

SPECIFICATIONS OF SIUSLAW JOB HERE

Specifications and blue prints of construction and surfacing of the Siuslaw highway between Blachy and Florence were received by the county court Tuesday from the bureau of public roads. This winter the highway is expected to be completed into Mapleton and a rock contract for this section is expected to be let soon. Work will start on the east end of the project.

According to the specification sheet, 26,233 cubic yards of earth will be excavated to grading. There are 59,000 tons of gravel and 21,270 tons of supplemental rock to be put on the road.

Further details will be received from Portland or Salem in a few days. The county has started work getting right of way for the eight-mile section of the Willamette highway east of Oakridge. County Commissioner O. E. Crowe and County Surveyor P. M. Morse went to Oakridge Tuesday on this job. Clearing will be done this winter.
