

SEWER CLEANING PROJECT FAVORED BY CITY COUNCIL

WHAT THE COUNCIL DID

APPROVED sewer cleaning project.
CONSIDERED proposal to curb bicycle thefts.
RECEIVED bid on wrecking Gaylord property.
APPROVED Walters-Bushong building on present site.
AUTHORIZED park committee to erect signs in park.

Approval of an S.E.R.A. project to clean Eugene city sewers was voted by the city council at its regular meeting in city hall Monday night. The council agreed to pay workmen's compensation expenses and buy some material in connection with the project.

The project will entail expenditure of approximately \$4,000 in labor and will be of material benefit to the city in providing more adequate sewage disposal, it was pointed out.

The council was approached on a proposition to allow a bicycle race from Springfield to Eugene, the race ending at the McDonald theater in connection with a picture coming to the theater soon. The matter was referred to the police committee.

Another bicycle proposition was placed before the council by Crosby Owens, local insurance man, who suggested the city institute a plan of fingerprinting owners of bicycles and issuing a card showing the prints and a description of the bicycle. This plan, used effectively elsewhere, tends to curb bicycle thieving, Owens said. He offered to stand the cost of printing the cards, doing the filing and stenographic work in return for having the name of his insurance company printed on the cards. The matter was referred to the police committee.

As only one bid was received on the contract to demolish the Gaylord property on north Willamette street, the matter was referred to the building inspector and the street committee to check the bid. Robert Johnston and Edward Larsen entered the bid of \$125.

N. R. Gaylord, owner of the condemned property, entered a protest against the city or anyone else trespassing on his property. The city council passed an ordinance authorizing the raising of the property after

a hearing. Costs of the work will be assessed against the property.
The judiciary committee reported on the protest filed against the Walters-Bushong Lumber company rebuilding at its present site. This protest, filed with the council by citizens at the last meeting was referred to this committee for a report. The committee declared the company was justified in rebuilding on the present site so long as the building code was complied with and so long as the sidewalk was not obstructed.

Some time ago a bond house in the east reported that through a mistake in their records, the city of Klamath Falls had been billed for bond coupon payments totaling \$125 which should have been billed to the city of Eugene. As Klamath Falls had paid the bill, the city council voted to reimburse the Klamath city for the money it paid.

The police committee, to which was referred a request for some sort of protection for the blind in city traffic, reported it has no recommendations in this line to make.

Dr. George Simon, chairman of the police committee, reported that complaints had been made that transients arriving on late trains were refused admittance to the transient relief headquarters back of Skinner butte. The protest was referred to Dr. Simon and the chief of police to work out a solution.

A surplus of \$13,195.75 has been shown in the city general fund for the first nine months of 1934, it was reported.

A petition of Edward Dugan to open a wood lot at 1201 Willamette was denied following objections of nearby property owners. Godlove the lumber was awarded a contract for \$108 for new plumbing at the city rest cottage in the courthouse park.

SALVATION ARMY STORY

(CONTINUED FROM PAGE 5)

to the mobilization group. "The president of our country has assumed the key-note. We need all of the splendid service which has been and can be given by the Salvation Army and kindred organizations. The governmental relief program is instituted to support the normal relief functions of our country and therefore we must as private citizens contribute to the worthy charities of our city for the sake of our neighbors who need this service."

"Every citizen of Lane county, young and old, has a responsibility to discharge in the 'human need' mobilization campaign, and I am making this appeal to the community at large on behalf of the thousands of people who have been benefited by the Salvation Army in the past, and who will need it in the future," he continued.

Dean Morse declared that the Salvation Army in Eugene has given relief in more than nine thousand instances during the last 22 months. In addition to this fact, the Army has provided "hospitalization" to many unfortunate girls from this community, statistics being available at the mobilization headquarters, 731 Willamette.

"The hospitalization service alone, to Eugene girls and their babies, based on a cost per day's care as low as \$1 would nearly approximate the entire Salvation Army budget for the coming year," he said. "This is a challenge to the fairness of our people. We have had this service now let us give to this organization so that service of this kind may be continued."

A rally has been announced for Thursday morning at the Osborn hotel when committees will report the amounts raised to date.

