"I Always Feel Safer in a Ford"

ALL-STEEL BODY AND SAFETY GLASS—The strength of steel protects you when you ride in a Ford V-8.

Around you is an all-steel body, electrically welded into one piece.

Beneath your feet is a rigid, X-type steel frame.

Out in front of you and behind you are strong steel axles, triangularly braced by steel radius-rods and supported by a steel torque tube.

You ride upon steel-spoke wheels, also elec- trically welded into one piece. The windshield before your eyes is safety glass. (All Ford V-8 De Luxe closed cars are equipped throughout with safety glass at no additional cost.)

Another reason why you feel safer in a Ford V-8 is something that makes every driver a better driver . . . ease of handling. There is always less strain and less likelihood of tight situations when you drive an alert, obedient car.

The Ford V-8 gives you an extra margin of safety because of its quick acceleration, eight-cylinder speed and power, ease of steering, stability on curves and rough roads, and powerful, oversize brakes.
