

LANE COUNTY'S RECREATION OPPORTUNITIES each year attract thousands of tourists, providing the base of the county's third-ranking industry. Moreover, as river projects provide new recreation opportunities and as other developments are promoted by state and federal agencies in the forests and on the coast, Lane is becoming a more and more attractive place to combine good living with wholesome outdoor

recreation. Now, to assure that the best advantage is taken of the county's recreation assets, a general campaign is being launched to band all interested organizations together in the Lane County Recreation Committee, Inc.

Drive Begins to Protect Recreation Resources

An intensive country-wide campaign is being launched to rally support for the protection and development of Lane's recreational resources.

At a meeting in Eugene last week, members of the Lane County Recreation Committee decided to carry word of their plans and objectives to every section of the county.

Inviting all interested organizations to join in a concerted program, the committee hopes to gain state and federal aid for priority improvements of Lane's natural and man-made recreation areas.

Carl Baker, representing the McKenzie River area, is president of the committee. This year, succeeded by A. F. Richards of Eugene, Saturday, Baker explained that the committee is functioning as a subcommittee of the Willamette River Basin Project Committee and co-operating with the Governor's Committee on Natural Resources.

Such local participation in planning recreational developments has been specifically invited by the U.S. Corps of Engineers, the Willamette Basin Project Committee and the Willamette Valley Flood Control Commission, Baker said.

Now, with the scheduling of a May 23 public hearing on McKenzie River Basin resources problems, an initial opportunity is presented for the Lane County recreation group to make its voice heard effectively.

The governor's committee, made up of experts in many resources management and related fields,

will hold the hearing at McKenzie High School. A 6 p.m. dinner will precede the business session at 7 p.m.

The presentation on recreation problems and plans will be but one phase of the hearing, Baker explained. Other interests, including lumbering, mining and forest agencies, will be represented.

CONCENTRATING on proposals for the McKenzie area, the recreation committee intends to offer thinking of all Lane residents.

In order to do this, efforts now are being made to enlarge the base of the recreation organization through affiliation of all groups that have particular interests in the subject of county recreation developments.

The resulting organization, Baker explained, will continue to function in similar fashion whenever an opportunity is offered to promote the recreational interests of any part of the county.

Specifically, the plan of the committee is to sign up every organization wishing to join the effort. Then, from each of seven districts of the county, a member of the recreation committee's board of directors will be chosen by vote of the organization delegates in

each district. The directors will "carry the ball" at public hearings, in negotiations with state and federal agencies and in all other ways possible.

SINCE ITS formation late in 1950, Baker explained, the county recreation association has been endeavoring to foster Lane's best interests but never before with the general backing now being urged. "The time has come," he said, "for us to get down to brass tacks—and we'll need all the help we can get."

Through the framework of the recreation committee, Baker said, all groups can join in the planning of future recreational developments. Suggested projects from all parts of the county can be screened, and the most important can be actively pursued.

Not only is there the possibility of state and federal aid in a monetary way, trained personnel of the Army Engineers and other agencies can be asked to assist in constructive plan-making.

governmental agencies as compared with the urgings of a single local interest.

At present, the recreation committee (incorporated as a non-profit organization) has these area representatives as acting directors: Art Richards, Eugene; Lee Murphy, Junction City; Bill Cash, Oakridge; Guy Wright, Springfield, and A. P. Weinkauf, Cottage Grove. Baker represents the McKenzie Valley, and a representative is yet to be named for the Florence district.

IN THE NEXT few weeks, organizations within the various districts will be asked to join in the recreation program by paying a \$2 fee to help offset mailing and other costs. Each will be asked to name a delegate to a district meeting. Then each district will select its official member of the board of directors.

A general policy meeting will be scheduled for the new board members a week or so before the hearing by the governor's committee, Baker said. Thereafter the group will hold regular meetings to continue the general county program.

Student Waits While Friend Takes Own Life

PHOENIX, Ariz.—(AP)—A young college dramatics student told authorities Saturday he drove with a friend to the desert near here, waited while the friend committed suicide with a hose to the car exhaust, then drove "the stiff" back to the college.

George Lee Augspurger, 22, of Phoenix, told sheriff's deputies he and another friend then sat with the body and discussed the death.

The victim was identified as Fred Wege, 22, whose home is in Ridgefield Park, N. J.

A note was found in his pocket which said:

"This is an age of speed, and the man who finishes first is not to be looked down upon."

Deputy Sheriff David P. Edwards said Augspurger told officers he and Wege and another friend spent several hours Thursday night in a tavern near Arizona State College at Tempe, where the victim was a sophomore mathematics student.

Augspurger told the deputies he walked away and "sat on a rock" for half an hour.

When he returned, he said he found the engine running and a garden hose which had been picked up at Augspurger's home was running from the exhaust through a window.

Second Race Charge Made

PORTLAND — (AP)—Another charge of racial discrimination against the state was reported Friday.

Labor Commissioner W. E. Kimsey, whose office handles such cases under the Fair Employment Practices Act, said the matter was near settlement.

He said two Portland Negroes, Nathan W. Nickerson and Theophilus Germany, filed the charge, contending they were refused a job with the State Liquor Commission because of their race.

They said they had passed civil service examinations for appointment as enforcement inspectors.

Kimsey said he had been assured by the Liquor Commission that a solution would be reached.

Fare Increase For Portland Busses Passed

PORTLAND, Ore.—(AP)—Portland bus fares will go up to 15 cents at 2 a.m. Sunday by approval of a fare boost by the Portland city council Friday.

The increase in fares from the present 13 cents for a single ride gave city officials new hope that a threatened strike by Portland Traction Co. employees could be settled before the strike deadline Monday.

The city council voted 3 to 1 to raise the single ride fare 2 cents; to fix the price of a weekly pass at \$2.40, and to increase the student fare to 7 cents.

After the boost was approved, Gordon Steele, president of the Portland Traction Co., and Harvey Thomas, AFL Streetcarman's Union agent, agreed to resume contract negotiations Saturday.

The union also called a special membership meeting Sunday to consider any proposals developed in the negotiations.

Lumberman Dies

LEBANON, Ore.—(AP)—A lumberman was received here Friday of the death of C. Huston Walters, 40, of Lebanon, a prominent lumberman in Tucson, Ariz.

"AS DEPENDABLE AS TOMORROW'S SUN"

In just a few years, dairymen have learned the value of artificial insemination. It has proved to be a more profitable method of breeding cows.

First, they have learned that a cow's fertility can be increased by artificial insemination. It has proved to be a more profitable method of breeding cows.

Then, they have learned that a cow's fertility can be increased by artificial insemination. It has proved to be a more profitable method of breeding cows.

Then, they have learned that a cow's fertility can be increased by artificial insemination. It has proved to be a more profitable method of breeding cows.
