YOUR CHILDREN

By OLIVE ROBERTS BARTON
Children and teenagers seem to be everywhere these days. They are everywhere, in the streets, in the parks, in the stores, in the homes.

YOUR CHILDREN

Many things have been discovered about children in this score during the last few months, but babies under the age of five are coming through the most modern of specialists still not upon having upsets of various kinds when teeth are coming through.

YOUR CHILDREN

It is to be expected. Swollen and sore gums hurt. When anything hurts, we feel the strain. And when we are tired, either in a baby or a grown-up, we are more likely to be affected.

YOUR CHILDREN

Too many illnesses among babies are attributed to teeth. However, it is better not to do too much. Let the baby take too much for granted. Never let an upset stomach loose bowels go on without seeing a doctor or getting dependable medical advice. Please let me emphasize this. It may mean the life of your child.

YOUR CHILDREN

Need Patient Care
But if it is teeth, be patient. If a baby is teething, be patient. If a baby is teething, be patient. If a baby is teething, be patient.
