It's as though the tobaccos were "welded" together....

"CROSS-BLENDING" means much more than just mixing tobaccos together.

It "welds" together different kinds of the several varieties of tobacco... many types of Bright tobacco, a great many types of Burley tobacco and numerous grades of Turkish tobacco.

THIS "WELDING" TOGETHER—of Cross-Blending—permits every kind of tobacco used in the Chesterfield blend to partake of the best qualities of every other type. Each tobacco is thus made to yield its finest flavors.

CROSS-BLENDING takes all these pleasing flavors and aromas and combines them into one—the Chesterfield taste. And we think you will agree that it is a far better taste... worth all the extra care that Chesterfield takes to get it.

EVERYTHING that money can buy and that science knows about is done to make CHESTERFIELD milder and taste better.
