BLOW-OUT PROOF*

RIVERSIDE TIRES

Blowout Proof because of an extra patented process:

LATEX WELDED CORDS

(100% PURE LIQUID RUBBER)

which prevent Cord Separation... the cause of blowouts

Blistering heat develops inside your tire every time you drive your car 35 miles an hour or faster! Heat so terrific that in many tires it causes cords to separate. It weakens the tire from within, causing blisters you can't see. You hit a rock or a bump. Suddenly—BANG—a blowout! It may come today, tomorrow, any minute! A blowout that can send your car hurtling off the road! The lives of your family are at stake!

Riverside tires are built to prevent blowouts! Riverside's Cords—the heart of the tire—are made from extra strong, long staple, premium cotton. Every cord in every ply is dipped in LATEX—100% pure, liquid, virgin rubber. This welds the cords into a super strong unit! It gives Riversides the strongest tire carcass made! It prevents cord separation—the cause of blowouts!

Why We Save You Money

Of course Riversides are made in one of America's largest and best tire factories. BUT—they come direct to us—minus the manufacturer's selling and general overhead expense. That's a saving. The second saving comes from Wards low cost method of distribution. These two reasons explain why we sell high quality tires for less. It's simple to figure out for yourself why Riversides are better in quality, mileage, and safety than any other tire at the same price.

***RIVERSIDE TIRES**
 will not blow out under normal road conditions during the life of the tread if they are kept properly inflated in accordance with the specified air pressures.

Wards Unlimited Guarantee
 For your protection every single Riverside tire is guaranteed by Wards to give service that is satisfactory to you. No time limit! No mileage limit! A tire has to be extra good—has to be extra safe to be backed by the strongest tire guarantee ever written!

Cord Separation
 This shows cords that have been separated by heat inside the tire. Cord separation causes internal blisters and weakens the tire. A blowout is the result!

Latex Dipping
 By an extra process, every cord in every ply in all Riverside tires is dipped in Latex. This welds the cords into a super strong unit that defies cord separation and blowouts!

Save with Safety on RIVERSIDES one of America's finest Tires Prices as low as
