

FIELD SECRETARY AUTHORIZED FOR SUNSET HOME HERE

A field secretary to select members for the corporation and for members of the home in general and to create interest in the institution will be engaged by the Sunset Home, it was decided at the annual rally at the home Sunday. The board of directors met at that time in annual session and heard the report of the superintendent and treasurer, Rev. R. Bogstad.

The operation of the farms owned by the corporation was found to have progressed satisfactorily. One farm, one property and one house and lot had been sold during the year, aggregating a total of over \$4500 in good sales contracts and notes, but it had been impossible to raise cash on such papers. This fact is what is hampering the work at the present time.

The services in the chapel Sunday morning were attended by a full house. Rev. H. Rogan and J. M. Jensen, respectively, presided and the vice-president of the board delivered short sermons. Dr. O. A. Tinseland, president of Pacific Lutheran college, Parkland, Wash., delivered the principal sermon.

Special music was rendered by Mr. and Mrs. T. G. Karhus and Mrs. H. Rogan.

Luncheon was served in the dining hall for the members of the board and those who took part in the program. The others formed groups on the lawn.

Since the Sunset Home began to operate in October, 1927, there have been 84 people enrolled, the capacity being 50. At the present time there are 40; of those 24 are men, and 22 women. Seven are under the age of 70; 14 between 70 and 75; 11 between 75 and 80; 8 from 80 to 85; 4 from 85 to 90. Three are over 90 years of age. The oldest person in the home is Mrs. Lottie Paulson who is 97.

In the treasurer's report, the receipts and disbursements were accounted for. All accounts were properly audited by Henry Halverson and Elmer A. Gilbertson.

The financial statement accounted for the property owned by the corporation.

Current assets . . . \$ 4,954.31
Fixed assets . . . 78,472.15
Total . . . \$83,426.46

The liabilities amounted to \$14,771.47. The net assets are \$68,654.99.

The annual election resulted in P. O. Bruland, S. P. Ness and Arnt Ree being re-elected to the board of directors for a term of three years. Rev. O. K. Davidson of Portland was elected to fill a vacancy.

By a voting vote the corporation thanked Rev. and Mrs. R. Bogstad for their efficient, faithful and untiring work for the home. A resolution to hold more such rallies in different parts of the state was passed.

LANE IRRIGATION INTERESTS MANY

(CONTINUED FROM PAGE 1)

of Eugene, and was placed on rough land.

Hobart Stout, in charge of the installation of the equipment, explained the operation of both the electrical and gasoline-powered motors as "efficient and economical." The electricity driven motor generated 5 horse power, and easily operated the nine sprinklers which were fed by it. Ford Northrup, electrical engineer for the Eugene Water Board, reported that a maximum of 40 pounds pressure could be obtained at a cost of approximately 40 cents for each inch of water per acre.

The permanent set-up at the Shaffer Bros. place irrigated approximately 19 acres of beans and other vegetables. Both the sprinkler and Skinner line systems were used.

Sprinklers Shown

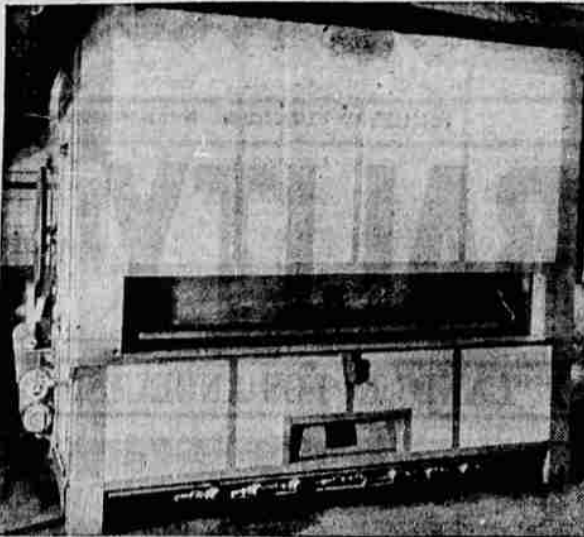

Ten sprinklers, driven from an electric motor, supplied water for four acres of the beans nearest the Pacific highway. Another fifteen acres was being watered by the Skinner line method. Of the two systems, Shaffer favored the sprinklers, as the Skinner lines must be changed each hour to assure proper coverage.

The gasoline pump, which was driven from the motor of an automobile, fed 19 sprinklers in the orchard to the north of the bean crop. The portable set-up had just been brought to the Shaffer place from the Adams place north of Junction City, where it has been in operation during the summer months. It was placed at the Shaffer place for the inspection of those making the irrigation tour, and will be removed Thursday, as will the portable lines of the Eugene Water Board.

