

### NUMBER OF WRIST BONES INDICATIVE OF PUPIL'S GROWTH

Scientific data on children entering Lane county schools will be gathered in the future, with the object of attempting to determine the capabilities of entering pupils and to place them on a normal of seven or nine. Dr. A. N. Johnson, Lane county health officer, told members of the Eugene Active club at the regular luncheon meeting Thursday noon.

Pre-school clinics are now being held in the county, he said, at which entering pupils are given examinations. One of the things being done is to take x-rays of the wrists of the children to determine the number of bones.

The number of wrist bones increases one for each year of life up to a norm of seven or nine. Dr. Johnson pointed out that a five-year-old youth should have five bones in his wrist.

Medical authorities believe there is a relation between the intelligence quotient and the "bone-age" or physical development, the speaker said. Thus a child with five bones in the wrist should have an intelligence quotient of five years. It is hoped, through this survey, to establish a definite relationship in this matter, he declared.

The health examinations likewise include examinations for tonsils and to date it has been found that 75 per cent of the children examined had defective tonsils. The examinations also show that most goiters found are in children between the ages of 10 and 14.

Commenting on the health program of the county, the health officer said it had four phases, a health survey to act as a diagnosis of the public health of the community, the encouragement of a cooperative spirit in public health work, a program of a consistent series of projects, all of which would tend to show the progress of the health department through the achievement made.

Per capita cost of public health work in Eugene is five cents, the speaker declared, comparing this figure to that of \$1 paid by the average American citizen. By counties, the average per capita cost of health service in America is 50 cents, while in Lane county only 13 cents is expended, he continued.

George Evans gave the five minute talk on the development of printing.

### DR. DEBUSK, FAMED EDUCATOR, IS DEAD

Other campus associates all expressed distress over the death of the educator.

Dean James H. Gilbert of the college of social sciences said: "Dr. DeBusk's work in the field of education won for him a national reputation. He was particularly successful in diagnosing the difficulties of handicapped children and in applying remedial and corrective methods. He has trained many teachers in the use of similar methods and the good work he has done will go on despite his untimely death."

"Dr. DeBusk had an intensely human interest in those with whom he worked, and his influence was far-reaching."

Surviving Dr. DeBusk are the widow, Mrs. Matella DeBusk; one son, Dr. Roger DeBusk, assistant manager of the Wisconsin general

### FLUSH OUT 15 MILES OF KIDNEY TUBES

Medical authorities agree that your kidneys contain 15 miles of tiny tubes or filters which help to purify the blood and keep you healthy. Kidneys should empty 2 pints a day and so get rid of more than 50 pounds of waste.

If you have trouble with too frequent bladder passages with scanty amount causing burning and discomfort, the 15 miles of kidney tubes may need flushing out. This danger signal may be the beginning of nagging backache, leg pains, loss of sleep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait. Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help to flush out the 15 miles of kidney tubes. Get Doan's Pills.

### KNOX SET TO JOIN LONDON AS PARTY HEADS PLAN DRIVE

(CONTINUED FROM PAGE 1)

into every precinct, ringing door bells and talking to voters, that will be significant in this campaign." Knox told a group of party workers pledging their support.

"The significance of the work of republican service men is shown by the fact that it is extremely probable that a change in the vote of former soldiers will be the deciding element in this election."

**Lineup on 12 Fronts**

Under direction of National Chairman John D. M. Hamilton, the campaign preparations at national headquarters now line up along a dozen fronts including:

1. Landon's first campaign tour, starting late in August, to New York and Pennsylvania, including probable short stops enroute.
2. A speaking tour in September by Sen. Arthur Vandenberg of Michigan, eloquent foe of the New Deal, to start in Nebraska and probably swing toward Ohio.
3. A rapid but comprehensive swing through the states west of the Mississippi river by Hamilton to complete the party organization and sound out sentiment.
4. Plans of the Republican Service League to organize in every locality of perhaps 25 states with a view to reaching every veteran.
5. Formation of an agriculture advisory committee, plans for which were worked out here this week.
6. Senatorial campaign committee members summoned candidates from surrounding states to a series of conferences here this week to start their active work in the field. The house campaign committee already is hard at work.
7. Knox, as soon as he is advised of his notification, will prepare for a whirlwind campaign starting at Commerceville, Ind., Aug. 5.
8. Both Hamilton and Knox attended the first of many luncheons, teas and receptions prior to the notification and both spoke briefly.

