

School District Area Population Increases

SPRINGFIELD — The area served by Springfield School District 19 last year increased more than 1000 in population, according to estimates based on a census of school-age children.

The 1945 census of children from 4 to 19, inclusive, was 2803. A recently completed 1946 census indicated 3102, a gain in child population of 299.

The district includes Springfield, Maple, Mt. Vernon and Hayden Bridge. Multiplying the 1946 tally by the national average of 3.5 persons per child in the census group, the estimated total population was 9810. This figure also was an increase of nearly 1000 over 1944.

Sever Assessment Corrections Begin

SPRINGFIELD — Adrian Vaal, engineer on the main trunk sewer job, has begun work to correct assessment maps, City Recorder K. R. Gile said Saturday.

The maps were ordered corrected at a special city council meeting Thursday night after it was discovered that the maps drawn for linear foot assessments were in error in depth of the lots. Originally the council indicated it would assess on a front foot basis and the maps were drawn on that basis, where lot descriptions were hazy, only the front feet were traced down.

During the course of the first assessment, started Dec. 9, it also was found that some ownerships were incorrectly reported. These also will have to be traced down before new assessment figures can be made, Gile said.
