

Former Oregon Chancellor Sees Russians as Anti-Peace Leader

Russia heads the list of factors "working vigorously and positively against permanent world peace" according to Dr. Frederick M. Hunter, who spoke Wednesday before the Eugene Lions Club.

The ex-state chancellor of higher education asserted that "Communism became dangerous when the Marxian version was introduced." This version teaches, he said, that "the end justifies any means whatsoever—this resulted in state socialism as the instrument of communism. The most dangerous elements of this situation are absolutism and tyranny."

'Natural Nurture'

The world setting of demoralization, poverty, hunger and misery is "the natural nurture of revolution," Hunter pointed out, "and this setting is the perfect one for Russia, with her alluring communistic ideal as bait."

Hunter laid the third factor working against world peace directly in the lap of United States "selfishness."

"Our traditional habit of personal selfishness we call 'isolationism,'" he said. "We want 'business as usual' and we won't give up any of the fruits of our victory, even though it means the eventual saving of the entire world from communism."

Hope in U N

The United Nations was characterized by Hunter as being "the greatest hope and the best assurance of a permanent peace." The organization is not a completely implemented body yet, he admitted. "Just as the United States of America, in its beginnings, was unsure of its destiny," and in the meantime the United States policy of "helping out" was advocated by Hunter.

He pressed for immediate adoption of the Baruch plan for control of atomic energy with international inspection stated "in clear, definite and complete terms."

Turk Premier Warns of War

ISTANBUL — (AP) — Istanbul newspapers quoted Premier Recep Peker Thursday as telling a group of merchants at Izmir that "it is quite possible we might

wake up one morning and find ourselves in a war."

The premier's warning, press dispatches said, came Wednesday night in a reply to a request that the merchants be permitted to export wheat—an item which Turkey has kept chiefly for home consumption since the beginning of the last war.

Peker was quoted as saying that Turkey had plenty of wheat this year, but that she still must hold herself prepared for eventualities.

"Under prevailing conditions of today our big neighbors should not declare war. It is absolutely so, but logic is not enough. We cannot judge everything according to our own logic."
