Fashion Showings—Home Frocks

Edited by LAURA I. BALDY, A. M. For Many Years Assistant Professor of Household Arts, Teachers College, Columbia University, New York.

Here is a charming home frock, suitable for all ages. The straight lines are neat and youthful. The wrap-over effect will make the figure look tall and slender. The neck and sleeve trills are a flattering trim. However, if you prefer a dress without trills, colorful bias binds may be substituted and make an exceedingly smart finish. The two decorative pockets will also be found very useful. And last, but not least—your sleeve troubles ended! This clever sleeve cuts all in one to the shoulder. Red and white percale print, red binds and white lawn trills, make the model sketched. It may also be worn as smock or "cover-all."

grade or ground line and must be protected from above so that no water can get in behind it.

Special finish for cement stucco and the proper methods of painting and decorating will be given at this time.

Q: Will two coats of paint on new work be satisfactory or should we use three coats to get a good job?

A: To insure satisfactory results three coats of paint should be applied to all surfaces that have not been previously painted. A penetrating priming coat, a semi-gloss body coat and a glossy elastic finishing coat.

Two coats are sufficient for previously painted surfaces where the old finish is in reasonably good condition. The use of two coats on new work is not recommended. In most cases, the dry, porous surface will not be satisfied with sufficient oil if one coat is omitted. This may lead to such defects as spotting, fading and excessive chalking. If one tries to put too much oil in the paint and save cost it may result in a short-lived, poor drying, tacky job.
