TODAY'S RECIPE

By NEA Service
SOME of the most nutritious meats are found at the bottom of the butcher's price list—kidney, brains, heart, and liver. All these meat organs, except calf liver, are inexpensive.

Judge the quality of these meats by certain rules. First, notice the color. Most persons prefer a bright color in kidney, heart, and liver. Fresh brains are a pinkish-gray. All these organs are plump and well rounded when they come from good, young animals.

Avoid flat kidneys, flabby hearts, thin livers, and brains that are broken into pieces. In selecting brains, make sure there are few blood clots, also that the texture of liver is fine-grained and without coarse strings.

Remove the outer membrane and fat from kidneys; trim the kidneys and veins off a heart; and take any blood clots off the brains. Calf and beef livers require no special preparation, but lamb and hog livers are usually scaled to improve the flavor.

The very tender organs—liver, kidneys from young animals, and brains—are cooked at a moderate temperature and no longer than necessary. To keep the meat tender and to retain the delicate flavor, be careful not to overcook it.

Transportation Is Needed Near Home

Transportation is an important consideration in selecting a neighborhood for a small home.

Local builders suggest that the neighborhood chosen for a home should be well serviced by cheap regular bus or trolley lines.

Unless the home is within walking distance of the place of employment of the family head and the schools which the children attend, adequate transportation facilities are absolutely essential.

GOOD PAINT PAYS

Good paint is a good investment, say local builders. Good paint produced by reliable manufacturers costs less than cheap paint, for the cost of painting also involves the cost of labor. Cheap paint frequently costs more to apply than good paint. It doesn't go so far for one thing and more gallons have to be bought and more time taken to spread.

M-J-B WHY?
"We found the answer in a snowstorm..."
1 We were skiing 'cross country, miles from anywhere, when it started to snow. We lost our way and floundered around for hours. Believe me, we were scared stiff. And then we stumbled on a trapper's cabin half buried in the drifts.
2 I dug through the drift with a ski. Luckily the door was unlocked so we barged right in and made ourselves at home. There was food on the shelves and an unopened can of coffee. We started a fire and put the coffee on the stove. Maybe it was because we were tired and cold, but that coffee tasted wonderful. It had a deep, rich flavor like rare old wine.
3 "What kind of coffee is this?" I said. "Look at the can, silly," laughed the wife. "I've been telling you about M-J-B's Richer Roast for years, but you wouldn't let me change. Remember?" "You win," I said. Next morning the storm had passed so we left some money and the wife scribbled a note: Many thanks from two orphans who discovered your cabin and M-J-B!"
