Purchase of Farms Helped by New Rate Of Loan Interest
Young farmers and tenant farmers now have the best opportunity in history to finance the purchase of a farm of their own, says C. F. Hyde, secretary-treasurer of the First National Farm Loan association of Lane county.

"The farm credit act of 1935, recently signed by the president, opens the way for more effective loan service in several important respects," Mr. Hyde said Wednesday.

"Commissioner loans, made on either first or second mortgage security not exceeding 75 per cent of the appraised normal value of the property (within the limit of \$7500) are now authorized for financing the purchase of a farm as well as to refinance old indebtedness. Furthermore, when secured wholly by real estate, Commissioner loans, which are made out of a special fund administered by the Land Bank, may be amortized over a long period of

years corresponding to the terms of a regular Land bank loan, except that the interest rate remains at 5 per cent."

The residents of Hawaii and Alaska, like residents of the District of Columbia, cannot vote for president and vice-president of the United States. Only states have representation in the electoral college.
