Roosevelt Women Plan Radio Show

NEW YORK — (U.P.) — Mrs. Eleanor Roosevelt, widow of the late President, and her daughter, Mrs. Anna Roosevelt Boettiger, will begin a national radio show entitled, "Eleanor and Anna Roosevelt," on Oct. 4, the American Broadcasting Company said Monday.

The program, to be heard five afternoons a week over the network's coast-to-coast system, is available for commercial sponsorship, ABC said. The network said the two stars would receive "a considerable amount of money for their broadcasts."

The mother and doughter will discuss national and world events, food, travel, housing, fashions, reconstruction, the theatre, literature and education, ABC officials said.

The shows will originate from Hollywood where Mrs. Boettiger makes her home and from wherever Mrs. Roosevelt happens to be. Mrs. Roosevelt, who sails for Europe Sept. 23 for the meeting of the United Nations, will broadcast her portion of the program shortwave to this country.

Retort Firm Conducts Trial Of New Waste-using Plant

With the future of the alcohol from wood waste plant still in the air last week, another local waste utilizing operation was given its first trial run of commercial proportions. It was termed successful.

F. E. Siemens, business and industrial broker of Portland, said Saturday night the Phillipson Retort Manufacturing Co. of Eugene last week completed its first commercial-sized retort unit to make charcoal from mill waste.

More Tests

Stockholders and officers of the firm — most of them members of the Western Forest Industries Assn. — viewed the trial run last Thursday.

A further intensive shakedown by standard methods takes from three to five hours.

The Phillipson retort produces charcoal in 15 to 20 minutes, thus cutting production costs proportionately. The raw material is mill and forest waste.

Weather Delay

The firm was organized here last October but high water and excess rain last winter and spring made it impossible to start actual construction of the retort until late in April.

At present, only one retort has been built but the company plans no less than 10 on its Eleventh Ave. W. site. A 10-retort plant would handle about 240 units of wood waste every 24 hours.

This would produce approximately 70 tons of briquets and 12,000 gallons of bypdoducts. The annual output of wood tar from such a plant is estimated at 8,600,000 gallons.

Siemens said since the firm announced its intentions to produce charcoal last year officials have received letters from industries in all parts of the country asking for prices and samples. One firm alone said it needs about 100,000 tons of briquets annually.

Little Queen Skips Town

HOLLYWOOD —(U.P.)—Pigtailed Kathleen Cecile Flynn, five-year-old Spokane, Wash., lass crowned Little Miss America, was hurried home by her mother Monday before movie and radio agents got a chance to offer prizes, guest performances and a movie contract.

"We'll just have to turn them down," said her mother, Mrs. Howard A. Flynn, after Kathleen was crowned before 10,000 persons at Hollywood Bowl Sunday.

"I've got five other youngsters at home and they need my attention. Thanks an awful lot, anyway," said the wife of a Spokane elevator mechanic.

Michael Louis Perich, 12, Sacramento, Cal., son of Peter J. Perich, bank employe, decided to stay for a few days and look around, however, after being judged winner in the All-American Boys contest.

Underground Favors Formosan Independence

TOKYO—(U.P.)—An underground organization pledged to gain independence for Formosa is working in Japan.

Agents are smuggling themselves between Formosa and Japan and between Japan and China.

The chief aim of the organization is to be represented at the Japanese peace conference and plead for a United Nation's plebiscite to determine Formosa's future.

The leaders of the underground say they are opposed to the Japanese and to Japanese control of the island, because of the way Japan ruled the island before the war. The underground leaders also are against Chinese control because they believe China is carrying out an economic policy detrimental to Formosa.

Jets Schedule Extra Race Events

INDIANAPOLIS —(U.P.)— Nine Air Force pilots will race their jet-powered F-80 shooting stars from here to the Cleveland air races next month, it was announced Monday.

The pilots will take off at 30-second intervals and compete on an elapsed time basis with the stipulation that they must fly the course at a 30,000-foot altitude.

Pilots competing in the event will come from the 1st Fighter Group at March Field, Cal.; 4th Fighter Group, Andrews Air Base, Washington, and the 56th Fighter Group, Selfridge Field, Mich.

