

7-Mill Levy—

(CONTINUED FROM PAGE 1)

trict valuation of \$14,781,612, you get:

Levy before subtracting \$105,000 18.8
Mill equivalent of \$105,000 7.1
Actual levy 1943-44 11.7

So the school board and your budget committee say to the people:

"Let's take 7 mills and put it right back into accumulating a construction fund for the new high school as one of the first items in that Stockpile of Jobs and Projects with which to meet the post-war bump."

So you continue the calculation:
Actual levy 1943-44 for present use 11.7
Construction fund levy 7.0

Total levy 18.7
Last year's levy 18.2
Net add 0.5

Out of cash savings in recent years, the school board has already acquired the huge high school site in the Amazon just south of 19th street between the line of Patterson and the stadium on South Willamette. (It has also acquired large tracts adjacent to Woodrow Wilson and Frances Willard.)

When the first unit of the new high school is built, Woodrow Wilson will be moved to the old high school building, Lincoln school to the Wilson plant. Substantial additions to all the main grade schools are contemplated and as population grows there probably will be at least one new grade school east and west.

In the Eugene schools (now that debt charges have been brought under control) 62.8 per cent (\$314,000) out of the total budget of \$499,930.92 goes for teaching.

Distribution of next year's budget is shown in the accompanying table.

The 6 per cent pay increase does NOT include the superintendent, clerk or administrative officers—only teachers, janitors and operating personnel.

Pay of teachers is regulated according to a schedule agreed upon by the board and teacher committees some years ago after much study.

The starting pay ranges from \$1,248 for a teacher without advanced training and no previous experience to \$1,380 for a teacher with a bachelor's degree or \$1,392 with a master's. After seven years the teacher with degree rating may get as high as \$1,542; after 15 years the master may get \$1,980. With "increments" for long and faithful service, the scale ranges from \$1,560 to \$2,088.

Over the last three years salaries have been increased approximately 15 per cent including the coming year's 6 per cent advance. We pay our superintendent \$5,500 a year. High school principals range from \$2,398 to \$3,888. Grade school principals range from \$1,988 to \$2,244.

It is pointed out in the budget report that even with the increases teacher pay in the Eugene schools is still low in relation to the competition from other districts and from war activities. The Eugene schools have 18 teachers absent with the armed forces. More may go and replacements of high calibre are hard to get.

NEW LIQUORS RATIONED
PORTLAND, May 29.—(AP)—Rum, brandy and distilled cordials were brought under rationing by the Oregon liquor control commission today. Permit holders are limited to one quart of these liquors weekly.

NEW SUPERINTENDENT
SILVERTON, May 29.—(AP)—The selection of A. B. Anderson, Salmon, Idaho, to succeed H. W. Adams as superintendent of schools, was announced today by the Silverton school board. Anderson attended the University of Oregon.

CITY SCHOOL BUDGET DISTRIBUTION TABLE

General control (superintendent's office).....	\$ 13,370.00
Supervision (in schools).....	26,938.00
Instruction (teachers).....	314,001.00
Plant operation (janitors, heat, etc.).....	34,145.00
Maintenance and repair.....	20,710.15
Auxiliary agencies (health nurses, playground, recreation work, juvenile work.....	8,338.00
Fixed charges (insurance, etc.).....	6,784.38
Capital outlay (additional ground, permanent building improvements).....	26,736.80
Debt service (short time warrants).....	2,000.00
Emergency.....	10,000.00
Total General Fund.....	\$463,523.42
Bonded debt and interest.....	36,407.50
TOTAL BUDGET.....	\$499,930.92

(CONTINUED FROM PAGE 1)

lors, totaling 64, will attend vespers this afternoon at 4:30 at St. Mary's Episcopal church. Rev. E. S. Bartlam, rector, will give the sermon. The graduation exercises are to be held Wednesday evening at 8 in the music building on the campus. The speaker will be Dr. William C. Jones, head of the political science department, University of Oregon.

Woodrow Wilson junior high school's 265 ninth graders will be honored by promotion exercises in the school auditorium Friday evening at 8. Robert L. Phillips, principal, will present the class of 1943. Austin E. Dodds and E. H. Christensen, members of the board of education, will present the promotion certificates. The music will feature the seventh grade voice choir and the eighth grade chorus.

