

The jury began deliberations shortly after noon on state charges that Matovich is a killer and should be hanged for a college dormitory fire in which three fellow students died.

Matovich, 21, a freshman at the University of Idaho, sat impassively as District Judge Hugh A. Baker told the jury of nine men and three women to begin in one of eight possible verdicts.

The youth was charged with first degree murder and arson, accused of setting a fire in Gault Hall on the campus and in the early morning hours of last Oct. 19 after a night of beer drinking.

Stocks and Bonds  
 NEW YORK, April 11 (U.S.A.)—Steel losses on profit-taking and sugar and drug shares rose in today's mixed stock market.

The range of gains and losses went from fractions to around 2 points.

Volume held up well, reaching 2,350,000 shares compared with yesterday's 2,090,000, the city's highest level.

Advances outnumbered declines by 468 to 417, of the 1,144 issues traded; and there were 75 new issues, 185 highs against 16 new lows.

Weighted by the blue chip lists, however, the Associated Press average of 60 stocks showed a decline of 29 cents to \$177.30, with the industrials being unchanged, the rails down 50 cents, and the utilities down 20 cents.

Weighted by the blue chip lists, however, the Associated Press average of 60 stocks showed a decline of 29 cents to \$177.30, with the industrials being unchanged, the rails down 50 cents, and the utilities down 20 cents.

Report Fails To Halt Grain  
 CHICAGO, April 11 (U.S.A.)—Grain futures took a bearish ground today and moved upward on the Board of Trade.

Wheat closed 1/2 cent higher, corn 1/2 cent higher, oats unchanged to 1/2 cent higher, soybeans 1/2 cent higher, and hard 10 to 25 cents a hundred pounds higher.

The fact that the bearish report caused no general selling caused local traders to begin a buying and short covering movement. There also were indications that wheat and soybeans are being moved out of Chicago, making the supply situation tighter, particularly in beans.

Chicago Livestock
