

COMPANY M WILL RECEIVE CUP FOR ATTENDANCE MARK

Eugene's Company M, machine gun company of the 180th Infantry, will receive a cup from General Riley at National Guard camp this year for having gone six straight years with 100 per cent attendance. The company will attempt to make this year's attendance ring the bell for the seventh year. Capt. James C. Koepke, a graduate of the U. S. Infantry school at Ft. Benning, Georgia, is in charge of the company.

Capt. Koepke will leave with his company Monday. He is in charge of the American Legion presentation of the Passion Pipe here June 23, 27, 28 and 29, and during his absence, Don MacDonald will handle his work. Koepke's machine gun company received a "very satisfactory" rating by the federal inspector at inspection held in March this year, and the Eugene machine gunners hope to win new laurels at this year's camp here is the list of officers and men who will go to camp:

- Captain—James C. Koepke.
- First lieutenant—Hoy H. Powell.
- Second lieutenant—Ray H. Collins.
- First sergeant—Olin V. Murray.
- Sergeants—Charles L. Carlson, Stillman K. George, Roy S. Morgan, Edmund F. Schaefer, Clark P. Struck, Elmer B. Thompson, Kenneth E. Weaver.
- Corporals—Carlyle W. Arey, LeRoy J. Christensen, Myer E. Hulegard, Reuben E. Klink, Tom C. Morgan, Gerold L. Murray, Paul E. Needham, Robert W. Stalon.
- Privates—First class—Robert E. Biele, Amos R. Brochall, Gordon Deeds, Albert Dietz, James V. Holmes, Harold B. Hulegard, Clifford J. McGrew, James W. Parker, Earl J. Peterson, James K. Taylor, Leonard J. Haultz, Edward C. Scott, Clarence L. Taylor.
- Privates—William C. Avery, Lawrence A. Baker, Ted D. Baxter, James P. Hoach, Emory E. Hyde, Robert J. Campbell, Charles C. Coleman, Sol A. Cuddeback, Evert L. Dickson, Carl E. Draper, James I. Draper, Harold M. Dunn, Veri O. Eagles, S. W. Ward, Guy W. Greene, John B. Guild.
- Clifford J. Hall, William C. Herrmann, Russell W. Humphreys, Eldon K. Hoach, Emory E. Hyde, Robert A. Johnson, Earl Irwin, Ralph R. McIntyre, Bill McKenzie, Gail H. Spurlock, Carlton D. Thom, Lawrence I. Tedder, Frank O. Ware, Edmund Weber, Wesley E. Whittaker.

NATIONAL GUARD TO STAGE SPECTACLE!

A section of the military review which precedes the thrilling sham battle of 3000 troops belonging to the Oregon National Guard, is shown in top photo. Center photo shows a portion of the infantry passing in review. Longer photo shows guardsmen enjoying the sports which are held daily at the encampment. More than 25,000 visitors witnessed the maneuvers last year, according to Major General George A. White who is preparing for a record crowd this year.

UNIVERSITY STATUS STORY

(CONTINUED FROM PAGE 1)

all advanced sciences to the college would make it pre-eminently a school dealing with "things" and by giving the university a monopoly of all liberal arts would make it pre-eminently a school dealing with "persons."

The following table of distributions illustrates:

Science—Pure science in upper and lower divisions and in research remains at university; applied science remains at college; survey would have moved all upper division science pure and applied and all research to the college.

Business—The board makes a vertical split; the university retains all major work in business administration as it refers to the broad principles of economics and world trade; the college retains degree granting courses in secretarial work and business methods such as typing, stenography, bookkeeping, the vocational aspects of business work; the survey would have moved all business, both general and applied, to the Eugene campus.

Journalism—The university is recognized as the major degree granting school, the state college being allowed to retain only service courses in journalism as it relates to technical work. This follows the survey precisely.

Arts—The university remains the degree granting school as suggested by the survey but the board declines to move industrial arts from the college. The university keeps architecture, the college landscape work.

Music—The university remains the degree granting school, but the board declines to reduce music work on the Corvallis campus as recommended by the survey because the region State will do teacher training on practically the present basis, each training in those fields where it is the major school, but a committee will be appointed to work with the president on adjusting details.

Physical education—Not settled, but under the general agreement on education, degree granting would be left on the university campus.

Home economics—On present basis with all degree granting major work at Corvallis, and only service courses at Eugene. Teacher training in home economics to be discontinued at normal schools and moved to Corvallis.

Policies Uniform—Here are additional recommendations:

Student fees—To be uniform in all schools.

Publicity and catalogues—To be issued directly through board, as recommended by survey.

High school recruiting—Forbidden as recommended by survey.

Admission of out-of-state students—uniform.

