BACKACHE, LEG PAINS MAY BE DANGER SIGN

Of Tired Kidneys
If backache and leg pains are making you miserable, don't just complain and do nothing about them. Nature may be warning you that your kidneys need attention.
The kidneys are Nature's chief way of taking away from your system all the acids, poisons and poisonous waste out of the blood. Most people pass about 2 pints a day or about 2 pounds of waste.
Frequent or scanty passages with smarting and burning shows there may be something wrong with your kidneys or bladder.
If the 15 miles of kidney tubes and filters don't work well, poisonous waste matter stays in the blood. These poisons may start nagging backaches, rheumatic pains, leg pains, loss of pep and energy, getting up night, swelling, puffiness under the eye, headache and dizziness.
Don't wait. Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from the blood. Get Doan's Pills.