LUMBER PROTEST STORY

CONTINUED FROM PAGE 1

under the ruling of the national code authority. However as it was pointed out by Col. W. B. Greeley here at the recent lumber meeting, if mills of this area lodge formal protest against the ruling, it may be possible to secure some adjustment in favor of smaller mills.

It is in the hope of some compromise on the allocation method that the local committee went to Seattle Tuesday. The committee is headed by T. V. Larsen, president of the local lumbermen's association, and consists of Charles Ingman, J. S. Magludry, Waldo Holmes, Edwin Keach and Chester Vincent.

Following action of the Lane county chamber in backing the protest of the local lumbermen, O. E. Crowe, president of the chamber, and Howard S. Merriam, Austin Dodds and O. V. Breeze, a special committee from the chamber, forwarded a telegram expressing the chamber's support of the lumbermen's protest to present to the production committee in Seattle. Following is the telegram:

Chamber Sends Protest
"We, the Lane county chamber of commerce strongly protest the method of allocation of working hours for this quarter, for the lumber industry, which is a direct violation of the agreement entered into. Continued violation of this agreement means destruction of the lumber industry of Lane county. Present allocation means increase of thousands on relief rolls. This body consisting of the Eugene, Cottage Grove, Springfield, Oakridge, Junction City and Florence chambers of commerce heartily endorse action of Willamette Valley Lumbermen's association in protesting present allocation of working hours, and will continue to protest the unfair discrimination against the major industry of Lane county."

The Eugene water board, in a special meeting Monday night, again deferred action on the matter of donating free water for the purpose of maintaining the city court house park, pending further conferences with the city council, chamber park committee and the county court.

Some satisfactory arrangement whereby water will be available for improvement work and maintenance will be worked out in the near future, according to J. W. McArthur, superintendent of Eugene public utilities.

PACIFIC STORM STORY

(CONTINUED FROM PAGE 1)

better weather conditions, and service from Seattle was delayed. Reports from Ariel, Wash., said five inches of rain had fallen there from 8 a. m. Saturday to 8 a. m. today. Gold Beach, on the Oregon coast, had more than three inches of rain during the week-end. Waldport, also on the coast had the highest water in 20 years as ocean swells rolled onto the beach. About 500 feet of trestle work was lost on the south jetty at the mouth of the Columbia river.

Tanker in Distress
SAN FRANCISCO, Oct. 23.—(AP)—Helpless and beaten before the fury of a Pacific tropic typhoon, the oil tanker Larry Doherty with 40 men aboard flashed an SOS 900 miles east of the Philippines today.

Her bridge and steering gear were gone, her radio was silenced soon after the first flash for aid, and the nearest help was about 700 miles away—three days.

The steamer Olympic, bound out from Tacoma, Wash., 200 miles east of the Philippines and the nearest steamer, picked up the SOS and put about under full steam, but it can make only 10

knots, which would take nearly three days for it to reach the scene.

FOREST LINES OUT

All telephone lines to the Tillamook section of the Siuslaw national forest were still out of commission Tuesday on account of the storm, according to R. S. Shelley, supervisor of the forest, but messages were coming through from Waldport and Mapleton.

The storm was not as severe at the two latter places as it was in the Tillamook district and the damage done was comparatively light. Trees fell across the wires in several places but repairs have been made and service is practically normal south of Tillamook, the supervisor said.

ARMISTICE STORY

alleged assault by the latter upon the girl's father, Perry Campbell, was returned yesterday by officers who had located her at Bend, Norton, against whom an assault and battery charge was filed, had not been located. The girl said she left with Norton because she did not want to remain at home after the fight. They had stayed with Norton's relatives in Bend.

GENERAL

SAN FRANCISCO, Oct. 23.—(AP)—Dr. Louis Bloch, secretary of the national longshoremen's board, announced today that balloting among seamen in Pacific coast ports to determine their representatives in collective bargaining has ended officially. Bloch said it will take at least a week to assemble and check the ballots.

WASHINGTON, Oct. 23.—(AP)—Eugene R. Black, "contact man" between the administration and the banks, said today he would make a Pacific coast tour soon to "sell" the administration to the banks in that region. Among the cities which Black probably will visit are San Francisco, Los Angeles, Seattle, Tacoma, San Diego and Portland.

