MILLER'S

SAYS...

"Synthetic Tires? Believe us.... GENERAL scooped the industry for LONG MILEAGE!"

First thing people say when they come in is, "Sure I know it's a General... but how's it for mileage? Just how good are these synthetics?"

Well, sir, mileage records that seemed too good to be true were rolled up by today's new General on desert test car fleets.

Too, this General is on hundreds of taxi-cabs, coast-to-coast... and delivering complete mileage satisfaction.

Then, thousands of these Generals are on passenger cars everywhere. Users tell of mileage beyond expectations; often more than ever before.

These statements are certified... and backed by local people who know from experience about the new General. Ask us for their names and let us show you what they say.

Truly America's new long mileage tire, it's built the way Generals have always been built... Top-Quality throughout. With General's famous slow-wearing, quick-stopping, Silent-Grip tread. Same extra strong, cooler

running cords... from General's own mills, as always. And, made by those same quality-skilled workmen of General's.

The only difference from pre-war is in the rubber... and from the record... General has a special knack in compounding synthetic for long mileage!

Every tire is still precious. You must have yours recapped, if possible. But, when you do get a new-tire certificate, use it for the best: General's proved Top-Quality.