The development shown at the Shaffer farm illustrates the remarkable progress which has been made in irrigation in Lane county during the past year, according to Fletcher. County land under irrigation has increased greatly during the twelve-month period, and many growers report as high as 100 per cent increase in the yield of their lands following the installing of irrigation systems. The Shaffer brothers raise three crops of lettuce and other garden vegetables on land which formerly grew but one crop a year.

In the afternoon, following a lunch sponsored by the Eugene Chamber of Commerce at the Cafe Del Rey, the group visited irrigation projects to the east of Eugene, including the gravity system being constructed by the Springfield Land and Water Co., which delivers water to approximately 1000 acres. At the James Gardens, the Skinner type overhead irrigation was shown as used for varied types of vegetables.

OVEN INSTALLED BY WILLIAMS

Perhaps there is nothing new under the sun, but most cooks would be amazed at the huge, new oven installed by Williams bakery. Designed for cleanliness and ease of operation, it is the last word in efficiency and accuracy. Heat and moisture control insure the same even texture and beautifully browned crust at all times.

WPA APPLICATIONS DUE SEPTEMBER 16

(CONTINUED FROM PAGE 1)

Jobs, which are temporary and do not require skilled labor.

"Skilled labor," said Hockley, "no longer needs relief. Oregon is not an industrial state, and therefore is not faced with the same problem as eastern states. The supply of skilled labor is used up, and the problem now is to find jobs for the thousands of unskilled laborers."

Hockley laid stress upon the desirability of a PWA loan over that from WPA funds, providing the requirements for such a loan could be met by the project under consideration. All projects under PWA loans are contract jobs, permitting the contractor to hire and fire his workers without interference from relief officials, he said. The wage scale paid under PWA is also higher than the subsistence wages of the WPA program. All workers, from common laborers to skilled workers, are paid at the prevailing wage rate, while WPA workers receive a stipulated monthly wage at the subsistence level.

The outstanding features of the new PWA act were explained. These included the increase in funds available, the authorized purchase of revenue bonds by the government, and the simplified applications. Applications to meet the requirements of the new deadline, need only be "sketchy," said Hockley. They should be made out on the regular form and be accompanied by engineering and architectural data sufficient to enable state and national officials to understand the project. The applications may be filed subject to subsequent elections authorizing the issuance of bonds, and do not need the recommendation of county, city or regional planning commissions. The recommendations of such bodies will be welcomed, but are not necessary, as in WPA grants.

Mayor Elisha Large discussed with Hockley several city projects, for which PWA funds may be sought. Among these were the city sewage disposal improvement, the construction of a municipal fire alarm system and the replacement of the city maintenance plant. The first two projects were yet undeveloped, Large explained; while he intimated that the last would be referred as a WPA project. The probable cost of the new plant would be \$4,500, too small a sum for the issuance of bonds to obtain PWA credit, Large said.

County Judge Fred Fisk questioned Hockley as to the possibility of obtaining PWA funds for improvements at Oakridge, including an overhead crossing between that town and the state highway and the much-discussed Oakridge water system. A delegation of Oakridge people were present to make their needs known.

Fisk referred to the need for new fire-proof vaults for the Lane county courthouse, suggesting that PWA funds might be secured for the \$20,000 project. Lane county has provided \$10,000, nearly enough to finance the required 55 per cent of the work, in the 1935 budget. Joe McArthur, superintendent of the Eugene Water Board, intimated that that organization might seek PWA or WPA funds for an extension of the city water mains.

In closing the discussion, which was conducted informally, Hockley warned his listeners that he was not trying to "sell" PWA loans, and that he did not want communities to burden themselves with unneeded projects. Make applications for those that are needed, omit those that are not needed, he advised.

The local meeting was one of a series of such explanatory discussions which Hockley is conducting throughout the state. His present itinerary will take him to municipalities of the Willamette valley. Later he plans to visit Eastern Oregon cities. He has already toured the northwest portion of the state. Wednesday morning at 10 o'clock he was in Roseburg to explain the new PWA set-up to officials of that district.

SOAP BOX DERBY DEADLINE IS SET

(CONTINUED FROM PAGE 1)

representing Indians, pioneers, cowboys, clowns, animals, gypsies, Spaniards, bathing beauties, Hula dancers, plants, novelties and historical characters. The winner in each division will be awarded a free pass to the McDonald theater. Each child who takes part in the parade will be given a prize, and will be assured first-line seats at the derby course.

At 1:30 Wednesday, twenty-two drivers had signed to compete in the derby. All had completed their cars. They are:

Division I (13 to 16 years): Keith Rodman, Bob Marshall, Warren Russell, Frank Myers, Tom Warlick, Curtis Leonard, Gene Handy, Raymond Rainheimer, Elwyn Woodson.

