

Story Of Horse Evolved By Exhibit

Lovers in Eugene may study the evolution of old from a creature about the size of a fox to his present form in an exhibition now on at the entrance to the museum of natural history in Con-

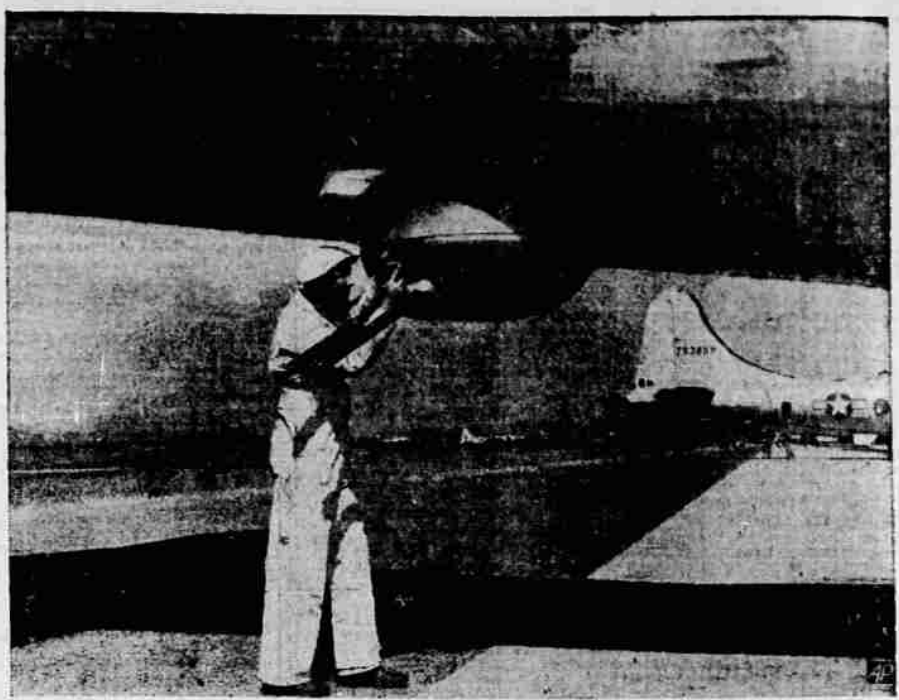

hall on the University campus. They may also blush at their pretensions when they learn the horse has about 55 million years of ancestors behind

It is to be seen is the famous leg of the lower leg of a three-toed horse discovered by Dr. Condon, Oregon's first geologist, head of the university anthropology department

Director of the survival of the fittest largely on speed. Thus the horse's leg and skeleton has transformed it from a three-toed to a one-toed animal

associated with the change in the proportion of the bones of the leg. Dr. Cressman, head of the department of geology, said the long head with teeth adapted for grazing has taken the place of a small head with developed incisor teeth suited for defense.

Red Star Criticizes U. S. Industries

MOSCOW — (AP) — The army newspaper Red Star has criticized certain unnamed American interests for expressing sentiments in behalf of German industries and demanded economic disarmament of the reich after victory.

The article added that unless the allies agreed on the liquidation of German monopolies, the reich again would become the center of international cartels spreading over Europe and Latin America.

Timid Servant Girl In Pinsk Plants Bomb Killing Gauleiter

By M. H. HANDLER MOSCOW, Oct. 12. — (UPI) — Galya was a timid servant girl in Pinsk during the German occupation. She didn't have the courage to flee and join the partisans. So she kept on working for William Kube, nazi gauleiter of White Russia.

Kube had terrorized all of White Russia, killing thousands of patriots and putting between 70,000 and 80,000 Jews in concentration camps or foul, crowded ghettos.

Private Fliers Told Planes For Sale

Private fliers of the Eugene area who want to get ready for resumption of activity are being invited to get together Friday night at 8 at the vocational school on the old city airport to study lists of trainer ships which are being sold as surplus by the government.

Yale Smith, George Mast, Don Tilden and Clarence Crocker of the vocational school aviation mechanics staff have returned from a trip to Tacoma and Olympia with a complete list of the ships which are now being made available to private fliers.

Japs Preserve Discipline In Surrendering

BIAK ISLAND, Dutch New Guinea — (AP) — Outposts guarding an American infantry bivouac in Biak's interior plateau were amazed one morning recently to see a column of eight unarmed Japanese marching briskly toward them across the grass-covered plateau.

The enemy soldiers obviously were in poor condition, starving and weak, but they held themselves erect and in close order, keeping step unflinchingly. Their leader, a second lieutenant, saw to that. Discipline to the last.

