INSTRUCTIONS.—To find the Point Value of an item:
1. Find out the net weight of the contents from the label, if any.
2. In the line across the top of the chart, showing the weight in ounces and pounds, find the column in which this weight belongs.
3. Find the item in the listing of items in the column to the left.
4. The POINT VALUE of the item appears on the same line as the item and in the column listing the correct weight.
All Point Values must be determined by weight. If no weight is marked on the item, the item must be weighed.
In finding the Point Value of a container whose contents are given in field notes, consider the field notes to be the same as the standard weight ounce. One pint is one pound; one quart is two pounds.

The Point Value of any item weighing over four (4) pounds shall be arrived at by multiplying the number of pounds of that item by the Point Value per pound of that item as given in the "Per Pound" column. Fractions of a pound should be figured in quarter-pounds. Fractions of a quarter-pound should be figured in the next higher quarter-pound. Thus, an item weighing 4 pounds 9 ounces would be considered as weighing 4 pounds 12 ounces for the purpose of getting the Point Value of the item.

Chinese Enlist
Burma Cannibals

By KARL ESKELEND

CHUNGKING—(AP)—When the all-out allied offensive against Burma begins, former cannibals of the Lisu tribe from the rugged mountains on the Yunnan border probably will be fighting side by side with Chinese troops.

The Chinese government in the autumn of 1942 began organizing the men of these aboriginal tribes into fighting units which will operate as guerrillas and as guides for Chinese troops.

Replacing their bows and poisoned arrows, the 10,000 Lisus who already have received military training have been given rifles and cartridges, Dr. Wesley May of the New Life Movement medical unit, reported.

Dr. May, who studied at John Hopkins university, recently returned to Chungking after spending four months among the Lisus. No roads cross the unexplored mountain ranges which stretch from eastern Tibet to northern Burma. In the midst of these mountains—some of which are 13,000 feet high—lies Lisuland.

The Lisus, numbering about 100,000, are the most civilized of the nine aboriginal tribes living on the slopes of these mountains. An estimated 60 per cent of them have abandoned cannibalism, and several hundred of the Lisus have been converted to Christianity.

Foreigners Unpopular
The Lisus do not like foreigners. When the Japanese attempted to advance further into Lisuland, the aborigines dealt with them in the same way as they had dealt with other unwelcome strangers. On many mountain tops they gathered tons of large, round stones. When a Japanese column began marching along the narrow passways leading into Lisuland, Lisu guards blew their goat horn trumpets.

At this signal, Lisu warriors armed with bows and poisoned arrows rushed to the stone heaps. When the Japanese had reached a certain point along the paths, the stones were released.

Dr. May said that Lisu history tells already sing of how the invading Japanese were destroyed by the stones. Those who were not killed were hunted down by the Lisus, who, it is reported, took this good opportunity to revive their cannibalistic rites.

Employers' Bill On
Compensation Turned
Down By Committee

SALEM, Feb. 23. — (AP) — The house judiciary committee recommended to the house today that it defeat the employers' bill to freeze unemployment compensation payroll taxes at their present rate of 1 to 2.7 per cent.

If the house, which probably will act tomorrow, accepts the recommendation, it is highly probable that the legislature will adjourn without having made any changes in the unemployment compensation laws.

The employer bill wants to prevent the application of penalty rates—those between 2.7 and 4 per cent—when the fund is threatened with depletion.