Promotion certificates will be presented to 157 ninth graders of Theodore Roosevelt junior high school Thursday night at 7:30 in the school auditorium. Mrs. Mildred Williams, principal, has charge of presentation of the class, and Gilbert D. McLaren of the board of education will present the certificates. On the musical program will be the school orchestra under Buford Roach, songs by the Roosevelt choir and the ninth grade, piano solo by Faye Schisk, cello solo by Bill Hall, and vocal solo by Derald Parks. Mrs. Genevieve Thompson, director of dormitories, University of Oregon, will give the address.

The starting pay ranges from \$1,248 for a teacher without advanced training and no previous experience to \$1,380 for a teacher with a bachelor's degree or \$1,392 with a master's. After seven years the teacher with degree rating may get as high as \$1,542; after 15 years the master may get \$1,980. PORTLAND, May 29.—(AP)—Wage negotiations between Pacific coast pulp and paper manufacturers and CIO employees halted today, to be resumed late in July.

University Selected For More War Classes

The University of Oregon has been selected as one of the three Oregon schools to offer additional army basic training courses, the war department announced Saturday night, according to an Associated Press dispatch.

Other Oregon schools selected are Oregon State College at Corvallis and the University of Oregon medical school at Portland. It was believed the war department announcement indicated that new programs besides the meteorology and pre-basic engineering classes now being conducted at the university would soon be initiated. Pre-medical training, pre-veterinary training and pre-dental training were suggested as possible courses to be added.

All of the newly designated institutions bring to 145 the number of colleges and universities taking part in the training of soldiers for technical phases of modern warfare. Additional schools will be named later, the department said.

Coal Strike Truce to Expire Monday Night

WASHINGTON, May 29.—(AP)—The United mine workers' night left the threat of a work stoppage next Tuesday hanging over their contract negotiations with bituminous coal operators.

The UMW policy committee, governing body of the union, met today between sessions of the negotiations but did not extend the working truce which has kept the miners in the pits since May 18. The truce expires at midnight Monday.

A union spokesman said an extension was not discussed but that the committee decided to stand by so it could be reconvened at any time to consider the status of the negotiations.

The conference meets again Monday.

The union and operators reopened collective bargaining under a war labor board order this week, but a strike remained a distinct possibility if the UMW leaders conclude no progress is being made toward a contract.

Snell Speaks at OSC Graduation Exercises

CORVALLIS, May 29.—(AP)—Governor Snell, speaking at Oregon State college's 74th commencement exercises today, promised that Oregon would keep faith with the graduating men soon to enter war service.

He also extended greetings to new President A. L. Strand, whose formal inauguration was combined with commencement.

Willard L. Marks, president of the state board of higher education, conducted the installation.

"Your responsibility will be to educate the young people for the duties of life and for leadership in solving the problems of industry, science and government," he told Dr. Strand.

Many of the 611 graduating seniors wore military uniforms.

Osteopathic Group Will Meet in Eugene

New wartime public health problems, including civilian fitness for war effort, wartime medicine and surgery, and means of alleviating the doctor shortage will be highlighted on the program of the annual meeting and war service assembly of the Oregon Osteopathic association, which is to be held June 3, 4 and 5 at the Osburn hotel, according to word received from Dr. Katherine Beaumont of Portland, program chairman, today.

Among the out-of-state speakers on the program will be Dr. Ballentine Henley, president of the College of Osteopathic Physicians and Surgeons, Los Angeles, California, who will be the guest speaker at the annual dinner, and also at a gathering of the women's auxiliary.

Dr. Henley, who is widely known for his services in government, education, law and religion, was formerly the director of co-ordination of the University of Southern California.

In addition to belonging to seven professional, social, and honorary fraternal organizations, Dr. Henley is a member of the American Academy of Political and Social Sciences, the American Political Science association, the Government Research association, and the Los Angeles, California and American Bar associations. He is a member of the civilian defense council of Los Angeles.

