

Air Force Ends Point System

(Continued from Page 1)

jected replacement of the point system by a method based upon an individual's date of return from his most recent foreign tour had nothing to do with the recent refusals by some officers to fly.

The Air Force spokesman said the new plan for selecting men for overseas duty has been under preparation for months. He explained the proposed new method this way:

1. NO OFFICER or airman will serve more than 18 months overseas when separated from his dependents.

2. NO PERSON who has less than 12 months still to serve will be eligible for overseas duty.

3. AN INDIVIDUAL returned from foreign duty may not be assigned overseas again until he has served at least two years in the United States.

4. IN CASES WHERE Air Force men decide to pass up the 18-month provision and wait overseas for their dependents, the complete foreign tour will be the prescribed tour or 12 months after the arrival of dependents, whichever is longer.

The present point system was originally developed during World War II to determine when men were eligible for return to the U. S. It has also been used as one factor in assigning men overseas since. Men were given fixed numbers of points for combat duty, overseas service and so on.

The proposed new 18-month limit on foreign service under conditions of separation from dependents will be effective for air units in the Far East, Alaska, and many smaller areas where Air Force men serve.

FACES CHARGE
COTTAGE GROVE—Fred Annett, Dorena was charged Friday in justice court with willfully permitting livestock to run at large. Bail was fixed at \$50 on each of two complaints. No date was set for trial.

Acheson Warns Editors About Reds' 'Discord'

(Continued from Page 1)

Dr. Alberto Gainza Paz, the publisher whose Buenos Aires newspaper, La Prensa, was expropriated a year ago by the Peron regime.

Wright Bryan, editor of the Atlanta Journal, was elected president of the editors to succeed Alexander F. Jones, editor of the Syracuse Herald-Journal.

Basil L. Walters, executive editor of Knight Newspapers, Inc., was elected First Vice President; James Pope, executive editor of the Louisville Courier-Journal and Times, second vice president; Kenneth MacDonald, executive editor of the Des Moines Register and Tribune, secretary, and Virgil Dabney, editor of the Richmond (Va.) Times-Dispatch editorial page, treasurer.

Before they adjourned, the editors considered problems ranging from whether and when to accept "free passes" to problems of political reporting and forecasting.

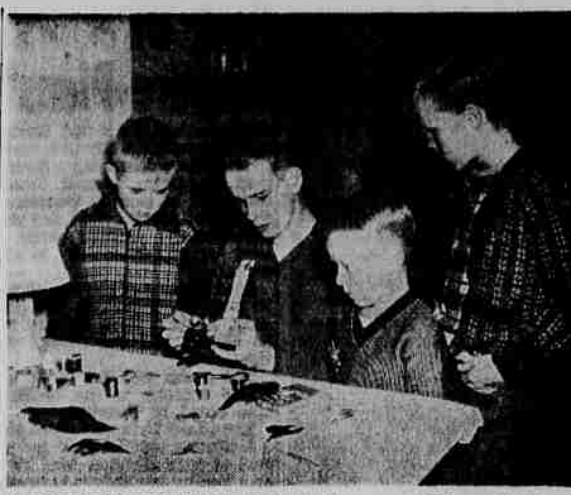

Walters said the American press didn't doubt enough in 1948. "We were too cocksure" in dismissing President Truman's chance for re-election, he declared. He recommended "more legwork and headwork and less guesswork" in 1952.

NOTE—In his mythological reference Acheson was recalling the classical story of the beginning of the Trojan War. At the nuptials of Peleus (Earth) and Thetis (the Sea), all the deities had been invited except Eris (or Discord). Angered at her exclusion, Eris threw the golden apple among the guests. It bore the inscription, "For the fairest."

Thereupon Juno, goddess of beauty; Venus, goddess of love; and Minerva, goddess of wisdom, each claimed the apple. Jupiter, king of the gods, was unwilling to decide so delicate a matter. So he sent the goddesses to Mount Ida where Paris, son of King Priam of Troy, was tending his flocks. Paris now had to make the judgment among the goddesses. Juno promised Paris power and wealth, Minerva assured him glory in war, and Venus promised him the fairest of women for his wife. Paris decided for Venus. The fairest of women was to be Helen, already the wife of Menelaus. The rest of the story, of course, rests in the tragic record of the Trojan conflict.

Mill Operator Hurt When Caught in Saw

Columbus C. Reed, 55, of Veneta, was in good condition at Sacred Heart Hospital Saturday noon following a mill accident. Reed, who divides his time between farming and running his own sawmill, about 10 a. m. Monday was caught in the drive shaft of his saw. Eugene Ambulance took him to the hospital where he was treated for bruises and shock. He probably will be released Sunday after observation.

ADMIRING YOUNGSTERS cluster around Kenneth Linscott as he fabricates a fly. Linscott and other members of Springfield High School's Rod and Reel Club, had one of the many unusual displays at the Springfield High Hobby Show Friday night. The rod and reel gang was all set to open Fishing Season Saturday morning with their teacher-advisor, Bill Johnson.

