

### DEMAREST WARNS AGAINST DROPPING CODE FOR LUMBER

PORTLAND, Oct. 20.—(AP)—Removal of the cost price code from the lumber code would result in a loss of \$2,000,000 to northwest lumbermen every month, E. Q. Demarest, Tacoma, president of the West Coast Lumbermen's association, warned today.

Demarest, a member of the lumber code authority board, returned yesterday after spending six weeks attending code and lumbermen's conferences in eastern cities.

"There has been much confusion over lumber code prices, due to numerous causes, such as misstatements coming out of Washington and slowness of the NRA and administrative bodies in organizing enforcement department," Demarest said.

"With the recent reorganization of NRA this confusion seems to have been eliminated and they have undertaken a program of vigorous compliance enforcement. A number of definite steps in the direction of compliance enforcement have been taken.

"It would now seem that some of the mills who were asking for elimination of price provisions would rescind their action, because the main reason for their request was lack of compliance and lack of enforcement."

Demarest expressed fear that abandonment of the price protection clause would endanger minimum wage schedules and increase the financial difficulties of many mills in the northwest.

### Cottage Grove Man Has Odd Experience With His Gold Ring

COTTAGE GROVE, Oct. 20.—(Special)—To lose a gold ring three times within a few years, once in the Umpqua river, and still to be wearing it is the unusual experience of H. W. Mason. Each time J. T. Smith took a part in finding the ring.

The first time it was lost it was found after a considerable time in the basement of the J. T. Smith home. Mason had thrown in and piled some wood for Mr. Smith, using a pair of Mr. Smith's gloves. When Mr. Smith wished to use the gloves, he found the ring inside. The next time the ring became lost in the same manner and was found by the same person, Mason and Mr. Smith went to Winchester bay on a fishing trip, taking a load of wood to the Smith cabin at Scottsburg, where Mason again used a pair of Smith's gloves, which were thrown back into the truck. When Winchester bay was reached, Smith picked up the gloves and the ring dropped out.

Recently Mason was doing some carpenter work for Mervile Veatch at the Veatch cabin at Scottsburg and was working on a float in the river when he felt the ring fall from his finger. It dropped into 10 or 12 feet of water. The next morning, when the water was still, Mason was able to locate the ring lying in an upright position on the bottom of the river. Mr. Smith was again present and suggested that by use of a three-prong hook he might be able to pick up the ring. The first attempt was successful. The ring is one that was cast from gold of a ring owned by Mr. Mason, combined with gold in a ring given him by an aunt, and he values it highly.