Other out-of-state speakers will include two faculty members, also from the osteopathic college in Los Angeles. They are Dr. Jack Frost of San Gabriel, clinical professor of roentgenology, and roentgenologist at the Los Angeles County Osteopathic hospital; and Dr. Edward T. Abbott, professor of surgery and chairman of the department of surgery. Dr. Abbott, who has been a faculty member of the college since 1920, is also the dean of the graduate school, and senior attending surgeon at the Los Angeles County Osteopathic hospital.

He will speak on "Lower Abdominal Surgery," and "War Surgery," while Dr. Frost will present two papers on "Gastro-intestinal X-ray Diagnosis," and "Technique in X-ray Work."

Among the state association executives and committee chairmen who will take active part are Dr. Fred S. Richards of Forest Grove, president; Dr. Sidney L. DeLapp of Roseburg, second vice-president; Dr. Floyd D. Logue, first vice-president, and Dr. John S. Gilhouse, chairman of the vocational guidance committee, both of The Dalles; Dr. Ralph M. Gordon of Salem, secretary; Dr. David E. Reid of Lebanon; Dr. W. W. Howard of Medford, chairman of the bureau of public and professional welfare; and Dr. Charles Beaumont, Dr. J. A. Van Brakle, Dr. Wendell Diebold, and Dr. Luther Howland, all of Portland.

Allies Continue to Blast Italian Cities

NORTH AFRICA, May 29.—(AP)—Powerful fleets of Flying Fortresses and Liberators spread the pattern of ruin to new areas of the Italian mainland yesterday and strong forces of lesser aircraft pursued their relentless campaign to knock out the island-based air defenses of the exposed peninsula.

Almost 100 Fortresses, spanning the greatest distance yet in their offensive against Italy from North Africa, bombed the submarine base, shipbuilding center and industrial port of Leghorn, 160 miles north of Rome and left a great cloud of smoke wreathing the docks, shipyards and oil refinery. (A Rome broadcast said King Vittorio Emanuele visited the hardest hit quarters in Leghorn this morning and also "betook himself afterward to a hospital where he stopped by the beds of the wounded.")

This was the first raid of the war against the home town of Count Galeazzo Ciano, former Italian foreign minister.

In a companion assault, a score or more of Liberators from the Middle East Air force, flying in two waves, dropped 80 tons of bombs on the air base of Foggia, 80 miles east of Naples, heretofore untouched in the current offensive. Several hangars were hit and at least 13 bombers destroyed on the ground.

PLANT DESTROYED

WOODBURN, May 29.—(AP)—Fire destroyed the Valley Manufacturing company plant here today at a loss estimated by operators at \$10,000. Workmen reported a blaze late last night. They thought they extinguished it. The fire flared up early today. Principal output of the plant was ax handles.

—AROUND OREGON—

(By the Associated Press)

Mr. and Mrs. Jack A. Long, Troutdale district, reported that a "patriotic" Rhode Island Red hen has been increasing the size of her eggs until she produced one weighing a quarter of a pound and measuring eight inches around.

At Portland, Commercial Iron Works launched its 36th naval vessel, a submarine chaser. . . . A war department contract of between \$100,000 and \$500,000, awarded this week to Brennan and Cahoon of Pendleton, is for a 36-bed hospital at the Umatilla Ordnance depot near Hermiston. Lt. Col. W. J. Hoffman, executive officer, disclosed. . . .

The Portland Chamber of Commerce reported that Oregon buying income increased 57.9 per cent, to \$1,263,210,000, last year. . . . Hermiston city officials said the town's new \$80,000 sewage disposal plant will be in operation about June 15.

Nazis Admit Soviet Gains on Peninsula

(By the Associated Press)

LONDON, Sunday, May 30.—The German radio announced early today that a Soviet battering ram had forced the German Kuban troops to "adopt a particularly elastic warfare"—the term used during last winter's axis retreat in Russia.

This was the first intimation that Russian power in the northwestern Caucasus had produced definite results in the Red army's effort to crush the narrow German bridgehead extending from Novorossisk on the Black sea across the Taman peninsula to Temryuk—but Moscow still remained silent on the progress of the fighting.

A midnight Soviet communique recorded by the Soviet Monitor merely said "fighting continued" northeast of Novorossisk in the Kuban river district—the same phrase used for three consecutive days.

