

### 'V' For Victory Sign Found Among Stars, Says J. H. Pruett

By J. HUGH PRUETT  
(Astronomer, General Extension, University of Oregon)

Tonight, should you look into the blue starry sky and see emblazoned high on its wall a flaming "V," would you feel that heaven was surely giving us a token regarding the outcome of the present world confusion? You are not apt to be startled by any such glaring symbol, yet this very letter is now written on the western evening sky, but in a form graceful and unpretentious. Its light will not attract the attention of the unconcerned for its figure is traced in delicate star points discernible only to those who have the interest to look up.

Tonight our victory symbol will be high above the western horizon and standing upright. The light of the full moon will dim the fainter stars somewhat, yet if the air is very clear there should be no trouble tracing it. By the middle of the week the moon will not rise until late, so this sky letter may be seen in all its glory. It will remain a fairly definite "V" for a few weeks but will gradually lose its most striking appearance as one of its bright components is a planet which specializes in wandering among the fixed stars.

At around 10 p. m. look almost due west and well up in the sky. You will immediately notice two bright stars quite close together and side by side. These are at the upper points of our letter. The one to the left is the orange star Aldebaran; the other, the yellow planet Saturn. Below these bright upper limits, there is little difficulty tracing downward through two short lines of dim

stars which converge to the faint star at the lower tip of the "V." The star half way down on the left is easily seen to be a double. If you use field glasses, the view becomes greatly improved as many more stars appear in the two lines and all become greatly brightened.

Aside from Saturn, this group is known as the Hyades (Hi-a-deez) and is always present in the western evening sky of spring, but very seldom are both arms of the "V" capped by bright objects. Saturn, in its orderly movement around the sun, chances at present to be lined up with the Hyades and thus gives added charm to this already delightful star group.

In ancient mythology the Hyades were considered the daughters of Atlas and half sisters of the Pleiades, the compact little group of tiny stars now so conspicuous immediately north of the "V."

In the literature of all ages this group has usually been associated with rain storms and has been referred to as "the rainy Hyades." Tennyson conformed when he wrote, "Thro' scudding drifts the rainy Hyades vext the dim sea."

### Maryland First To Top Red Cross Goal

WASHINGTON, March 20.—(AP)—Maryland is the first state in the nation to exceed its goal in the Red Cross' \$125,000,000 war drive, William C. Hunt, eastern area manager, announced today.

The state's goal was \$1,901,100, and it reported \$2,059,765 today. It was the first time in 10 years that an eastern state has been first to the top.

### AN OFT-REPEATED EXPRESSION... It's Your Face

**DR. PAINLESS PARKER SAYS:**

"But your natural countenance is distorted — people remark your changed appearance — your cheeks become hollow, muscles sag when missing teeth are not replaced with dental plates."

Nothing adds to your radiance like a warming smile. But when teeth are neglected you are afraid to smile. Mouths are drawn down at the corners, features become strained and pinched. Dental plates improve natural appearance with no sacrifice of comfort.

Select Plates that harmonize with individual features

Lifelike, lightweight plates that do not lose color or shrink are now being made by the dental profession from an improved material. They are so realistic it is hard to detect them—gums that match the color of your own and a crystal-clear palate that reflects the live tissues of the mouth. They are time-tested for strength and balance.

**TRANSPARENT DENTAL PLATES ON TERMS TO SUIT YOU**

**ACCEPTED CREDIT**

Pay for plates as you wear them.

**BUY BONDS AND STAMPS FOR VICTORY**

**TRANSLUCENT TEETH FOR DENTAL PLATES**

Refined artificial teeth that absorb and reflect light as do your own natural teeth.

**DENTAL PLATES RELINED AND REPAIRED**