Tito Police Purge 'Moscow' Type Reds

BELGRADE —(U.P.)—Reliable reports said Monday that 50 members of the Yugoslav secret police were among hundreds of persons arrested in a widespread purge of all anti-Tito Communists in the country.

The purge began in Montenegro after four members of the Montenegro government were dismissed Aug. 4 and since then has spread to all parts of the country, the reports said.

It was understood that all 5000 members of the Ozna, Marshal Tito's secret police, are involved in running down and arresting Communists suspected of being sympathetic to the Communist Informa-

HOME EDITION **LYONS HOME FREEZING NEWS** Vol. 1 No. 9

MONDAY, AUGUST 23, EUGENE, OREGON

CORN IS NOT CORNY

GOOD NEWS for all you corn lovers! The price of corn will be down within the next ten days. Then buy and buy and freeze and freeze to your heart's content! There is a chance the price may be lower sometime within the next week. If so, the proper varieties for freezing are Carmelcross, Tendermost, Golden Cross Bantam, Ioana. Use only the ears with the rich milky, sweet juice. Husk the corn and remove all silk. Blanch the corn from 8 to 10 minutes. Cool quickly in ice water, and drain. Wrap each ear separately in moisture proof locker paper, or pack desired amount together in a large container, either plain or enameled cans.

THISA AND THATA

Green beans are still plentiful and cheap. It's truly amazing how one vegetable can stay on the market for so long a time without completely giving up and dieing! A completely different constitution than blueberries or raspberies. The proper varieties for freezing are Kentucky Wonder, Tendergreen, Full Measure, Stringles Green Pod, Blue Lake, Round Pod Kidney Wax. Sort out only the greenest, firmest beans, wash carefully and cut to desired length, usually about 1½ inches. Blanch the beans from 3 to 4 minutes. Cool quickly in ice or running water, drain well and pack in freezing containers.

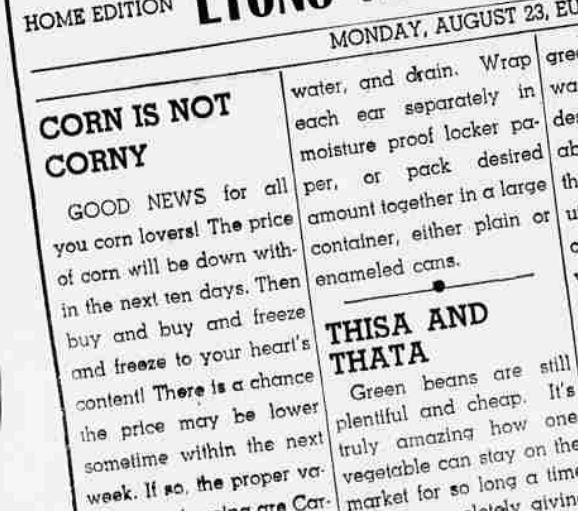

Peaches are on the market in quantities. Never have we seen such luscious, pink peaches and fairly inexpensive, too. Unfortunately the peaches right now are not the correct variety, something to do with water content. At any rate, the freezing peaches should be here by the first of September. By "here" we mean, here at low price!

Spinach, Cauliflower, Brussel Sprouts are not from the local farms yet. They're still being imported from Sacramento, Los Angeles and other produce growing localities. Why not wait 'til fall to buy vegetables for freezing? They'll be much cheaper then.

The meat situation right now it too ticklish to even talk about. Let's ignore meat and eat fish!

WHAT TO PUT IN WHAT

There are only seven requirements for a good freezing container. First of all it should be easy to label. Second easy to handle and fill, third, strong and durable. Then of course the container must be moisture-vapor proof and easy to seal, sturdy enough to maintain a liquid-tight seal and economical of storage space. Almost any old tin can would do.

The home freezer you want is the one that will give you the most dependable service. When you compare, you'll agree, the G.E. Home Freezer is your best buy at any price. See it tomorrow on display at LYONS.

New! revolutionary tandem

4-WHEEL FARM WAGON

162.50 LESS TIRES

Pay Only 17.00 Down

Smoother riding — tandem suspension wheels absorb shocks.

Easier to pull—takes less power going over bumpy ground.

Easier to maneuver—turns sharply, trails without whipping.