Aid for Children of Europe Goal of Bill

WASHINGTON, D.C., May 29.—(AP)—Aid for physically handicapped children in this country and starving children in European countries under Axis control is asked in bills sponsored by Representative Angell of Oregon.

He said statistics revealed that 1,873,231 American children need special education but only 166,248 are getting it. Special training is needed, he said, for 1,057,368 children who have defective speech, 52,868 who are blind or partially so, 370,069 who are deaf or hard of hearing, 105,736 who are crippled and 264,342 who have low vitality.

Hundreds of thousands of children in Nazi-conquered countries gradually are starving to death, he told the house in urging that shipments of food from this country and neutral countries be allowed to pass through the Allied sea blockade of Europe.

Churchill Reported At Gibraltar on Trip

MADRID, May 29.—(AP)—Reports from La Linea said tonight that Prime Minister Winston Churchill arrived by plane at Gibraltar yesterday afternoon and continued his trip by air last night to an unknown destination.

It was also reported that Viscount Gort, governor of Malta, Gen. Dwight D. Eisenhower, Gen. Sir Bernard L. Montgomery, Gen. Sir Harold R. L. G. Alexander, and Gen. Georges Catroux were at Gibraltar within 24 hours.

Motorists Needed to Make Unique Gas Saving Test

Every patriotic Oregon citizen interested in conserving our resources and saving gasoline for Victory will welcome the achievement of an American inventor. Already thousands of car owners are using his invention and they report gas savings up to 30% as well as more power, smoother pickup and quicker starting. The device, called the Vacuum Gas Saver, operates on the super-charge principle and fits all makes of cars and trucks. It is entirely automatic and allows the motor to breathe. The manufacturers, the Vacuum Carburetor Co., 7617-821-B W. State St., Wauwatosa, Wisconsin, are offering a Vacuum-free to those who will test it on their own cars or trucks and help introduce it to others. Write them today.

Eisenhower Reports Tunisian Army Ready

ALLIED HEADQUARTERS IN NORTH AFRICA, May 29.—(AP)

Gen. Dwight D. Eisenhower said in a broadcast tonight that his team of American, British and French forces was ready for any further task and was determined to fight in concert with other Allied forces until "we shall have brought the last army to Germany, Italy and Japan to its inevitable 'Tunisia.'"

He ridiculed German propaganda efforts aimed at splitting the Allies as "anarchy and whimpers of helplessness." "This team is bound together by indestructible devotion to a

common cause," the Allied commander in North Africa said in a British program called "All Africa Calling Europe."

"We have waited the enemy's morale, for in this theater of war the best and proudest of his soldiers has been utterly destroyed. This he described as one of the most important results of the Allied triumph."

The most important triumph, he said, was the high degree of proficiency gained in Allied teamwork.

Another result of the victory was the seasoning of the British First army and the American Second army which "have become formidable fighting machines," the general said.

Eugene, Ore.

You can't go to work on tires alone!

Save your tires, sure—but SAVE YOUR WHOLE CAR AS WELL!

No matter how you nurse your tires along, they won't do you a bit of good if you neglect the car they're mounted on.

Not that we're trying to minimize the importance of proper tire care. We ourselves offer as complete a tire-saving program as you could find anywhere—including wheel alignment, wheel balancing and scientific brake equalizing.

No, we don't want to talk down the importance of your tires—we want to talk up the importance of your whole automobile. Remember, no new cars are being built at all. Your present car must last. That means you need a program of complete, all-round maintenance service. Not just tire inspection. Not just lubrication. But these things plus all the other vital services so necessary to counteract the possible "ill effects" of today's low speeds and limited driving.

We offer just such a complete, up-to-date service program. Why not see us today!

RUBBER IS VITAL BUT—

DON'T NEGLECT OTHER VITAL PARTS LIKE THESE!

Brakes not equalized wear out fast. Worn linings result in scored drums.

Valves improperly adjusted are subject to burning out and must be replaced.

Distributor points, made of vital tungsten steel, must be kept adjusted to prolong life.

Piston and rings must last longer if safeguarded by proper lubrication.
