

CAMP LANE THRILLS 4-H'ers

★ ★ ★
AVID BUTTERFLY CHASER is David Lake, 10, one of the many Lane 4-H'ers who found Camp Lane on the banks of the Siuslaw a week of fun. The sun-tanned kids returned to their homes this week after "roughing it in tents." Lane County contains more than 300 local 4-H clubs whose 4000 individual projects during the past year have done much toward the theme, "Creating better homes today for a more responsible citizenship of tomorrow." John Gurton, county extension agent in 4-H work, expressed hope the facilities might be expanded but fully endorsed the summer camps success.

LANE'S 4-H CAMP ON THE SIUSLAW (below) occupies an imposing site beside the river approximately 40 miles west of Eugene. For the summer camp July 10-17 more than 100 youths and 11 counselors enjoyed the outdoor life for a solid week of camping, hiking, swimming, nature study, and fun. The central building of the former Government CCC camp is shown. In addition to offices, this large log structure houses the messhall.

VARIED SPORTS HELD the interest of the Lane 4-H'ers who contended the camp should last the full summer. Total tuition paid for the outing was \$16 per person with most of those in attendance backed by a sponsor or scholarship. Cliff Columbia, 16; Myron Blair, 11, and Bobby Gheen, 10, check their skill at archery.

HUNDREDS OF QUESTIONS were answered at Camp Lane by Prof. F. P. Sipe, University of Oregon botanist, who held classes at Camp Lane and later at Camp Clearwox for the Girl Scouts. Many of the group leaders are University of Oregon students, and all are volunteers, Mrs. Melba Heide, assistant extension agent, observed.

CAMP LANE ON THE SIUSLAW has become so popular among members of the 4-H clubs that the one week encampment will be lengthened to a two-week period next year. More of Lane's youths will be given an opportunity to make the excursion. Entire encampment is shown in above photo getting the days suggested program from camp leaders. BPA Engineer Takes New Job

Lorin Moore, for the past year electrical engineer with the district office of the Bonneville Power Administration here, assumed his new duties as district engineer this week.

Moore takes the post left vacant following the transfer of Howard C. Elmore, who has become branch manager of the North Central Washington branch office of BPA at Wenatchee, Wash.

The new engineer had previous experience in BPA's Portland offices for the Lower Columbia, both in the district office and the general engineering office.

He served four years in the Navy with the rank of lieutenant-commander, two years on the West Coast and two years in the Pacific.

Before entering government service, Moore was employed by General Electric at points between Schenectady, N. Y. and Salt Lake City, Utah — his home town.

He holds a degree from the University of Utah in electrical engineering and did post-graduate work at Union College, Schenectady.

His duties with the Eugene office will include direct responsibility for customer service prob-

lems, formation of plans for integration of new Bonneville facilities with customer service connections and engineering work in connection with system planning and budget.

Bad Check Brings Suspended Sentence

Circuit Judge G. F. Skipworth Wednesday said that Herbert P. Ley, of Portland, had been punished enough after 18 days in the county jail awaiting disposition of charges that he published a bogus check at a local tavern.

Ley pleaded guilty to cashing a \$15 check while drinking beer one night last month.

The judge, in ordering 30 days in jail, suspended, said that the tavern keeper was partially at fault for furnishing an intoxicated person with a check form, cashing the check, and then continuing to sell beer until the ill-gotten proceeds from the check were exhausted.

The newspaper said Dimond was only once reversed in a decision by a higher court.

TYPHOON TOLL RISES
 TOKYO — (AP) — Delayed reports to national rural police have raised to 28 the death toll in a typhoon which hit Kyushu and part of Shikoku Island.

The average American today eats about 118 pounds of potatoes every year compared to 195 pounds in 1910.

Alaska Has Candidate For Justice Position

ANCHORAGE, Alaska — (AP) — The Times has called editorially for the appointment of Federal Judge Anthony J. Dimond to succeed the late Justice Frank Murphy on the United States Supreme Court.

Such an appointment, the editorial said, would be the first time an Alaskan was recognized for such a high post.

It cited Dimond's record since 1900 as a school teacher, lawyer, U. S. commissioner, prosecutor, territorial senator and delegate to Congress. He now presides, said the editorial, over the "busiest one-judge U. S. district court in the nation."

Subcommittee Okays Public Works Bill

WASHINGTON — (AP) — A subcommittee of the House Wednesday unanimously approved a bill which would authorize federal government to spend \$100,000,000 to states and communities for planning public works.

The bill still is subject to review by the full committee and the House itself, as well as the Senate.

Any funds advanced would be repaid to the federal government if and when work on projects was started.

The bid calls for "an advance reserve of fully planned public works so as to permit the immediate commencement of construction when the economic situation may make such action desirable."