Division II (10 to 12 years): Raymond Toll, Curtis Cheesen, Kenneth Prince, Carl Nashholm, Sidney Gilstrap, Mike Miles, Roy Kirby, Robert Brakel, Bob Zeller, Bertrand Dotson, Robert McCormack.

Division III (9 years and under): Johnnie Donohue, Billy Hutchinson.

APPLICATIONS FOR EMPLOYMENT EXAM DUE SEPTEMBER 4

Applications for entrance to examinations qualifying for positions in the state employment service and the national employment service must be in at the state office in Eugene by September 4, it was announced here today by Dr. James F. Gilbert, dean of the college of social science of the University of Oregon, who is special representative for the U. S. employment service.

The applications should be made to Dr. Gilbert at his office at the university, where full information may also be obtained.

Many applications have been received during the past ten days, Dr. Gilbert reports, but a considerable number have been rejected on account of failure to comply with the requirements set up by the U. S. employment service. Positions for which examinations are to be held fall into two main classes, he points out, although there are six separate categories.

The positions of manager, supervisor and junior and senior interviewers, with salary ranges from \$1080 to \$3900 call for executive ability, education and experience of a high order. For all of these a high school education of four years is required as a minimum, although in some cases training in business or correspondence schools may be substituted for one of the high school years.

College or university training may be substituted in part for the required experience, but even college training cannot take the place of experience entirely, points out Dr. Gilbert. Moreover, experience to qualify for positions of managers, field supervisors and interviewers must have been in commercial, industrial or other employments that provide a knowledge of occupations and employment problems.

The second class of positions call for accounting, statistical or clerical training and experience along the same lines. These are positions as statisticians, statistical assistants and clerks, typists and stenographers. In this case a high school course of four years is the minimum educational requirement, and the experience must be clerical, accounting or statistical work. College training may shorten somewhat the period of experience required.

Those who have filed or plan to file applications for positions of supervisor, manager or interviewer would do well to familiarize themselves with the theory and practical operations of the employment service, with state laws affecting employment and with industrial and employment conditions in Oregon, it is pointed out.

The office at Eugene has supplied the leading libraries of the state with a list of references that may be read with profit by those intending to take the examinations.

In filing applications it is important that the type of employment desired be specified, Dr. Gilbert states. Applications may be sent in at any time, but must be in the Eugene office before Sept. 4 if they are to receive consideration.

UNIQUE DEVICE IS FEATURED IN SHELL "DRIVE SAFELY" CAR

(CONTINUED FROM PAGE 1)

When the Shell "Drive Safely" test car arrives here Thursday to aid in the safety campaign being promoted by the Eugene Register-Guard, local motorists will have an opportunity to see one of the most unique devices ever invented for measuring the operating safety of a motor car. This device is known as a "decelometer" and is in use throughout the country by state and city police departments. As the name implies, it is a meter or measuring instrument for determining the deceleration of a car—in other words, how long it takes a car to stop when the brakes are applied.

The decelerometer looks like a small box and is fastened to the running board of an automobile whose brakes are to be tested. Inside the box is a pendulum arrangement. A card is inserted for each test on which the pendulum can register its swing.

When the car is braked, the pendulum tends to "keep going"—that is to say, it swings forward. The faster the car stops, the farther the pendulum swings forward and the card is marked to measure the pendulum swing in terms of the rate of deceleration.

The test is much more accurate and more simple than the old method of racing a car to a certain line and then attempting to apply the brakes at that point, because no two motorists ever managed to step on the brake pedal at exactly the same spot.

According to R. N. Stevenson, Shell manager here, the test takes but a few moments. All car drivers in the Eugene area are invited to have their cars "safety-tested" free of charge during the hours between 10 a. m. and 10 p. m. Thursday or Friday on Hillard street between 19th and 20th East.

Harrisburg Store Is Razed By Fire

HARRISBURG, Aug. 21—(Special)—Fire destroyed a second-hand store owned by John Steutel here early Wednesday morning, and for a time menaced the office of the Harrisburg Bulletin.

The blaze started in the rear of the store, and had made great headway before it was discovered, about 2 a. m. Fire apparatus from Junction City was brought here, but the firemen were unable to save the building, and devoted their efforts to preventing the blaze from spreading.

No insurance was carried on the store. It was impossible to ascertain what caused the fire.

Harrisburg Man is Hurt in Smash-Up

HARRISBURG, Aug. 21—(Special)—A crash between a truck and an automobile at a highway intersection one mile east of Harrisburg seriously injured L. Whittier, Harrisburg farmer, Tuesday afternoon.