Marking systems—uniform.

Prerequisites—At Eugene and Corvallis—must be self-sustaining.

Out of an original educational budget of approximately \$6,500,000 from millage and tuition, for all institutions, there will now be left only about \$5,300,000.

In distributing these remaining funds, the decisions in allocating functions will have important bearing because the effort will be to see that major courses are financed.

Board Talks Budgets—Thus in home economics, which is allocated to the college the home economics work at the college will have preference for funds over the service courses which are given at Eugene for the benefit of women who have majored in other fields. In journalism which is allocated to the university the situation will be reversed.

According to the board members the effort will be to keep a functioning organization together in all fields whether major or minor, but where the situation really pushes the major courses will be given right-of-way in financing.

The board was still in session late Saturday evening and there was a possibility that it would sit through Sunday and Monday night, as the budget was straightened out so that the president can organize for next year's work, hire or fire professors, get their catalogues in shape and prepare to face the crisis.

Experiment Dealing—The only important point at which the board has refused to follow the survey is that touching the moving of science to Corvallis and commerce to Eugene, building one school on the principle of "things" and the other on the principle of "persons." Both presidents objected strenuously to this

DRIVER OF TRUCK WINS DAMAGE SUIT

(CONTINUED FROM PAGE 1)

After deliberating half an hour, a circuit court jury Saturday morning returned a verdict for Rufus Stonefield, defendant in a \$3500 damage suit brought by W. E. Dutcher and based on an accident in which a truckload of furniture was spilled to the sea at the outlet of Sutton creek near Hecla Beach in Lane county.

The furniture belonged to Dutcher, and was being hauled in Stonefield's truck from the Dutcher place several miles north of Florence to Switswome. When the truck reached Sutton creek, it was necessary to ford the creek and in going around a log the vehicle struck a hole and the furniture was dumped into the sea.

Dutcher alleged that the accident was due to Stonefield's negligence, and asserted that the loss of all the furniture and household effects damaged him to the extent of \$3500. Stonefield, in reply, asserted that Dutcher knew of the treacherousness of the beach travel when he employed Stonefield's truck and that all of the furniture was saved and only slightly damaged. He further asserted that he employed a derrick to get the truck out of the water and called for help from the U. S. coast guard, and that he lost more than Dutcher. The verdict awarded costs to the defendant.

ST. MARY'S HOLDS GRADUATION EVENT

Three hundred persons attended the commencement exercises for St. Mary's Catholic school today evening in the St. Mary's hall.

Rev. V. Mollenber of Portland delivered the address to the high school seniors. In his talk, Father Mollenber outlined the meaning of true education, insisting upon the true value of the soul as well as of the body. He encouraged the graduates to continue their pursuit of education.

Following is the list of graduates: Katherine M. Auld, Katherine P. Barr, Joseph G. Berger, Henry C. Gierke, Louis A. Naira, Lucille M. Nurre, Margaret E. Hedling, Evelyn R. Schaefer, Margaret L. Schaefer, Marjory A. Schaefer, Virgel E. Schmal, John E. Wellnitz.

St. Mary's orchestra of the high school played two numbers preceding the conferring of the diplomas, "The Harp of Delight" and "The Jubilate." The high school, Rev. D. P. Carley made the presentation to the graduates, while Rev. F. P. Leipzig, pastor of St. Mary's church, conferred the diplomas.

T. C. Keith Dies Saturday Evening

Truman C. Keith, who owned a grocery store and confectionery at Seventeenth and Charnelton streets, died Saturday evening at his home at 1626 Lincoln street. He was 54 years of age.

Mr. Keith was born in Canada, February 13, 1877. On October 12, 1908, he was married in Bowden, Alberta. In 1910 he and Mrs. Keith moved to Eugene. In 1914 they went to Idaho and in 1920 returned to Eugene.

He is survived by his widow, Mrs. Margaret Keith, and three children, Margaret, Helen and Eugene, all at home. Mr. Keith was a member of the Baptist church and of the Masonic lodge at Grangeville, Idaho.

Six Million Silver Dollars to Be Moved

NEW ORLEANS.—(AP)—More than six million silver dollars will be moved from the old United States Mint to the Customs house here, preparatory to renovating the mint for a federal prison.

Hold-up men, however, would have a difficult time getting away with it even if the transfer were unprotected. The silver is held in 6,875 sacks, with one thousand dollars in each sack. And each sack weighs 64 pounds.

FLU FIRE REPORTED

A flu fire at Irvin and Irwin, cleaners' establishment at 643 Thirteenth avenue east, called the fire truck out about 11 o'clock Saturday night. No damage was caused by the blaze.

