

FRANCE-ENGLAND TO COOPERATE IN MOVES FOR PEACE

By JOHN EVANS

(Associated Press Foreign Staff)

PARIS, June 27.—(AP)—France to-day announced that it had agreed to cooperate with England in building the new system of peace pacts which the nations' joint declaration at London February 3.

That statement contemplated simultaneous negotiation of western

serial, Danubian and eastern security agreements as parts of one indivisible security system.

Britain's separate naval agreement with Germany, allowing the reich navy to increase to 35 per cent of the British, apparently had upset this proceeding and caused France to fear England was merely seeking sea and air accords for her own protection, leaving France to shift for herself.

Although the rift apparently was healed, French officials said further conversations, scheduled to take place when Eden returns next week from Rome, would be most difficult.

The French premier, in saying farewell to the British, was understood to have advised him informally to "go easy" in trying to talk to Premier Mussolini about his quarrel with Ethiopia "lest the Italians be offended and further shake the United (Anglo-Italian-French) front" worked out at Stresa in May.

In today's meeting, Laval announced, the two reached an agreement to "recognize that France and England should remain faithful to their common duty of working together in the closest manner for the achievement of peace of Europe through increasing collective security."

Face Irritated With Pimple-Like Eruptions. Relieved by Cuticura.

"I was afflicted with eczema on my face. It started with small,
pimple-like eruptions which later turned watery, and itched terribly,
causing much misery, as I could not sleep. They itched so that I was
forced to scratch, and this disfigured me, as it made my face look raw
and irritated. I was ashamed to go out.

"For seven months I used different preparations with little success.
Then I used Cuticura Soap and Ointment, and I was relieved of the itch-

EXPERTS MARVEL AT GIN FLAVOR CONTROL PROCESS

Hiram Walker's "Controlled Condensation" Revolutionizes Gin Distilling!

How "C. C." Process Takes the Guess Out of Gin!

If you've ever had gin go fuzzy in a
fizz, cut capers in a cocktail, or forget
its obligations to Tom Collins, here's
good news! After 300 years, there is a
way to make gin flavors behave!

When Repeal came, Hiram Walker
was ready—with the secret of flavor
control in gin! Hiram Walker's "Con-
trolled Condensation" is the only
process in the world that assures ab-
solutely smooth, uniform flavor from
the numerous and tricky herbal in-
gredients of gin.

This unique "C. C." Process, in use
since the opening of Hiram Walker's
Peoria distillery, a year ago, distills
the various flavoring ingredients into

the grain spirits at different proofs.
The flavor of the individual ingre-
dients—not just the quantity—is
scientifically regulated according to
the exact requirements of the Hiram
Walker formula.

Smooth!—from Still to Shaker to You!

The results are amazing! No flavor
can come through too strong—no fla-
vor can come through too weak.
Everything is under control! Juniper
berries, coriander seeds, sweet orange
peel, and other elements used act in
complete unison under Hiram
Walker's "C. C." Process. Each con-
tributes the exact difference and de-
gree of flavor essential to a gin that is
perfectly balanced, consistently

smooth, invariably uniform . . . and
remember: Hiram Walker's London
Dry Gin is made exclusively from
grain spirits.

Extra Satisfaction—But It Costs You No More

Get a bottle today and taste the dif-
ference. The revolutionary "C. C."
Process, which has made Hiram
Walker's London Dry Gin the most
popular gin in America, gives you
complete satisfaction at no extra cost.
