CITIZENS OF SPRINGFIELD

MUNICIPAL POWER IS COMING!

... but you must help by signing a customer application.

Reluctance have attempted to contact all power users. Eighty percent of these contacted have signed a Customer's Agreement. It is important to have as many signers as possible before preparing a feasibility report to submit to the bond buyers.

If this sign-up can be completed immediately, the more quickly Springfield power consumers will receive dependable power at a saving. Our reports show that if the present light bills were figured at municipal rates, citizens would have \$25,000 annually left in their pockets, instead of in the Mountain States bill. Which would you like best? To have the \$25,000 hanging in your pockets or to have Mountain States doing the hanging.

It is time to focus attention of the citizens of Springfield on a program to improve street lighting. At a time when many of our neighboring cities in Washington, Oregon and California are laying claim to "The Best Lighted City in the West," Springfield is pointed out as "The Poorest Lighted City." Such criticism is justified as our present street lighting is woefully inadequate to cope with demands of auto and pedestrian traffic.

Help Springfield by helping yourself. Work for a cleaner, better lighted city. Come to 117 North 21st Street and sign a customer agreement or phone 7-2143 for any additional information.
