"No Need to Advertise During the summer, I'll Wait Till Fall"

How some merchants "get that way" isn't quite clear. The Federal Reserve reports show that there is more retail business done during the months of June, July and August than any other quarter of the year except during the Christmas holidays. Printing, so essential in any merchandising plan, is our specialty, and we can serve you promptly and efficiently.

Right Thinking Is on the Road to Finding Out

Moody's Deep Curve Precision Lenses

Eye defects are a common cause of nerve leaks or loss of nervous vitality. Many conditions such as insomnia, dizziness, indigestion, listlessness, melancholy, unexplainable fatigue, poor concentration and memory, headaches and irritability are the direct or indirect effects of poor or painful, inefficient vision; imbalanced ocular motor muscles are an added source of trouble.

A thorough and scientific eye analysis is on the road to finding out just what your condition is. We make no charge for this.
