

BRIGHTER BUSINESS
OUTLOOK INFLUENCE
IN UPWARD TRENDS

NEW YORK, July 11.—(AP)—Stocks generally nudged profit-taking with comparative ease in today's market, a number galloping into new high territory for the year or longer, with gains of fractions to 2 or more points.

The turnover of around 750,000 shares was the best for a Saturday since last April. The close was firm.

The continuation of the recovery, brokers said, was due largely to the persistent belief that business and industry will maintain their current stamina despite seasonal influences.

Numerous issues attracted buyers because of the revival of rumors in Wall Street of nearby dividend boosts because of exceptionally satisfactory earnings and the disinclination of corporations to pay large taxes on undistributed surpluses.