During this procedure one of the outpost guard, PFC Anthony Perone of Greenvale, Nassau, N. Y., offered a cigarette to one of the Japanese soldiers, who reached for it gratefully, relaxing necessarily from strict attention to do so.

America's Autos Designed For Women

PORTLAND — (AP) — America's automobile manufacturers design cars for women—not for men—the president of the society of automotive engineers said Thursday.

James, chief engineer of an automobile manufacturing firm, predicted a post-war automobile differing only slightly from 1942 designs. War production, except for technical manufacturing methods, has not developed improvements applicable to peacetime vehicles, he said.

Truman Urges 'TVA' For Missouri Valley

NEW ORLEANS, Oct. 12. — (UPI) — Sen. Harry S. Truman said Thursday in an early morning radio talk pointed at farm audiences, that projects patterned after the Tennessee valley authority on other large tributaries of the Mississippi river would be a major step toward a permanent solution of flood control problems.

Truman, democratic nominee for vice presidency, spoke over a special hookup of Mississippi valley radio stations in the first of two "nonpolitical" addresses on flood control. The second was scheduled for a luncheon session of the Mississippi Valley association.

He joined President Roosevelt in recommending a Missouri valley authority, similar to the TVA, to provide an integrated program of flood control, irrigation and power development along the Missouri river.

Mrs. David B. Evans Wins 'President's' Trophy At Country Club

Mrs. David B. Evans, shooting a net average of slightly under 80 strokes for 18 holes, captured the 1944 "President's Trophy" championship at the Eugene Country club this week. Posting the four best scores in eight tests, Mrs. Evans had an aggregate 318 for the 72 holes, nine strokes better than the 327 scored by Mrs. M. G. Howard, runner-up.

In regular weekly sweepstakes, Mrs. L. B. Sigwart won in group one with a net 80, and Mrs. J. F. Roadman in group two with a net 89. Final regular "ladies' day" play will be held next Wednesday with election of officers for the coming year scheduled for Oct. 25.

Simple Test Aids Thousands Who Are Hard of Hearing Thanks to an easy non-risk hearing test, many thousands who have been temporarily deafened now say they hear well again. If you are bothered by ringing, buzzing, head noises due to hardened or congealed wax (cerumen), try the Oursine Home Method test. You must hear better after making this simple test or you get your money back at once. Ask about Oursine Ear Drops today at Hiron's Everybody's Drug 886 Willamette

CHECK THESE HAZARDS IN YOUR HOME. Keep matches in metal containers and away from small children. Inspect, repair if necessary, faulty furnace pipes and flues. Be careful of the worn electric cord and the defective flatiron. Look at that rubbish pile in the cellar, attic and closet. Clean it up today. Watch where you put that cigarette. Careless disposal is a great fire hazard. Never leave greasy or kerosene around the home. Put ashes in covered metal containers—always. Don't use wooden ash baskets or barrels. REMEMBER, IT IS EASIER TO PREVENT A FIRE THAN TO PUT IT OUT!

IT'S A Burning Shame BUT... 4 OUT OF 5 TIMES FIRE IS CAUSED BY CARELESSNESS There's A War Going On! Let's Feed Fighters, Not Fires! Even while you are reading this, three—maybe four—dwellings in the United States will catch on fire. Within the next hour some person will be burned to death in a fire. Within a year 10,000 persons, more than half of them women and children, will lose their lives in fires. Every day of the year property damage from fire is approximately one million dollars. Appalling, isn't it? Yet these are statistics compiled by the United States Fire Protection Association. What can we do to prevent this tragic loss? Can we afford to go on—year after year—losing 10,000 citizens and burning enough houses to shelter four times the entire population of the city of Portland? Oregon's fire loss in dollars was \$4,829,918. Forty-two per cent of this loss, or \$2,033,312 occurred in unprotected rural and farm areas. Fire and burns were responsible for 92 deaths during the past year—the largest number reached in Oregon in any one year in history. Loss by fire in Oregon in the past ten years has been more than thirty-two million dollars. Almost 42 per cent of this appalling loss was the result of fire from "unknown causes"... What percentage of these "unknown causes" might simply be labeled "Carelessness"? Four times out of five, the fires that burn our houses and our places of employment are because of carelessness in the way we dispose of rubbish and ashes, carelessness in the way we handle matches and cigarettes and carelessness in the way we mistreat electrical and heating equipment. Fire Prevention Week is from October 8 to 14, but we MUST observe fire prevention every week of the year. Let's face the facts. It's up to each and everyone of us as individuals to work together each day to keep fire loss down. INSPECT... DETECT... CORRECT... FIRE HAZARDS!

Observe Fire Prevention Week... Oct. 8-14

This statement has been prepared and released by BLITZ-WEINHARD COMPANY with the approval of the National Fire Protection Association
