Certainly! And science proves we're right! Be wise! Cool off with CALVERT.

What? You drink whiskey in the tropics, to keep cool?

Science confirms theory that Calvert Whiskey is not heating

"Allows a rapid lowering of (body) temperature," says professional opinion

HOT news! Good news! CALVERT cools you! Science proves it . . . proves that smoother mellow CALVERT drives the heat from the interior of your body . . . rolls it out to the exterior of your skin. There the heat radiates, dissipates, evaporates . . . refrigerating and cooling you. And backing science are the liquor statistics of tropical countries. Below the Equator, whiskey outsells all other spirituous liquors 3 to 1. In Chile, 30 to 1. In Colombia, 23 to 1. In Ecuador, 7 to 1.

So, use good judgment and cool off with CALVERT's better blended whiskey . . . the whiskey that key clear heads call for . . . the whiskey that enjoyed in gentlemanly moderation, lets you salute tomorrow with a smile.
