Vets Neglect Payments on Lite Insurance

Despite its many advantages to the veteran, few national service life insurance policies are being the services, Hugh Rosson, director of the state veterans department, stated Wednesday.

A recent survey indicated that in Marion county only two out of 10 veterans are keeping this insurance paid up. Veterans' insurance experts pointed out that this insurance is cheaper than private insurance and can be borrowed on, up to 94 per cent of its cash value, after it has been converted and in force one year. Also, if a veteran becomes disabled for longer than six months this insurance remains in force

free of charge until his recovery. Recently lapsed insurance may be reinstated within six months after discharge or within three months after lapse, whichever is later, Rosson said, provided the veteran's physical condition is the same as when the insurance lapsed.

If the insurance has lapsed for a longer period it can be reinstated within an eight year period upon taking a physical examination and paying back premiums.

and Roberta Georgia Griswold, 19, waitress, both Salem.

Efficient Seeing

There are no great visual demands on children until they get to the third grade in school - - yet before that time the seeing that is learned has become a fixed habit of nerves and musscles. No wonder, as school study becomes heavier and the reading of reference books is almost continuous, we have such a tremendous increase of visual troubles all through school. Professional optometrists are doing splendid work in helping those children who have found the visual tasks of the school room too much for them. There are two separate problems --(1) the child who is a good student but who has sacrificed clear vision at distance to do it, and (2) the child with excellent distance vision who is unable to concentrate attention on its

If your child's behaviour should indicate either of the above conditions, it would be wise to consult your optometrist and have him make a thorough investigation of the child's visual condition.