### SPANISH RIGHTISTS MAKE FRESH GAINS

(CONTINUED FROM PAGE 1)

wh militiamen to meet insurgent soldiers.

Many other automobiles and company buildings were burned or wrecked in the fighting before the government gained control and seized the foreign property to aid in the fight against the rebels, the General Motors executive said.

**ASSURE UNCLE SAM**

WASHINGTON, July 30.—(AP)—Assurances that American property in Spain was being respected were made public by the state department today coincident with word that the flight of United States citizens from Madrid was well under way.

Eric C. Wendelin, charge d'affaires of the embassy at Madrid, informed the state department last night that reports that the Spanish government had confiscated much American property were "as yet unfounded."

In a message filed from Barcelona at 10 a. m. today (Spanish time), Consul Franklin reported to the state department: "Rumors that authorities in Barcelona have taken over foreign banks and confiscated their funds are untrue."

(CONTINUED FROM PAGE 1)

from interference from any source," to mean a denial of the right of a labor union, or unions, actively to promote the organization of an unorganized factory or an unorganized industry.

"It is absurd," Thomas said, "to talk about labor's rights to organize if in every factory workers more or less at the mercy of the owners of their jobs must organize spontaneously without any help from their fellows. Is this the interpretation to be given to your words?"

Governor Landon said there was nothing in his acceptance speech to suggest that he favored infringing in any way the right of free speech or free assembly.

"I am opposed," he added, "to any such infringement. The workers have the right to meet among themselves or with others of their own choice to promote organization with complete freedom from interference from anyone whatsoever.

"The workers should be fully protected in this right by the public authorities. This necessarily includes the right of a labor union to promote by lawful and proper means the or-

### TAKE MERCHANT MARINE

MADRID, July 30.—(AP)—Loyalist Spain confiscated its merchant marine today to form an anti-fascist armada of defense and launched a desperate ground and air battle for possession of the strategic city of Zaragoza.

Leftist forces, the government announced, were driving insurgent fascists out of the Guadarrama mountains near Madrid and back to Avila and Segovia.

In addition to giving merchant ships an official naval status, authorities summoned all military and civil fliers to the Cueta Vientos airbase for orders to join in anti-fascist flights.

Most of the states of the Union have small deposits of tin, but none of them has a sufficient quantity to mine profitably.

### POWER ROW GRIPS COTTAGE GROVE AS ELECTION IS NEAR

(CONTINUED FROM PAGE 1)

pany has operated in Cottage Grove for more than 15 years.

In a statement from the Mountain States Power office, Thursday, it was said the company, and not the city, is paying for this special election. Answering the question why the franchise had not come up sooner, since the old one expired seven months ago, the company official said it takes time for a city to discuss and draw up a franchise; furthermore, that the company had not been given opportunity to bring the matter up until recently.

**Alliance Issues Statement**

The Business Men's Alliance, under the acting president, William Collins, has issued statements pointing out the franchise of the Mountain States Power company expired Dec. 29, 1935, that in January, 1936, a special state election was held, that the regular primary election was held in May, 1936, that the regular general election will be held in November, and then asks: "Why does this power corporation choose this time for a special election—Aug. 4—three months prior to a regular election and seven months after their franchise has expired?" They state further:

"Section 9 of the old franchise under which this Mountain States Power company has functioned for the last decade provided: 'That in consideration of the right an privilege herein granted, said Cottage Grove Electric company, its successors or assigns, shall at all times during the life of this grant, furnish said city and inhabitants thereof, light, power or heat, as the same may be required at a rate or rates not to exceed the rate or rates charged for the same or similar service in other localities and under like conditions within the state of Oregon...' Has the Mountain States Power company lived up to this section of their old franchise?"

The alliance asks later in its statement: "...Are you going to be too late again. Are you going to have another Springfield case without opposition?"

It is understood that for some time some residents of this community have contacted the Eugene water board, the Eugene water board however, has a ruling that it does not give service to communities served by other corporations.