Low 8:50 a. m., 2.0 ft.; 8:38 p. m., 3.3 ft.

DR. ORVAL Peterson, pastor of the First Christian Church at Yakima, Wash., will speak Monday noon before members of the Eugene Kiwanis Club. His topic will be: "I Visited Heaven." He is conducting an evangelistic preaching mission at the local Christian Church here.

THIS YEAR'S last afternoon upholstery classes at the Eugene Vocational School will start April 23 and 24 and will meet from 1 to 4 p. m. two afternoons a week. Further information may be had by telephoning 5-3377 or visiting the school office at Fourth and Madison.

U. O. Prepares to Dedicate \$1,600,000 Science Building

(Continued from Page 1)

use the basement and first and second floors.

FEATURES OF THE Biology Department include a special aquatic animal room with colored bathtubs for keeping stocks of frogs, salamanders, and fish. Rooms for the small animals are equipped with tile floors and special disposal drains. In the plant room, designed with skylight and temperature control, plants will be grown for laboratory use. Two constant-temperature vaults will hold stocks for propagation of fruit flies. These are used in genetics study.

All physics laboratories are equipped with brick piers through which are piped water, air and gas. On the piers are electrical panels which carry alternating and direct current to the laboratories. Work tables go between the piers. In all laboratories where chemicals are used the tables are finished with soap-stone tops.

New in this area is an X-ray room. Extra-thick concrete walls, and lead-shielded windows and doors give protection against dangerous rays. An optics laboratory provides an excellent darkroom layout for teaching photography.

A LARGE CHEMISTRY laboratory will provide instructional facilities for 80 freshmen. Smaller laboratories are equipped for specialized teaching and research. Safety showers are installed over each door in the chemistry laboratories. An ice-machine which makes snow is one of the features of this department, as are steam tables for mixing and cooking gases.

Equipped for general use is a large lecture room with a seating capacity of 204. This room has a laboratory demonstration table, to which are piped the utilities and which may be shut off by a sliding

panel, thereby turning the room into a studio for projection of slides or motion pictures.

Architects for the Science Building were Lawrence, Tucker & Wallmann of Portland. The general contractor was Russ B. Hammond, Portland, and the mechanical contractor was Buchanan & Co., Portland. The Morris Electric Co., Eugene, handled the electrical contract.

Special laboratory equipment came from Kewaunee Manufacturing Co. of Adrian, Mich. Some of the general equipment was built in the University shop on the campus under the general supervision of Ivan Collins of the physical plant. Collins also was in charge of installation of equipment in the building.

THERE ARE SPECIAL office laboratories for all staff members, and in the basement is a machine shop for making and repairing equipment.

Landscaping of grounds around the new building is underway, with much of the job expected to be completed by Friday.

Official inspection of the Science Building by the building committee of the State Board of Higher Education will be made at 10:30 a. m. Friday. Dr. R. E. Kleinsorge of Silverton is chairman of the building committee.

Open house will be held Friday afternoon. The public is invited from 3:30 to 5 p. m. Open also to the public will be the dedication and the lecture by Dr. Waterman. Saturday events open to the public will include seminars by the visiting scientists at 9 a. m., 10:30 a. m., and 1:30 p. m., and a coffee hour at 3 p. m. At 4 p. m. special demonstrations will be held in the building.

Two organizations will meet on the campus Saturday. These are the Oregon College Teachers of Physics and the Oregon High School Teachers of Science.

Varied Hobbies Exhibited at Annual Show

Rocks, buttons, horses (models), stamps, paper airplanes, arrowheads, and lots of other things which people make or collect. Friday night again made up a successful hobby show at Springfield High School.

The large cafeteria room was jam-packed with displays and several other rooms in the building were in use, too.

Sponsored by the Prepper Y and the Hi-Y clubs in the high school, the hobby show is an annual event and is always well attended. Anyone is eligible to display his items and compete for the ribbon prizes.

Top prizes this year went to: • Grand prize and first place for adult creative: Eldon Olin, for oils, water colors and pencil sketches.

• First place, creative, children's, Paraly White, 20 drawings.

• First place, group division, The Doll Club, entry of more than 70 dolls.

• First place, collective, children, Judith Brown, 35 dolls.

• First place, upper class, collective, Johanna Sue Wilson, 40 dolls.

• First place, upper class, collective, Walter Gossler, 600 rocks in lapidary collection.

• First place, creative, upper class children, Richard Nielsen, collection of ship models.

Ken Kesey, amateur magician, held demonstrations of magic and ventriloquism throughout the evening.

KING ON STAMP
BRUSSELS, Belgium — (U.P.) — Young King Badouin's portrait will appear on his first postage stamp May 15 without his horn-rimmed glasses, it was announced Saturday.
