NEW DISCOVERY

Assures Less To Wear To

HEAR BETTER

One of the most important discoveries ever made in hearing aid assures new hearing comfort to thousands of persons who were formerly reluctant to wear an aid.

This new discovery, the Belton Hearing Aid, entirely eliminates the extra battery pack and the noisy battery cord.

Five different models, each with selective tone and volume controls, help in fitting some of the most difficult cases.

Clear, natural tone without static and cord noises.

In Oregon and Southwestern Washington it is distributed by JAMES TAIT and Associates, who have been serving the hard of hearing since 1934 and are widely recognized in this work.

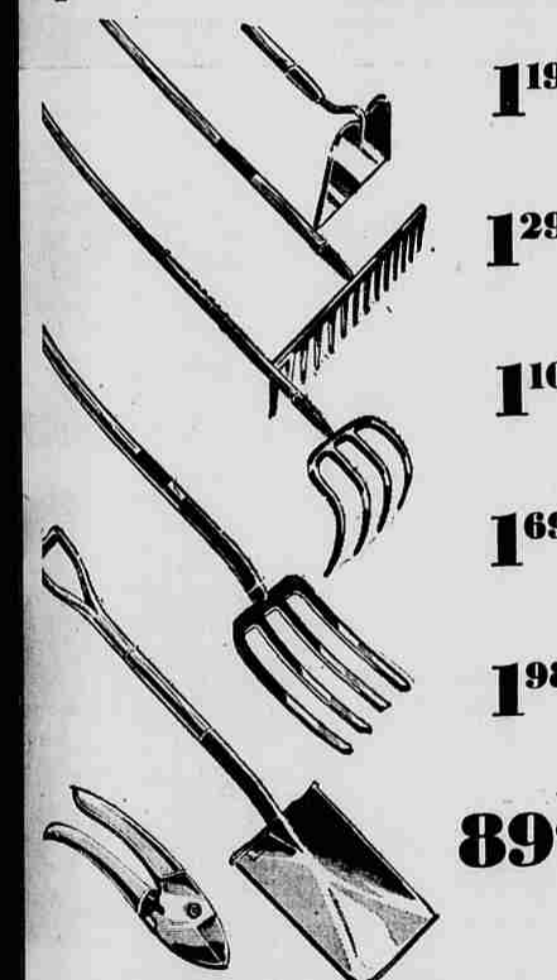

For complete home or office demonstration or free descriptive booklet, address JAMES TAIT and Associates, 611 Lumbermen Bldg., Portland 4.
