HUNTER ACCEPTS CHANCELLOR JOB; DUE SEPTEMBER 1

tasks, a statement taken to mean that he will expect the presidents and faculties to have considerable voice in policy on educational problems.

New Deal Comes at Last

The selection of Hunter fulfills the long deferred pledge of a New Deal in Oregon higher education. When the federal survey was made in 1929, this promise was afirst made. When the Zorn-Macpherson bill threatened the University, it was the general understanding that both Kerr and Hall would step out but when Hall resigned in September 1932 Kerr was elected in his place.

After a brief interval of peace troubles broke in 1933 with attempts to remove the deans of women. The Morse-Nelson episode followed and the American Association of University Professors was asked to investigate the situation as a result.

On the understanding that Kerr would soon retire the A. A. U. P. committee delayed until a month ago the publication of a report which declared the existting setup impossible and the appointment of Kerr a tragic mistake.

Dr. Hunter is 56 years of age. He was born at Savannah, Missouri, March 24, 1879. He graduated from the high school in Blue Rapids, Kan., in 1895. He took his A. B. degree from the University of Nebaska in 1905, being a football star, leader in debate and oratory and a member of Phi Beta Kappa scholastic honorary at the Nebraska school. He took his master of arts degree from Columbia in 1910 and his degree of doctor of education at the University of California in 1925.

From 1905-11 Dr. Hunter served as a superintendent of schools and from 1911-12 was professor of agriculture at the University of Nebraska school of agriculture. He was superintendent of schools in Lincoln, Neb., from 1912 to 1917, and superintendent of schools in Oakland, Cal., 1917 to 1928.

Since 1928 he has been chancellor at the University of Denver. He has lectured at various schools and at sessions in several colleges and universities. In 1920-21 he served the National Education association as president and was chairman of the committee of 100 in the NEA for investigation of teacher tenure in the United States from 1923 to 1928. He was vice-president of the California State Teachers association from 1923 to 1928. He is a trustee of the Foundation for the Advancement of Social Sciences at the University of Denver.

Dr. Hunter is a member of the Congregational church, is a Mason and Shriner, and a member of the Rotary club. He is the author of numerous educational papers.

to inspire confidence."

Dr. J. R. Jewell, dean of education at the university and state college: "All of us in education are exceedingly glad that Dr. Hunter has been named chancellor. I have known him for many years, and have always greatly admired him, not only as an educator, but as a most able administrator. It was he who pioneered the work in junior high schools, and when he was head of the schools at Oakland, California, he made the system there a model for the whole United States. He is especially fitted for such a position as chancellor of an organization such as we have in Oregon."

Wayne L. Morse, dean of the law school: "Dr. Hunter will find a warm welcome awaiting him when he comes to Oregon as chancellor of higher education, for he made a fine impression on all who met him during his recent visit here. His record shows him to be an able educator and administrator, and we were all very favorably impressed by his personality."

Dr. J. F. Bovard, dean of physical education at the university and state college: "Dr. Hunter will, I am sure, fit nicely into the organization of higher education in Oregon, and is well qualified to head this system. I was very much impressed with his personality when he was here, and his record assures the people of Oregon that he is an able educator and administrator."

Karl W. Onthank, dean of personnel: "The announcement of the election of Dr. Hunter pleased me very much. He has developed the University of Denver along the lines of public service, and the utmost in service to the students. These are objectives which I am sure he will bring to Oregon with him."

Eric W. Allen, dean of the school of journalism: "Every one here who met Dr. Hunter was without exception immensely pleased with him, and we are all glad to hear he has been chosen chancellor. He comes here with a reputation of fairness, efficiency and good judgment."

YOU DON'T HAVE TO "BREAK IN" THE FORD V·8

You can drive it 50 miles an hour the day you buy it

THE FORD V-8 is ready for normal driving when you buy it. There is no tedious period of breaking-in for 500 or 1000 miles. You can drive it up to 50 miles an hour the first day. And after the first hundred miles you can drive it as fast as you desire.

That means greater motoring enjoyment for every motorist. It is especially important to motorists who are thinking about a new car for a vacation trip — to physicians, salesmen and all those who use a car for business. Instead of dragging along at slow speeds for days, you can make good time from the start.

The reason for this is as important as the result. The Ford V-8 needs no breaking-in because of unusual accuracy in the manufacture of moving parts and the smoothness of bearing surfaces. Clearances are correct when you buy the car. It is not necessary to depend on a long wearing-in period to eliminate tightness and insure smooth running. Longer life, greater economy and better performance are bound to result from such precision methods. They are further proof of the care and quality that go into the Ford V-8.

Formerly only the most expensive cars could be driven at normal speeds from the beginning. That still holds true today — except in the case of the Ford V-8. It gives you fine-car construction, along with fine-car performance, comfort, safety and beauty.

FORD V·8
