No Trace of Pimples on Hand After Using Cuticura Soap and Ointment. Pimples broke out on the forefinger of my right hand from external irritation. They were very red, itching very much, especially after I had my hand in soapy water, and they spread. My fingers were cracked, and I also the palm of my hand. I would wake up at night and scratch until it would bleed. My hand looked terrible. I sent for a free sample of Cuticura Soap and Ointment, and after using it a few more, and after using two cakes of Soap and two boxes of Ointment there is not a trace of a pimple.