HEALTH REPORT OF EUGENE SCHOOLS IS GIVEN FOR YEAR

A comprehensive report of the health work in the Eugene schools during the past year has been made by Mrs. Dorothy M. Brown, health supervisor in the schools, and submitted to H. R. Goold, city superintendent.

The Oregon school law requires that all children in the first eight grades be given an annual health inspection and Mrs. Brown reports the number of pupils inspected as being 1820, the number being excused from inspection being 57, at the request of their parents. The number found without defects was 922 and the number with defects 898. Mrs. Brown reports: "The number who were 10 per cent under weight was 191 and number of pupils with defective eyesight was 218, while those with defective hearing numbered 116 and mouth breathers numbered 99. The report shows that 551 had defective teeth, the number vaccinated was 871 and the number with defects known to have been corrected was 923.

Milk lunches were given throughout the year to those children who wanted and needed milk, the report states, and children either brought their own from home or it was ordered directly from the dairy at school. Only grade pasteurized milk was served. The Kindergarten milk this year to an average of 36 pupils per month.

The Eugene dentists of the South Willamette Dental society again this year gave an hour of their time for the annual inspection of the school children. A survey of dental inspection made by the dentists for 1931 with comparative reports for 1930 and 1929 follows:

1756—Number of pupils examined, 1756; number without defects, 312; number with defects, 1444; number requiring immediate attention, 315; number requiring dental service, 1030; number requiring orthodontia, 234; number who had defects corrected, 340.

1930—Number examined, 1572; number without defects, 230; number with defects, 1258; number who had defects corrected, 837.

1929—Number examined, 1623; number without defects, 281; number with defects, 1342; number who had defects corrected, 705.

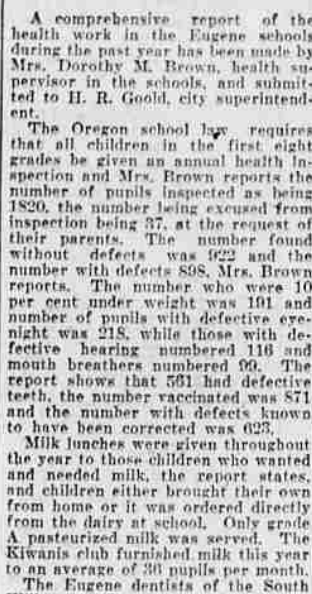

Tuberculin tests by the members of the Lane county health unit were given to 350 students of the Edison and Condon grade schools, Roosevelt Junior high school and Eugene high school. Seventy-five of these pupils showed a reaction, indication of the presence of tubercular bacillus in the system but not necessarily active tuberculosis, the report says.

Clinics for immunization against diphtheria and smallpox were held and toxoid was given this year instead of toxin-antitoxin. Sick tests were given to 224 children this spring.

Rose Ribbon health club members were reported in the grade schools as follows: Whiteaker, 127 enrolled, 28 members; Geary, 272 enrolled, 21 members; Lincoln, 264 enrolled, 41 members; Willard, 415 enrolled, 39 members; Washington, 109 enrolled, 30 members; Condon, 214 enrolled, 28 members; Edison, 264 enrolled, 89 members.

Recommendations for next year are given in Mrs. Brown's report as follows: Considered in at least the first, fifth and seventh grades and for all athletes in junior high as well as the high school; more classes in first aid; a class in each building at the beginning of the year for teachers to show the use of the common first aid materials provided; more correlation of health education with other subjects.

"THRILL-SLAYER" SEIZED!

Pictured above is the end of a six-year search for Philip Knapp, former Cornell University student and member of a prominent Syracuse family, who has confessed that he committed a murder "just for the thrill." Knapp, shown in custody of officers who seized him at his West Orange, N. J., home, had married and lived unmolested under the name of Allen K. Phillips. Shortly after he deserted the army in 1925, leaving a note indicating he had considered the "supreme thrill" of taking a human life, the body of his victim, Louis Panella, a taxi driver, was found.

SEATTLE MEN PUSH PARK DEVELOPMENT

Extensive development which represents an investment of several hundred dollars is being pushed by E. Boeholt and K. Boeholt, Seattle men, proprietors of the Willamette park. This park lies under and beside the overhead crossing three miles east of Eugene, extending along the base of the Willamette river.

The Cables have been flung across the Willamette at this point for a "shoot," a new thrill apparatus which will carry passengers in a little car across the river through the air. The shoot will depend on gravity to propel the car, cables being strung in both directions.

Diving boards and other apparatus are being installed for swimming in the river at that point. This is an old swimming hole popular with Eugene and Springfield kids in earlier days.

A dance hall, said to be the best constructed on the coast, has been constructed by the Boeholt brothers. It is 70 x 110 feet in dimensions, with windows completely surrounding the smooth maple floor.

