ANGELS ROUT REDS TO LEAD 9 GAMES

By United Press
Headed straight for a second pennant, the Los Angeles Angels held a nine-game lead in the Pacific Coast league today after putting their closest rivals, the Mission Reds, to rout in their series last week.

The Angels won six games of the Reds, clinching the complete downfall of the second-place club by taking both ends of Sunday's double-header. Hollywood took a series from the San Francisco Seals, four games to three, by dividing yesterday's twin bill. Sacramento won its series from Seattle by the same margin and Oakland took five out of seven from the Portland Beavers, cellar occupants.

A five-run rally that routed Lloyd Johnson, Missions southpaw, gave the league-leaders the first game yesterday by 7-5. In the second game, Dick Ward, leading pitcher of the circuit last year, made his 1934 debut and scored a 7-4 victory for the Angels. Ward was returned to the champions on option from the Chicago Cubs.

Hollywood and the Seals battled 12 innings in the first game, the Seals finally winning out, 3 to 2. The Stars came back in the wind-up to score a 6-4 victory.

Wes Willie Ludolph, Oakland ace, gave Portland only six hits to start the double bill with a 4-1 Oakland victory. The second game went eight innings before the Oaks registered the deciding run 6-5.

Free hitting marked the first game between Seattle and Sacramento. The Senators won out by 10-7. In the wind-up, Craighead, Seattle pitcher, gave five hits to win, 3-1.

PRICES ON CHEESE SHOW FIRMER TONE

PORTLAND, May 21.—(AP)—Advancing tendency in cheese prices continued the main factor in the trade survey of The Journal. Higher prices were generally forecast in the eastern markets, both exchanges at Plymouth advancing 1/2c lb. for the late season with a rather keen demand for all offerings.

Rather strong trading tone was showing for eggs here but without price changes. Receipts continued to decrease while demand was well maintained at all coast points. Demand for live chickens of all

sorts was good despite the renewed attempt on the produce exchange to force a lower price in some lines. There was an actual shortage in the lines suggested for lower prices.

Strawberry prices were firm with a short supply comparable with demand. Local shipping call was good. Quality was generally good.

Market for green peas has started climbing here with demand somewhat in excess of supply for the week's opening. Sales were made by jobbers to 4 1/2-5c lb.

For the week's opening there was no change in values on country killed meats. Veal joined other commodities in showing at least a steady tone at late prevailing prices.

A well held deal was showing for asparagus with late advanced prices generally maintained.

Tomatoes in large supply and only best stuff held steady.

Positive Relief From Earwigs

DIAMOND L BRAND Ant and Earwig Powder absolutely kills Earwigs. Earwigs do not object to walking into the powder when it is spread lightly. It sticks to their feet and when they lick it off, the chemical sets up an irritation in their internal organs which results in their death. Not dangerous to birds. Enough for average city lot, \$1.

"Vitamin D" Bread will help Nature build strong bones, sound teeth, straight legs

Of course you've heard of vitamins—those vital nutritional elements in food. No one knows the exact composition of vitamins—but scientists know what they do.

If Vitamin D, for instance, is absent from a baby's diet, his bones and teeth will develop poorly, his legs probably be bowed. Add Vitamin D to the baby's diet, and the condition will be corrected.

Unfortunately, Vitamin D is most meager in everyday foods. One of its richest sources is cod liver oil.

Now—as a result of an important discovery in the laboratories of Columbia University—the Vitamin D can be extracted directly from pure cod liver oil and incorporated in bread. It is our privilege.

Both in Orange Wrapper—Both weigh one pound—Both have same nutritional value. Same price.

The Lighter, Fluffy Type Loaf The Compact, Creamy Looking Loaf

Vitamin B, which is also added to this loaf, is found to materially benefit poor appetite and digestion. Experiments have proved that the growth and appetite creating properties are not destroyed in baking.