Millard McFarland, acting secretary of the Business Men's Alliance, also cites the fact that voters should consider the fact that the Bonneville dam soon will be ready for use to give power and that already surveys are underway for two dams in this vicinity, one on the Coast Fork and the other on Row river and that voters should take these situations into consideration before signing a franchise for 10 years. The association includes between 50 and 35 responsible persons now, its officers state.

### CARS DRIVEN NEARLY TO ROUTE F TUNNEL

Cars containing state WPA officials, county officials and others drove to within half a mile of the site of the tunnel on the divide between Turner creek and Knowles creek on the route "F" highway Thursday. The road has been graded over four miles from where the work was started some time ago at Camp Lane at Linaw.

Between 120 and 130 men are at work on the road now, according to members of the party that made the trip, and good headway is being made.

Included in the party were I. E. Oakes, Portland, state director of operations of the WPA, Earl M. Drew, Portland, state quartermaster, W. M. Bartlett, Salem, district director of operations, Victor Todd, county director of operations, Cal M. Young and Walter J. Holland, Lane county commissioners, and P. M. Morse, county engineer.

Mr. Oakes upon his return to Eugene said that the trip was merely one of inspection. He said he was much pleased with the progress of the work and predicted that the site of Camp Lane, when turned over to the county, will become a beautiful park. It has a wonderful setting, he said, and with some improvement can be transformed into a real beauty spot.

### WANT VETERAN VOTES

Plans of the Republican Service League to organize in every locality of perhaps 25 states with a view to reaching every veteran.

Formation of an agriculture advisory committee, plans for which were worked out here this week.

Senatorial campaign committee members summoned candidates from surrounding states to a series of conferences here this week to start their active work in the field. The house campaign committee already is hard at work.

Knox, as soon as he is advised of his notification, will prepare for a whirlwind campaign starting at Commerceville, Ind., Aug. 5.

"I am opposed," he added, "to any such infringement. The workers have the right to meet among themselves or with others of their own choice to promote organization with complete freedom from interference from anyone whatsoever.

"The workers should be fully protected in this right by the public authorities. This necessarily includes the right of a labor union to promote by lawful and proper means the or-

### PROJECT STANDS ALONE

While PWA has rigid regulations governing projects, the Oregon state capitol building is unique, the commission chairman declared, being the only project of its kind in the country.

For this reason, it seems obvious that regulations governing such projects as bridges, sewage disposal plants, and such projects might not be suitable for application to a state capitol building.

Since the project is entirely different from any others under way, the commission has assumed that existing regulations will not be enforced to the letter in this regard. Under this assumption, art matters would therefore not be submitted to competitive bidding. In addition to the proposed wood murals for the interior decorative panels, plans call for three pieces of sculpture, one atop the dome and one at each side of the front elevation.

The only discussion so far has centered on the wood murals, which Oregonians hope to see included, but McLean pointed out that all art work would come under the same head and that there was no intention of select-

### MERIT TO CONTROL CAPITOL ART WORK

(CONTINUED FROM PAGE 1)

a definite policy regarding works of art and their selection.

**Bidding Required**

Mr. McLean explained that under existing rules governing PWA projects, it was required that all matters of construction be on a basis of competitive bidding. This meant, he further explained, that all phases of the actual construction of the capitol would be so handled. However, he said, the state capitol commission, the architects and all concerned with the capitol building realized the absurdity of placing works of art on such a basis.

"It is utterly ridiculous to say that sculpture work or murals would be selected on the basis of the lowest bidder," McLean said. "You just don't get the work of artists in that manner. By the very nature of the work, it must be selected on a basis of merit only."

### Nature Study Club Will Meet Tomorrow

The adult education in nature study meets tonight, 8 o'clock, in the education room at the city hall. Those interested are asked to bring specimens of flowers, fossils, Indian relics, samples of wood, etc., for identification and study. A class in basketry and other crafts was started in Cottage Grove Wednesday afternoon. Max Warner, who has been teaching and child study classes during the year, is teaching the first class of the class in Friday afternoon about 2:30. Any other students invited to join the class.

# Chesterfield wins

... the cigarette paper is as pure as the food you eat

If you could see the Chesterfield paper when it's being made you'd know why it's pure and clean. It looks just about like rich cream.

When Chesterfield paper comes off the rolls it is tested again and again to make sure it will burn without taste or odor.

We know from experience that good cigarette paper helps make a good cigarette — we know it's one reason why Chesterfield wins.