Whittier was taken to Albany, where his chance for recovery was said to be good. His only injury was in the forehead, where a bolt from the car was driven deeply into the flesh.

FOUR-H FAIR TO START THURSDAY

(CONTINUED FROM PAGE 1)

Between those hours a crop judging contest will be held. All crops will be judged by 4 that afternoon, it is announced. At 7:30 that evening the home economics demonstration will be completed and the rest of the evening will be given over to motion pictures of an educational and entertaining nature.

Fair Is Free

John Billings, emergency assistant extension agent at the state college, is assisting R. C. Kuehner, county club agent with the fair. Mr. Billings who is from Jackson county where he was prominent in club work, has been acting as emergency club agent in Portland.

The fair is entirely free to the public and the people of Eugene and Lane county are being given a cordial invitation to view the work of the club members. Mr. Kuehner said indications point to more exhibits and a better quality of work and a better showing of livestock and garden and farm crops than ever before.

SENATE MOVES TO PROTECT AMERICANS IN EVENT OF WAR

(CONTINUED FROM PAGE 1)

their own risk, with 90 days allowed for citizens to return home from areas.

Authority for the president to send ships, foreign or American, carrying men or supplies to belligerent vessels at sea.

Authority for the president to restrict or prohibit the entry of belligerent submarines into American waters or ports.

A national munitions control board to administer the program, consisting of the secretaries of state, treasury, war, and commerce, and the chairman of the board and house foreign relations committee.

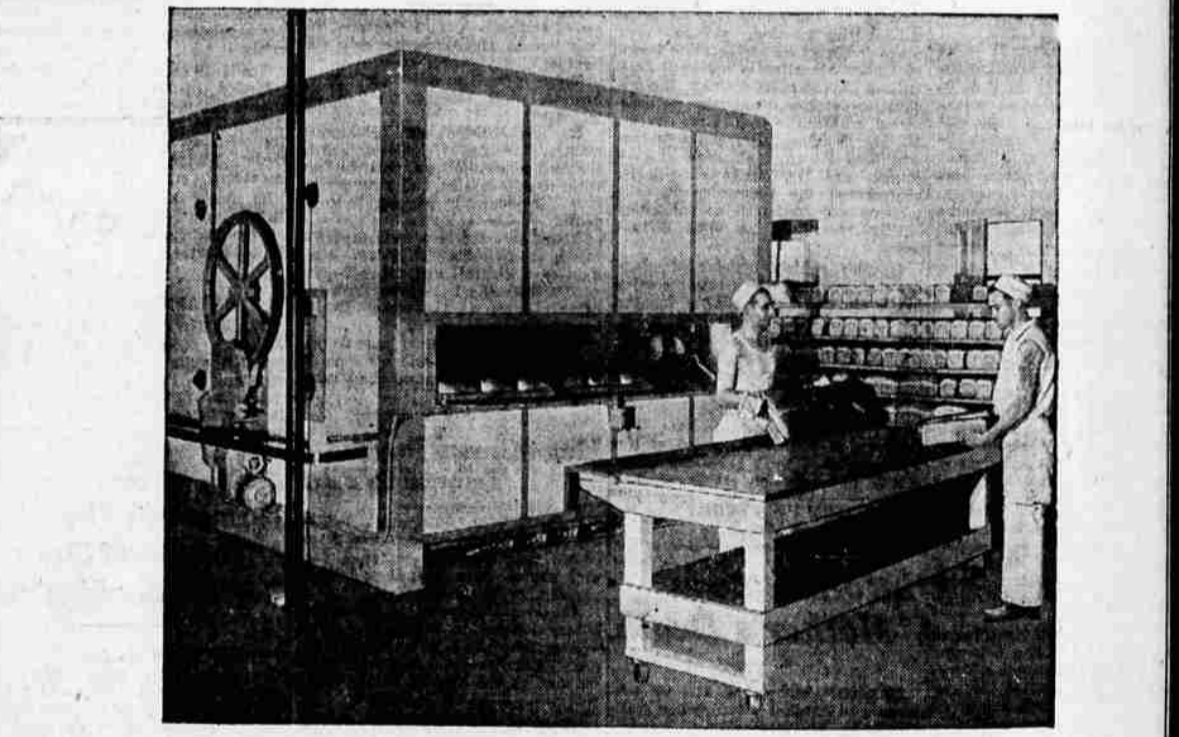

Little Debate Heard

Except for a few questions and answers committee and a brief speech by Senator Borah (R., Idaho), clarifying the resolution should have gone farther and absolutely prohibiting American citizens traveling on belligerent ships, there was no debate. Neither was there a record vote.

Borah said the provision authorizing the president to prohibit travel on belligerent ships by American citizens "except at their own risk" "partially" met the purpose.