HE SIMPLY ASKED FOR BARE FACTS

GRAND FORKS, B. C., June 6.—(AP)—Census enumerators' difficulties are numerous—and varied.

Approximately 80 other Doukhobors—some of freedom—fully clad, gathered round, while he attempted for an hour to elicit information, futilely. He contacted the group, reported to the census commissioner, and is awaiting further instructions before returning to North Forks.

WILLYS SIX sets 5 more records!

Under official A. A. A. supervision, a strictly stock Willys Six Roadster sweeps dramatically to five amazing new speed records for American stock cars in its class—one mile, flying start, 50.925 seconds, average 70.692 miles an hour; standing start, 61.56 seconds, average 58.479 miles an hour; one kilo, flying start, 32.225 seconds, average 69.416 miles an hour; standing start, 42.17 seconds, average 53.045 miles an hour; one mile, flying start, second gear, 66.90 seconds, average 53.812 miles an hour. The gear ratio used in these record-breaking runs was 4.6 to 1.

Indian Acquitted in Seattle Case

SEATTLE, June 6.—(AP)—A federal court jury today acquitted Hugh Smith, young Neah Bay Indian, of a charge of criminal assault on a white woman, Mrs. James Gould, in his second trial. The first trial, in October, 1929, resulted in his conviction and imposition of the death sentence.

Handclapping and cheers from his tribesmen greeted the verdict. On the order of Federal Judge George M. Bourquin, before whom Smith had previously been found guilty, they were silenced.

Klamath Suspect Is Held For Jury

KLAMATH FALLS, Ore., June 6.—(AP)—N. J. Smith, 35, charged with the first degree murder of his 22-year-old wife, Leanna Smith, was bound over to the grand jury today after a preliminary hearing.

Mr. Smith was shot to death with a shotgun at Fort Klamath on May 31 after the two had argued over her attendance at a dance. Smith declared she was shot accidentally while the two were in possession of a shotgun after she threatened to kill herself.

CONSUMPTION OF CITY WATER GOES ABOVE ALL RECORDS

Sixty-one per cent more water was pumped into the city reservoirs during the month of May this year than has ever before been handled during that month in any year, according to A. McClain, superintendent of the water board. The increase is due to the unusually dry weather that has prevailed during the spring, causing a great deal more irrigation water than the past month or so.

CITY HALL ROOF STORY

since then several large cracks have appeared in the brick wall on the south side of the building. The largest one was discovered Friday afternoon in the southeast corner of the firemen's quarters. Here the bricks have spread apart fully an inch through the entire wall and daylight can easily be seen through the crack. The firemen first discovered that some of the plaster in their wash room had fallen to the floor and then found the large crack in the brick wall.

After this discovery several of the firemen who had been sleeping in that end of the building moved their beds to the lounge room in the front end, fearing that the wall might collapse during the night.

Mayor H. E. Wilder, City Recorder R. S. Bryson and Councilman Percy Edwards accompanied Inspector Thomas on his tour of examination. The question will come up at the meeting of the city council Monday night when it is expected that a report of the inspector will be made.

To properly strengthen the building will require the expenditure of several thousand dollars, it is believed by a number of the city officials. Definite action of some kind is expected to be taken immediately by the council.

Herbert J. Cox, secretary of the Willamette Lumbermen's association, says he agrees with Inspector Thomas that the construction of the upper part of the addition was faulty and further states that the straightening and strengthening of the truss will not be very expensive. In a statement in defense of lumber construction Mr. Cox says:

"An investigation conducted by this office and by local lumbermen, engineers and architects discloses the fact that this weakening is the result of faulty construction."

"That portion of the structure now occupied by the fire department is in addition to the original building and at the time it was built the wood trusses were not properly braced or properly fitted into the old structure."

"It is evident that your articles as written and published will create the impression in the mind of the average layman that the present weakened condition of the west addition to the city hall is due to failure of wood, whereas it is due to faulty construction."

BORAH DEMANDS CUT FOR GERMAN DEBT

WASHINGTON, June 6.—(AP)—Germany's declaration of inability to meet her reparations payments today drew close attention of the administration and a demand from Chairman Borah of the senate foreign relations committee for a cut in the German war burden.

Senator Borah assailed heavy armaments of the other European nations and blamed them in part for the European depression and Germany's financial straits. He declared the armaments violated the Versailles treaty.

Significance was added to Borah's pronouncement in view of his recent conference on the European situation with President Hoover and Secretary Stimson.

While the administration maintained silence on the new European developments, Secretary Stimson declared Hoover recently called upon the foreign powers to reduce their armaments. He was speaking before the international chamber of commerce.
