ARE YOU GRINDING AWAY YOUR WHEEL BEARINGS?

Sand and silt washed in by winter rains grind away on vital wheel bearings. Don't neglect them. They need inspection now!

1. Under the grinding wear of sand and abrasive grit, your wheel bearings can cause trouble. Once they are loose and worn they can make wheels shimmy and wear out irreplaceable tires. Bearings are expensive, too. Depending on your car, they cost from \$10 to \$50 installed.

3. The Union Minute Men have special tools for this vital service. They remove the front wheels and carefully wash out the bearings with solvent. Then they force in under extreme pressure an especially compounded lubricant. This lubricant (exclusive at Union Oil stations) not only seals the bearings from dirt, abrasives and water, but it will also withstand heat as high as 360°.