STRATOSPHERE STORY

(CONTINUED FROM PAGE 1)

was keenly disappointed at what she termed "a mess."
"Oh, dear, I wanted to land on the White House lawn," were her first words to the United Press correspondent who trailed the gondola to the woods. She referred to an earlier remark that she would like to land at Washington.

Although the bag was ripped in half a dozen places, the gondola and the valuable instruments housed in its interior were not believed to have been damaged.

The Picardis apparently were not in great danger at any time, although the balloon descended very rapidly.

Start Is Bumpy
The heavy ropes by which the gondola and the bag were attached were tangled in the trees of the hillside gully into which the balloon fell.

A dozen neighborhood youths, attracted to the scene, were pressed into service to gather up the valuable scientific paraphernalia of the flight. Prof. Picardis busied himself with the task of freeing the tangle of the ropes from the brush.

His wife described the flight briefly. "I think we made some very valuable calibrations during the flight," she said.

"I was a little nervous at the take-off for it was very bumpy. But when we got into the upper air it became very calm, so calm in fact that we hardly seemed to be moving."

"When we were above the ceiling, the sun expanded the bag and gave us altitude. Over Ohio we were only about 2,000 feet in the air. We started to come down, and broke through the ceiling where the sun did not penetrate. Hence we lost the lifting power of the warm rays. We descended very rapidly, and I was kept busy throwing off ballast to keep us from going down any faster. "I was much too busy to be nervous. But the whole thing was a mess."

The United States contains more than 88,000,000 miles of telephone wires, 2,300,000 miles of telegraph and cable wires, and 300,000 miles of power lines.

dents and mix to stiff dough and let raise again. When light turn on board and cut in rings and let raise again, then fry in fat hot enough to light a match.—Mrs. H. G. Harrington, route 2, Eugene.

Cruellers

1/4 cup shortening.
1 cup sugar.
2 eggs.
2 cups flour.
1 cup milk.
3/4 teaspoon grated nutmeg.
3/4 teaspoon baking powder.
3/4 teaspoon cinnamon.
Cream the shortening, add sugar gradually, yolks of eggs well beaten, and whites of eggs beaten stiff.
Mix flour, baking powder and spices, add alternately with milk to first mixture; roll thin on floured board, and cut in rectangular pieces about three inches by two inches. Make four one-inch parallel gashes crosswise at equal intervals.
Fry in deep fat, same as doughnuts.
—Mrs. Albert S. Hapner, 124 E. 18th, Eugene.

If Ruptured Try This Free

Apply It to Any Rupture, Old or Recent Large or Small, and You Are on the Road That Has Convinced Thousands

SENT FREE TO PROVE THIS
Every ruptured man or woman should write at once to W. S. Rice, 660-S Main St., Adams, N. Y., for a free trial of his amazing Lymphol Method in Rupture Control. Just put it on your rupture and look for quick beneficial results. Does not interfere with truss or support you may be wearing, but instantly, safely works to aid nature in closing the opening so that eventually your appliance may be discarded. Every ruptured person will welcome this result. What is the use of wearing supports all your life, if you don't have to? Why risk gangrene, strangulation, and such dangers from a small and innocent rupture, the kind that has thrown thousands on the operating table? A host of people are daily running such risk, just because their ruptures do not hurt or prevent their getting around. Thousands have made this free test. No rupture person can afford to pass it by, for it is a wonderful thing and has aided Nature in healing ruptures that were as big as a man's two fists. Write at once to W. S. Rice, Inc., 660-S Main St., Adams, N. Y., for quick results.

HEAVY WATER STORY

(CONTINUED FROM PAGE 1)

16 to 4. Thus ordinary water weighs 32 ounces per quart, while heavy water weighs 34 ounces.

Scientists all over the country are now hard at work on experiments to determine the action of this strange new fluid, although it is as yet very scarce. The exact quantity that Professor Stafford's work will yield is not as yet known, but it will be a considerable addition to the supply now on hand. It will be kept at Washington, and be used by scientists there and at other places where research projects justify drawing on the supply.

Mr. Stafford has been a professor of chemistry here since 1904, and during that time has made many contributions and discoveries in his field. He is the inventor of the Stafford