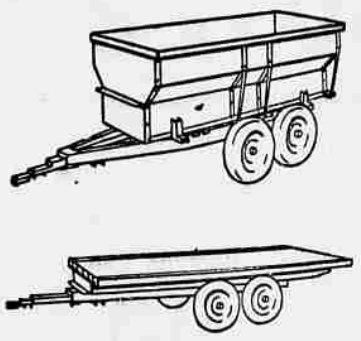

Eliminates twisting of body—bed cannot twist at corners.

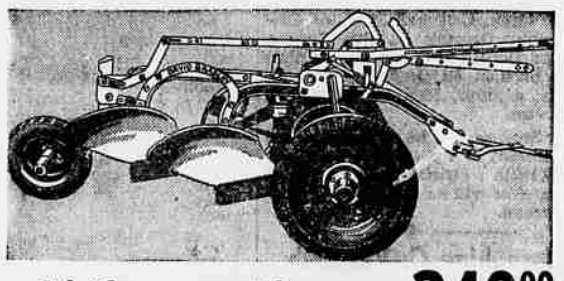

Here is the secret—Wheels ride over bumps independently—raising axle and load only ½ as high as with an ordinary wagon. Box steel suspension bars act as a lever in lifting body over obstacles, cushioning bumps.

BUILT FOR HEAVY DUTY

The new DAVID BRADLEY Tandem 4-Wheel Wagon gear uses a brand new principle in farm wagon construction. By suspending tandem wheels on a single main axle our engineers have obtained the smoother riding, non-twisting features of caterpillar-type tread . . . makes your flat bed or wagon box last longer . . . keeps loads safer and more stable . . . makes trailing easier. Carries 4,000 lb. load. Frame is braced by 4-inch crossbars—electrically welded. Sturdy.

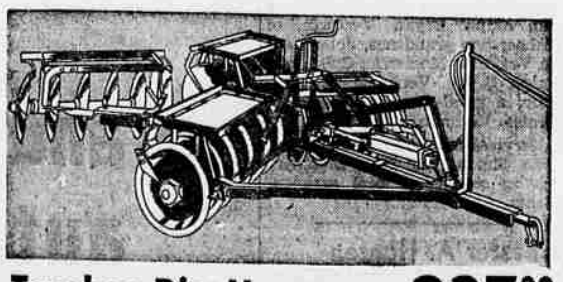

Use Sears EASY PAYMENT PLAN

Hi-Clearance Plow **240.00**

David Bradley 16-inch PAY ONLY 23.00 DOWN

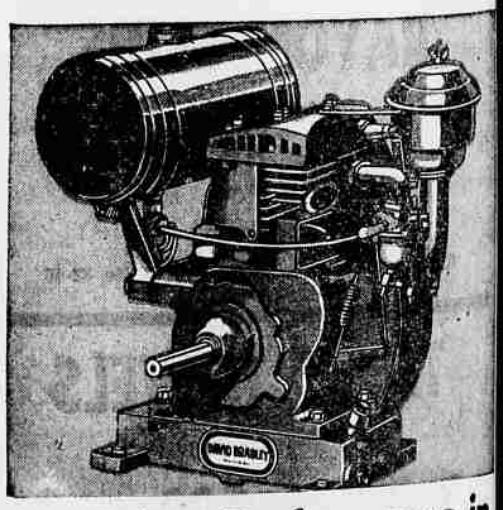

New type, high speed tractor plow with axles over the beams to give exceptionally high trash clearance. Quick-acting, high level lift operates on ½ turn of power wheel. Strong I-beams. Less tires.

Tandem Disc Harrow **237.00**

7-foot — 18-inch Blades PAY ONLY 24.00 DOWN

Heavy duty, high speed David Bradley Harrow . . . built for fast, safe hydraulic control. A finger-touch angles or straightens gangs instantly for better discing . . . no ridging on turns.

Amazing Performance in "Economy" Gas Engine

97.50

Popular 1¾ H. P. Size

Famed Briggs and Stratton quality assures a low-running expense, but with extremely versatile use around your farm. Uses only ⅛ gal. gasoline per H.P. per hour. Precision built, air-cooled, it runs smoothly, is adjustable for speed. Starts easily. Come in and see one now.
