Wool Support Plan Changed

WASHINGTON—(AP)—The Agriculture Department announced Wednesday a change in its farm price support program which is designed to give producers of shorn wool a chance to benefit from any price rise.

Hereafter, shorn wool will be supported by means of loans to producers, rather than by outright government purchase.

BY PLACING the wool under loan, the producer retains title and hence the right to pay off the loan and sell the wool at any time prices rise above the loan level.

On the other hand, should market prices drop below the support level, the farmer could deliver the wool to the department as full payment for his loan, interest and carrying charges.

Under the purchase method, which has been in effect for wool since 1943, any price advance went to the government rather than to the producer.

THE SUPPORT rate for this year's wool crop will be 90 per cent of the parity price of wool as of next April 1.

The current parity price is 60.3 cents a pound and latest reports indicate farmers are getting an average of about 61 cents.

Firm Requests Another Try

PORTLAND —(AP)— Willamette Plywood, Inc., of Eugene, asked the Federal Court Wednesday to remove it from bankruptcy and allow it to reorganize.

The petition listed assets at $541,000 and debts at more than $370,000. The petition also estimated that $125,000 would be needed to put the plant back in profitable operation. The plant has been idle since December.
