Science can help give most women a younger face and throat

Seems too good to be true, doesn't it. But it's a fact. Science through ENDOCREME, can, for most women, help improve the skin itself, not merely its superficial appearance. For thousands ENDOCREME... with its 7-year record of success... is getting results hitherto thought impossible. This is because it contains ACTIVOL™. This great scientific discovery, ACTIVOL™ is the laboratory counterpart of a natural, skin-vitalizing substance that, in most women, decreases with age. ENDOCREME helps compensate for this loss. Absorbed beneath the skin's surface, it works to build cells, firm tissue. Thus, most skins tend to take on new youthfulness, to become fresher, firmer, smoother, more alluringly beautiful again. Isn't this the best way you can invest your cosmetic dollars? Many report vast improvement in only 30 days.
