ALWAYS DELICIOUS

YOU ALWAYS GET BETTER QUALITY AT NO HIGHER PRICE WHEN YOU BUY A FIRESTONE TIRE WITH FIRESTONE NAME AND GUARANTEE

Tires may look alike on the outside, but on the inside, where blowouts start, they are different. Firestone Tires are made blowout-proof by Gum-Dipping, a patented extra process which soaks every cotton cord and insulates every strand with pure liquid rubber. In fact, every 100 pounds of cotton cords absorb eight additional pounds of liquid rubber. This special process prevents internal friction and heat, the main cause of blowouts. No other make of tire is Gum-Dipped, yet you pay no more for Firestone blowout-proof protection than you are asked to pay for tires built without this patented safety construction feature.

The make of tires you buy for your car becomes a matter of vital importance when you realize that there were 882,000 automobile accidents in 1934 injuring 954,000 people and killing 36,000 and that 43,000 of these accidents were caused by blowouts, punctures and skidding.

Firestone High Speed Gum-Dipped Tires hold all world records on road and track for safety, speed, mileage and endurance. These records emphasize the undisputed evidence that Firestone tires are not only blowout-proof, but give greatest protection against skidding.

THERE ARE THREE QUESTIONS AND ANSWERS THAT WILL SOLVE YOUR PROBLEM OF WHAT TIRES TO BUY

- 1 "Will the tread give me the greatest traction and protection against skidding?"**
Recent tests by a leading University show that Firestone High Speed Non-Skid Tires stop a car 15% quicker than any other of the leading makes.
For eight consecutive years Firestone Tires have been on the winning car in the dangerous Pike Peak Race where a skid means death. This is undisputed evidence that Firestone gives car owners greatest protection against skidding.
- 2 "Are they blowout-proof?"**
Firestone Gum-Dipped Tires have the most amazing records for being blowout-proof of any tires ever built. In the gruelling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Kelly Pettito won the race and broke the record over the 26-year-old rough brick track without tire trouble—in fact, not one of the 33 drivers had tire trouble of any kind.
Ab Jenkins drove his 5,000 pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles in 23 1/2 hours, at an average speed of 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind. These are most amazing proofs of blowout protection ever known.
- 3 "Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"**
Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile. This is made possible by the tough, wear-resisting tread built with higher shoulders and a wider, flatter contour. This thick, rugged, scientifically designed tread is held securely to the Gum-Dipped cord body by Firestone's patented construction of two extra layers of cords under the tread. This is a special construction feature not used in any other tire. Unequaled mileage records by thousands of car owners add undisputed evidence of the longer wear and greater economy of Firestone High Speed Tires.

for Style and Value with Carol

With the 4th coming on Thursday, some of the lucky ones are getting away for four whole days... which means taking more clothes... and clothes brings up the subject of luggage!

Whether you're a "high flyer" or not, you'll be sure to be enthusiastic about Penney's new Airplane Luggage. It comes in Wardrobe Cases, Overnight Cases and Hat Boxes... stout fellows all, and blissfully light... stout frames, duck covered, in natural color, and smartly striped. Believe it or not, the largest piece is priced under \$4.00. Those who travel light, will like the good-looking utility bags of imitation suede with slide fastening for less than \$1.00.

For the ideal play-suit at camp or beach, there's nothing to equal Slacks. Slip them on over your bathing suit or wear them with a shirt or handanna bandeau (make the last yourself from a big red or blue handanna). The blue Slacks they're showing in the Ready-to-Wear Dept. are a good choice, because, in the words of the very young generation, "they can take it" better than white. Priced at 98c. As their running-mate choose one of the new Rayon polo shirts with slide fastening... in blue, maize or white... cool and smart. They make a fine riding shirt, too! Priced at only 79c. More later, Carol.
