New York Stocks

NEW YORK, April 21.—(AP)—Utilities and specialties put on a quiet rally of their own in today's stock market, leaving many issues to drag along in a fruitless search for a trend.

Brokers viewed the news much more to their liking, but most customers apparently had yet to be convinced a turn in the latter sense near 4 1/2 hours and these were inclined to stand aside and await something more definite from the Washington front.

After fairly steady opening industrial backed away and, until the final hour, losses running to a point or so were well distributed. Support around the close enabled an assortment to reduce or cancel losses, and finishing prices were no more than moderately irregular.

Activity was low from the start, with transfers approximating 600,000 shares. The power and light company group had the benefit of the usually friendly reception given Consolidated Edison's offering in the morning of \$60,000,000 of debentures. This stock issue brought fresh demand for high grade corporate bonds, and U. S. government securities were also in demand.
