State Ballot Includes Bill To Change Hydro-Electric Act

By Eldon Barrett  
United Press Staff Correspondent  
SALEM —OR— Among the 11 state measures that will be on the general election ballot No. 2 are bills to amend the state's 1931 Hydro-electric Act and to create a woods camp for delinquent boys.

Probably no measure on the ballot has stirred up as much controversy as the hydro-electric electric amendment. In the 1947 legislature this measure was known as "Senate Bill 99." It was passed by both houses, vetoed by the late Gov. Earl Snell, then passed over the veto.

**Started Petition**  
Public power and farm organizations, spearheading the opposition, invoked a referendum petition to let the voters decide the fate of the bill.

The complicated measure is designed to protect investments of private power companies when they construct hydro-electric dams in the state.

Under existing law, private companies can be licensed to build power dams, but the state or any municipality, including public utility districts can "at any time" take over the project after giving two-year notice and payment of "fair value not exceeding the net investment, plus any "reasonable" damages.

**License Rule**  
If the measure is approved, the state, any city, county or PUD can acquire a private power dam only after the expiration of a company's license. Licenses generally are issued for 25 to 50 years.

In other words, private power companies can hold and operate their hydroelectric dams during periods for which they are licensed without fear of having them taken over by public interests if the bill is approved.

Primarily, the controversy over the bill represents a fight between private and public power advocates.

**Boys Camp**  
The measure to establish a boys camp is one referred to the people by the 1947 legislature. It calls for establishment of a camp for delinquent boys at Reeher's civilian conservation corp camp near Timber, Washington County.

The measure was submitted to the people only to comply with the constitutional requirement that location of a new state institution outside of Marion County needs approval of the people.

**Segregation**  
The idea behind the measure is to segregate inmates of Woodburn Training School for boys. Incurables would stay in the Woodburn institution. The others would be placed in the camp.

The measure also carries an appropriation of \$150,000, one-third of which is for establishing the camp and the other \$100,000 to operate it until the end of the biennium, June 30, 1949.

From where I sit... by Joe Marsh

I'm Glad We're "Different!"

From where I sit, so long as we never become intolerant of one another's different tastes—so long as we live together with our differences, and even supplement them the way brome grass does alfalfa, then we're a mighty good crop!

So neighbor—enjoy your cider while I enjoy my beer! Vote for your candidate—I'll stand by mine! But never let our differences divide us!
