The animal finally was bulldozed and tied to a tree, after reverting to his normal amiability.

Giant Battleship Indiana Is Launched

NEWPORT NEWS, Va., Nov. 21.—(P)—The 35,000-ton battleship Indiana, which Secretary of Navy Knox described as a symbol of this nation's will to survive in a world at war, splashed into the James river today from her building ways at the Newport News shipbuilding and Drydock company, six months ahead of schedule.

Mrs. Lewis C. Robbins of Wichita Falls, Texas, daughter of Indiana's governor, Henry F. Schrickler, hurled a be-ribboned bottle of champagne against the towering bow to send the mighty vessel on her way at 7:53 a. m. (PST).

Governor Schrickler, Governor James H. Price of Virginia, high naval officials and a number of congressmen watched the \$70,000,000 vessel slide down the ways, slickened with tons of grease, without mishap.

Secretary Knox declared it no accident that the Indiana, third of her name, was ready for launching six months early.

To a question as to whether he was considering breaking off diplomatic relations with the Vichy government of France, the president said he had heard nothing about that.

Likewise, he asserted, he had no reports on the showing which was being made by American equipment used by the British in their new campaign in Libya.
