YOUR CHILD May Have WORMS!

Most mothers believe their children quite safe from Round-Worms because of the extreme care with which they clean all foods. Yet as many as 50 out of 190 children in some schools had worms, said U. S. Government experts who examined over 2,000 children in various schools. (Govt. Bulletin No. 190).
There is no sure way to guard your child against this disgusting condition. Not only fruits and vegetables, but flies, water, pets and playgrounds are sources of infection. Prevention is almost impossible.
If your little ones are delicate, sickly, losing weight, slow in school; if they sleep badly, tich, fidget and won't eat—don't scold or force them to eat. Their puny strength is likely being sapped, their weight reduced, growth stunted and minds dulled by these invisible worms, which multiply with amazing speed.
As soon as the worms have been expelled by Jayne's Vermifuge the child should begin to gain weight, strength and vigor at once. Millions of mothers are grateful for this remedy: a doctor's prescription famous for 104 years. 36 million bottles have been used by wise, careful mothers to bring up sturdy, happy, healthy, wiry youngsters. Dr. Jayne's famous guaranteed Vermifuge and Tonics can be had at any drug store.
