VENETA FIRE STORY

VENETA FIRE STORY
(Continued from page 1)
mill adjoining the Matlock millite,
took charge of his own fire-fighting
apparatus and used dynamite to blast
away a portion of his docks to create
a gap between the blazing Matlock
docks and his own property. However,
the wind was blowing the other way
and that had a great deal to do with
saving his property.

The state police force from Eugene
and a crew of men from the Mountain
States Power company responded to
calls, the police officers patrolling the
roads, which were congested with
cars, and the power company men
looking after the company's wires and
protecting property on the streets of
the town. All lines where possible
trouble might occur from the wires,
were disconnected. The S. P. section
crew here fought hard and saved the
company's tool house and other prop-
erty located across the tracks from
the mill.

Machinery Sold
The machinery in the mill had been
bought at bankrupt sale by Roy
Swenson of Veneta, who had removed
it all except the planer. It is under-
stood that the lumber in the yards
had also been sold and the money for
it is in the receiver's hands. So there
will be no direct loss to the men who
formerly worked in the mill and who
had claims against the concern.

Section Foreman Duman of the
Southern Pacific company this morn-
ing stated that the fire destroyed
about 250 ties and several lengths of
rails on the siding were badly warped.
The crew was engaged in making
repairs today.

W. C. Crone reported that the
extent of his loss was about half a
carload of ties and a small quantity
of lumber.

The blaze attracted persons to the
scene from many different points miles
around and quite a number of Eugene
people, up late at parties, drove out
to see it.

Veneta's Worst Blaze
This was the first fire in the history
of Veneta and the people of the
village, realizing that practically every
store building and every home was
endangered, worked like Trojans in
preventing the spread of the flames.
They gave a great sigh of relief when
a breeze came up from the southwest
and blew the flames the other way.
When the fire broke out there was
hardly a breeze stirring.

The Matlock mill was built in 1924
and was closed down three months
ago after having been operated almost
steadily all that time. The plant when
operated gave employment to more
than 100 men including those in the
logging camps.

Father Shoots Son;
Sought By Police
COLORADO SPRINGS, Colo., Aug.
10.—(P)—George A. Thomas, 66-
year-old pioneer of the Pikea peak
region, shot and killed his eldest son,
Harry Thomas, 41, as they stood in
the back yard of their home here
last night. The father fled and was
sought by police.

The shooting was witnessed by
Mrs. Julia Thomas, 74-year-old wife
of George Thomas, and a granddaugh-
ter, Gladys, 16.
The men quarreled after the father
had asked his son to sell some bonds
in a building and loan association,

PORTLAND, Ore., Aug. 10.—(P)—
Eddie (Speck) Morris and Melvin
Bergesen were captured in front of
an open safe in a suburban pharmacy
early today when two radio equipped
police cars carrying six officers con-
verged on the scene after a street car

Wheat Sale Boycott
Started at Dallas
THE DALLAS, Ore., Aug. 10.—
A movement to withhold all wheat
grain from the market until the price
has advanced to at least 15 cents
bushel above the present level, was
inaugurated here Tuesday by the
Wasco County Wheat Growers' as-
sociation. The plan is in line with
"seller's strike" recently instituted by
the Midwest.
Warehouses here say they already
have received more than 30,000 bush-
els of new crop wheat. The associa-
tion said banks are encouraging the
holding policy by not calling on reser-
ves to sell to meet current require-
ments.

Count Helffer, commander of the
Elin and Brandenburg group of the
Hitler militia issued a manifesto to
the brown shirts revealing that they
were engaged in "military athletic ex-
ercises." He warned the militia against
illegal moves, saying:
"We know that some of the com-
rades of the storm detachments are
nervous but we must prove that the
storm detachments are disciplined and
firmly in the grip of their leaders."
The manifesto was widely inter-
preted as a sign that Nazi extremists
were planning violent action.

Now Is The Time To Advertise....
Commodity prices are on the up-grade. (Cotton, corn, wheat, hogs,
cattle, sugar, etc.)
Stocks are going up.
Bonds are going up.
Gold is flowing back.
Federal loans are shaping into realization.
Manufacturers, jobbers and retailers will soon be raising prices.
There will be fluctuations, of course. But the nation's business and
economic analysts chart an upward trend. There'll be setbacks in the
upward rise, but according to present indications the upward trend
will be gradual; slow but sure..... the crisis of the depression has
passed. Now, while the lowest prices in years are effective, is the
time to advertise.
